

160-4-7-.03 CHILD FIND PROCEDURES

SUMMARY OF CHANGES

Changes were made to 2(b) to clarify what interventions prior to referral mean and to provide for exceptions to the intervention prior to referral requirement in extreme and well documented circumstances. This has been the practice and was simply added here so that all parties are clear. Referrals that are not accompanied by documentation of prior interventions should be infrequent and most often related to the obvious presence of a significant disability.
