Georgia School Performance Standards

Introduction

Georgia School Performance Standards History

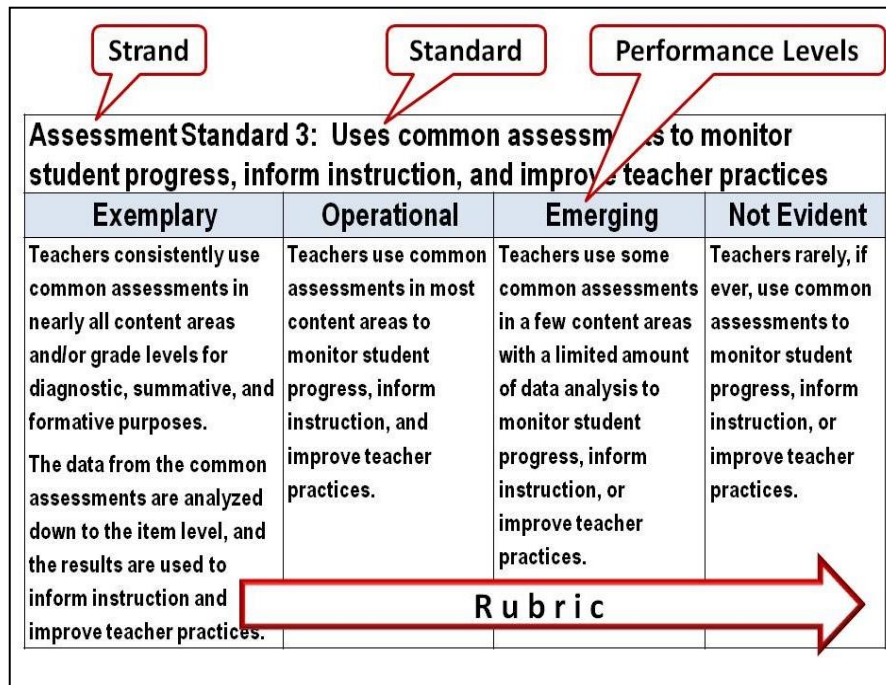

Since 2005, *School Keys* has served as the foundation for Georgia's comprehensive data-driven system of school improvement and support. Initially titled *Georgia Standards for School Performance*, the tool was correlated to several well-known and respected research frameworks and aligned with the 2003 meta-analysis of Robert Marzano, *What Works in Schools*. At that time, the rubrics allowed scoring along a continuum ranging from "Beginning" to "Full Implementation."

In 2006, the *Georgia Standards for School Performance* underwent a revision that provided more detail to the rubrics and allowed scoring on a four-point scale from "Not Addressed" to "Emergent" to "Operational" to "Fully Operational." The name was also shortened to *Georgia School Standards*, and the standards were aligned with the 2005 meta-analysis, *School Leadership that Works* by Marzano, Waters, and McNulty. By the fall of 2007, *Georgia School Standards* became *School Keys*. In addition, an external validation study of the *School Keys* was conducted by the Georgia Partnership for Excellence in Education. This external validation included responses from and critiques by a national panel of experts in school improvement.

The 2013 revision not only represented a major upgrade and streamlining of the standards and rubrics, but it also aligned *School Keys* with initiatives in professional learning and family engagement as well as the new teacher and leader effectiveness systems, *Teacher Keys* and *Leader Keys*. This 2015 version is named *Georgia School Performance Standards*, featuring a greater emphasis on systems and processes. The standards align with *Teacher Keys*, *Leader Keys*, *District Performance Standards*, and Indistar. The revision ensures that the language of the standard is reflected in the rubric, there is one verb and main idea per proficiency level, and there is consistent scaling with clear distinctions among the four proficiency levels.

Georgia School Performance Standards

Georgia School Performance Standards Structure

Assessment Standard 3: Uses common assessments to monitor student progress, inform instruction, and improve teacher practices			
Exemplary	Operational	Emerging	Not Evident
Teachers consistently use common assessments in nearly all content areas and/or grade levels for diagnostic, summative, and formative purposes. The data from the common assessments are analyzed down to the item level, and the results are used to inform instruction and improve teacher practices.	Teachers use common assessments in most content areas to monitor student progress, inform instruction, and improve teacher practices.	Teachers use some common assessments in a few content areas with a limited amount of data analysis to monitor student progress, inform instruction, or improve teacher practices.	Teachers rarely, if ever, use common assessments to monitor student progress, inform instruction, or improve teacher practices.

