Engineering and Technology Education Exploring Engineering and Technology – Grade 6 Course Number – 21.02100

Course Description: The Exploring Engineering and Technology course will provide all students with an introduction to the principles of Engineering & Technology and its place in the modern world. Students will be educated on the daily impact of engineering, and the nature of technology. Exploring Engineering and Technology students will use the Engineering Design Process and experimentation to solve a variety of technological problems. Students will participate in engineering design challenges to understand how criteria, constraints, and processes affect designs. Students will participate in activities that will allow them to gain experience in brainstorming, visualization, modeling, construction, testing, experimentation, and refining designs.

Students also develop skills in researching for information and communicating design information. Exploring Engineering and Technology reinforces the areas of math, science, social studies, and language arts through practical application and hands-on design challenges. Exposure to Engineering and Technology related careers, work ethics and leadership skills will be important components in this course.

Course Standard 1

The following standard is included in all CTAE courses adopted for the Career Cluster/Pathways. Teachers should incorporate the elements of this standard into lesson plans during the course. The topics listed for each element of the standard may be addressed in differentiated instruction matching the content of each course. These elements may also be addressed with specific lessons from a variety of resources. This content is not to be treated as a unit or separate body of knowledge but rather integrated into class activities as applications of the concept.

MS-ENGR-EET-1

Demonstrate employability skills required by business and industry.

The following elements should be integrated throughout the content of this course.

1.1 Communicate effectively through writing, speaking, listening, reading, and interpersonal abilities.

Course Standard 2

MS-ENGR-EET-2

Demonstrate proper safety techniques and tool usage in the Engineering and Technology Laboratory

- 2.1 Accurately interpret and adhere to safety signs, symbols, and labels.
- 2.2 Demonstrate and incorporate safe laboratory procedures in lab, shop, and field environments.
- 2.3 Identify, select, and use appropriate Personal Protective Equipment (PPE), follow work area organization procedures and follow Standard Operating Procedures (SOP) when performing work.
- 2.4 Identify, select, and use appropriate tools and machines for specific tasks.
- 2.5 Demonstrate safe use of tools and machines.

Course Standard 3

MS-ENGR-EET-3

Identify engineering and technology and its impact on society.

- 3.1 Explore the historical impacts of engineering & technology.
- 3.2 Examine the effects of engineering & technology on society including social, cultural, political, economic and environmental impacts.
- 3.3 Assess the impact(s) of technological products and systems.
- 3.4 Demonstrate an understanding of the Universal Systems Model.

Course Standard 4

MS-ENGR-EET-4

Apply the Engineering Design Process to generate a solution to hands-on design challenges.

- 4.1 Examine the engineering design attributes
- 4.2 Demonstrate the principles of research and design
- 4.3 Use math and science to create solutions to engineering problems
- 4.4 Utilize the engineering design process
- 4.5 Use and maintain technological products and systems
- 4.6 Apply the Universal Systems Model to existing systems
- 4.7 Utilize an Engineering Notebook as a record of process

Course Standard 5

MS-ENGR-EET-5

Examine and research careers in fields related to engineering & technology.

- 5.1 Investigate educational requirements, job responsibilities, employment trends, and opportunities within engineering and technology career pathways using credible sources.
- 5.2 Investigate earnings potential for engineering & technology careers
- 5.3 Identify gender and diversity related issues in engineering & technology careers

Course Standard 6

MS-ENGR-EET-6

Explore how related career and technology student organizations are integral parts of career and technology education courses. Students will develop leadership, interpersonal, and problem-solving skills through participation in co-curricular activities associated with the Technology Student Association.

- 6.1 Explain the goals, mission and objectives of CTSO organizations.
- 6.2 Explain how participation in career and technology education student organizations can promote lifelong responsibility for community service and professional development.
- 6.3 Demonstrate teamwork, leadership, interpersonal relations, and project management skills.
