

# Data Limitations

The data displayed on this school system financial information webpage is unaudited information that is provided by each school system in the state of Georgia. Any disclosures related to the data provided must be obtained from each individual school system. The expenditure data alone does not provide enough information to indicate whether the district is operating in the most fiscally responsible manner. There are various factors that affect the costs incurred by a school system. For example, a system in a rural setting with a low student population will have higher transportation costs in relation to students served. A system with a higher rate of exceptional students will have higher education costs versus a district with a lower rate. A system that contracts with a staffing firm will have higher contracted services and lower salary costs versus a school system that employs all staff directly.

The information on this school system financial information webpage is to be used in conjunction with other information to obtain a holistic assessment of a school or school system.