The Georgia School Performance Standards are divided into eight broad strands: Curriculum, Assessment, Instruction, Professional Learning, Leadership, Planning and Organization, Family and Community Engagement, and School Culture. The eight strands have been further developed and defined into 48 performance standards and rubrics with four performance levels. To the left is a graphic that shows this basic structure. A clear understanding of the four performance levels is essential to effectively use the Georgia School Performance Standards.

Not Evident (Level 1): The specific standard has not been implemented, or the implementation has generated little or no evidence of progress.

Emerging (Level 2): Initial steps to implement the specific standard have occurred, or the implementation has generated some early evidence of progress.

Operational (Level 3): The specific standard has been implemented, the implementation has generated considerable

evidence of progress, and the school has met the standard (this is indicated in the document by a lack of shading in each of the Operational levels).

Exemplary (Level 4): The specific standard has been implemented to a very high level, and the school can serve as a model for this standard for other schools.

Georgia School Performance Standards

Georgia School Performance Standards Uses

The intent is that the *Georgia School Performance Standards* will serve as a tool for all schools in Georgia. The Georgia Department of Education (Department) encourages the use the *Georgia School Performance Standards* by teams of professional educators at schools, districts, and Regional Educational Service Agencies as a tool to assist in measuring, guiding, and facilitating constant growth as schools strive for continuous improvement.

The *Georgia School Performance Standards* has been extensively utilized with the *Georgia School Assessment on Performance Standards (GSAPS)* process for school reviews by external teams. The *GSAPS Analysis* provides tools to collect quantitative and qualitative data from classroom observations, an online certified staff survey, student achievement results, and interviews with individuals and groups of teachers, administrators, support staff, students, and parents. The collected data can be applied to the *Georgia School Performance Standards* to determine strengths, identify areas of need, and chart the progress of the school. *Georgia School Performance Standards* serves as the summary document to identify a school's level of implementation on each of the standards. The *GSAPS Analysis* employed by Department staff follows a detailed, structured process that allows the external team to reach a high level of professional consensus and consistency.

One of the most powerful uses of the *Georgia School Performance Standards* occurs with a leadership team at the school level. This specialized, collaborative team of teachers and building leaders may use the standards and rubrics to assess their school's current level of performance. By collecting artifacts and evidence, analyzing data, and collaboratively scoring the rubric for each standard, the leadership team can reach consensus about their progress on school improvement. By viewing and discussing requirements to reach the next level of growth, the leadership team can set goals and plan next action steps. The *Georgia School Performance Standards* can be a valuable tool that guides leaders and teachers as they implement and monitor key initiatives and make adjustments based upon data.

Georgia School Performance Standards

CURRICULUM

A system for aligning, facilitating, and monitoring consensus-driven content, performance standards, assessments, and resources to maximize student learning

Curriculum Standard 1: Uses systematic, collaborative planning processes so that teachers share an understanding of expectations for standards, curriculum, assessment, and instruction			
Level 4 <input type="checkbox"/> Exemplary	Level 3 <input type="checkbox"/> Operational	Level 2 <input type="checkbox"/> Emerging	Level 1 <input type="checkbox"/> Not Evident
<p>A systematic, collaborative process is used proactively for curriculum planning.</p> <p>Nearly all teachers or groups of teachers, support staff, and leaders within the school have common expectations for standards, curriculum, assessment, and instruction.</p>	<p>A systematic, collaborative process is used regularly for curriculum planning.</p> <p>Most teachers or groups of teachers within the school have common expectations for standards, curriculum, assessment, and instruction.</p>	<p>A collaborative process is used occasionally for curriculum planning.</p> <p>Some teachers or groups of teachers within the school have common expectations for standards, curriculum, assessment, and instruction.</p>	<p>A collaborative process is rarely, if ever, used for curriculum planning.</p> <p>Few, if any, teachers or groups of teachers within the school have common expectations for standards, curriculum, assessment, and instruction.</p>

Georgia Department of Education
Richard Woods, Georgia's School Superintendent
"Educating Georgia's Future"

