

# Navigating the Georgia Student Growth Model Data Tool

## Georgia Student Growth Model

Use the drop-down menus to select the school year, assessment, subject, grade, and perspective.

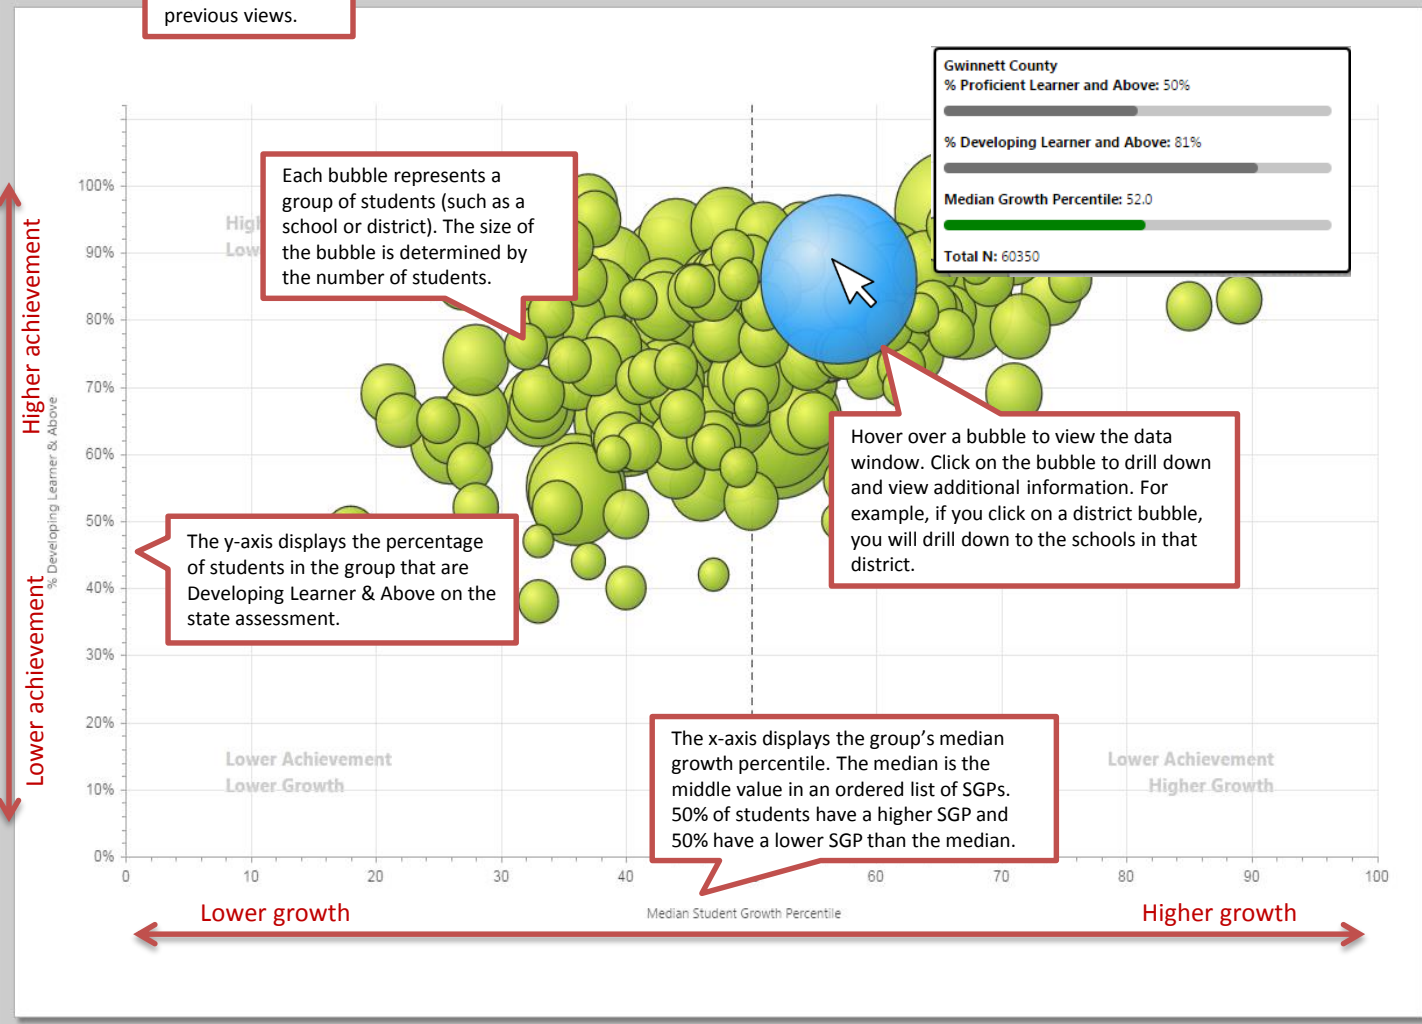

Visit the GSGM website for more information on SGPs.

Print the current page.

Total > State : GA

Year: 2015    Assessment: MilestonesEOG    Subject: Mathematics    Grade: 06    Perspective: By District

Use the hyperlinks to go back to previous views.

Each bubble represents a group of students (such as a school or district). The size of the bubble is determined by the number of students.

The y-axis displays the percentage of students in the group that are Developing Learner & Above on the state assessment.

Hover over a bubble to view the data window. Click on the bubble to drill down and view additional information. For example, if you click on a district bubble, you will drill down to the schools in that district.

The x-axis displays the group's median growth percentile. The median is the middle value in an ordered list of SGPs. 50% of students have a higher SGP and 50% have a lower SGP than the median.
