Sight Word Rings: Activity #1

1. Practice sight words with your child daily.
2. Your child should be able to read the words on sight—without trying to sound them out.
3. Try and beat the timer and say all the words before the timer runs out!
4. Make sure you mix up the words so order memorization does not occur.
5. When your child can fluently read the words, send the sight ring in your child's folder to school.
6. Your child's teacher will test your child. If mastery occurs, another set will be added.
7. Happy Reading!

Find The Sight Word Game: Activity #2

1. Say a sight word to your child from the list and have your child find that sight word on his/her ring.
2. Each time you play, say the words in a different order so order memorization does not occur.
3. Continue until your child finds all the words.
4. Happy searching!
