Not for capital projects/construction or salaries.

-Efforts to reauthorize Perkins are moving with the ESSA reauthorization last month.

GACTE Update

2016 Legislative Agenda

www.gacte.org

2013 Legislative Priorities

Georgia Association for
Career & Technical Education
www.gacte.org

Create discussion and conversation about the role Career/Technical and Agricultural Education plays at the local level in the areas of workforce development, economic development and high school completion.

Protect and monitor the current Career/Technical and Agricultural Education funding in the FY13 Supplemental and FY14 Budgets.

Continue to seek additional monies for CTAE supervision funding, extended day/year and industry certification.

Identify possible revenue sources and programs to increase the current scope of related Career/Technical and Agricultural Education programs and budget.

Monitor related legislation and appropriations to educate the membership about potential impact to Career/Technical and Agricultural Education.

Advocate against any move to reduce current Career/Technical and Agricultural Education programs or funding.

Support the adequate funding for DUAL Enrollment to support local school system costs.

Continue to educate members of the General Assembly regarding Georgia's level of financial commitment to Career/Technical and Agricultural Education and how it impacts Georgia's Federal allotment of Carl D. Perkins Career & Technical Education Act funding.

Continue to provide leadership and support for career and technical student organizations: (CTI, DECA, FBLA, FCCLA, FFA, HOSA, SkillsUSA, and TSA).

Continue to educate members of the General Assembly about CTAE as a critical component of a student's high school program of study toward graduation.

Support the continued funding of the Career Academy grant

Monitor the implementation of the BRIDGE Bill, Move On When Ready Act, and HB186 Career Pathways bill to ensure they support and enhance our current Career/Technical and Agricultural education programs and not redirect existing resources
