

Practicing Math Facts: Flashcard War

1. Split the stack of flashcards in half, giving half to your student and keeping half for yourself.
2. Each player holds their stack of cards behind their back without peeking.
3. Each player takes turns putting a flash card down in the middle between both players.
4. The player to give the correct answer keeps that card.
5. The player with the most cards at the end wins!

Extensions for the activity:

1. Practice only 1 to 2 fact families when you first begin play. For example, only the 2's, 5's or 10's. As your student shows mastery of the facts begin to mix all of the multiplication fact families together for a greater challenge.
 2. You can use division flashcards once multiplication facts are mastered.