Georgia School Performance Standards

Curriculum Standard 2: Designs curriculum documents and aligns resources with the intended rigor of the required standards			
Level 4 <input type="checkbox"/> Exemplary	Level 3 <input type="checkbox"/> Operational	Level 2 <input type="checkbox"/> Emerging	Level 1 <input type="checkbox"/> Not Evident
<p>Curriculum documents (e.g., lesson plans, unit plans, performance tasks, curriculum maps, scope, and sequence documents, guides) that are aligned with the intended rigor of the required standards are the products of a systematic, collaborative process.</p> <p>These curriculum documents and resources are used and continuously revised by teachers and support staff to ensure an alignment with the intended, taught, and tested standards.</p>	<p>Curriculum documents (e.g., lesson plans, unit plans, performance tasks, curriculum maps, scope and sequence documents, guides) have been designed, and resources are aligned with the intended rigor of the required standards.</p> <p>These curriculum documents and resources guide the work of teachers and instructional support staff.</p>	<p>Curriculum documents and resources exist, but they are not complete in all content areas or grade levels or lack the intended rigor of the required standards.</p>	<p>Few, if any, curriculum documents and resources exist to support the implementation of the intended rigor of the required standards.</p>

Georgia Department of Education
Richard Woods, Georgia's School Superintendent
"Educating Georgia's Future"

Georgia School Performance Standards

Curriculum Standard 3: Uses a process to review curriculum documents to ensure alignment to the intent and rigor of the standards and revises as needed			
<input type="checkbox"/> Level 4 Exemplary	<input type="checkbox"/> Level 3 Operational	<input type="checkbox"/> Level 2 Emerging	<input type="checkbox"/> Level 1 Not Evident
<p>A process to review curriculum documents (e.g., curriculum maps, units, pacing guides, assessments, tasks, strategies, lessons) is implemented extensively.</p> <p>Collected data (e.g., performance data, student work, lesson and unit plans, formal and informal observations, learning walks, peer observations, action research) are consistently analyzed, and the curriculum documents are revised as needed in nearly all content areas or grade levels.</p>	<p>A process to review curriculum documents (e.g., curriculum maps, units, pacing guides, assessments, tasks, strategies, lessons) is implemented regularly.</p> <p>Collected data (e.g., performance data, student work, lesson and unit plans, formal and informal observations, learning walks, peer observations, action research) are analyzed, and the curriculum documents are revised as needed in most content areas or grade levels, or both.</p>	<p>A process to review curriculum documents is implemented occasionally.</p> <p>Some teachers or groups of teachers within the school review curriculum documents to ensure alignment with the intent and rigor of the standards.</p>	<p>A process to review curriculum documents does not exist.</p> <p>Little, if any, review of curriculum documents takes place.</p>

Georgia School Performance Standards

ASSESSMENT

The collecting and analyzing of student performance data to identify patterns of achievement and underachievement in order to design and implement appropriate instructional interventions

Assessment Standard 1: Aligns assessments with the required curriculum standards			
Level 4 <input type="checkbox"/> Exemplary	Level 3 <input type="checkbox"/> Operational	Level 2 <input type="checkbox"/> Emerging	Level 1 <input type="checkbox"/> Not Evident
Nearly all assessments are aligned with the required curriculum standards. Assessments are reviewed during the school year to ensure alignment.	Most assessments are aligned with the required-curriculum standards.	Some assessments are aligned with the required curriculum standards.	Few, if any, assessments are aligned with the required curriculum standards.

Georgia Department of Education
Richard Woods, Georgia's School Superintendent
"Educating Georgia's Future"

Georgia School Performance Standards

Assessment Standard 2: Uses a balanced system of assessments including diagnostic, formative, and summative to monitor learning and inform instruction			
Level 4 <input type="checkbox"/> Exemplary	Level 3 <input type="checkbox"/> Operational	Level 2 <input type="checkbox"/> Emerging	Level 1 <input type="checkbox"/> Not Evident
<p>A balanced system of assessments, including diagnostic, formative, and summative assessments, is used pervasively to monitor learning and to inform instruction.</p> <p>A balanced system of assessments includes, but is not limited to, constructed response, writing prompts, performance tasks, and culminating projects.</p>	<p>A balanced system of assessments, including diagnostic, formative, and summative assessments, is used routinely to monitor learning and to inform instruction.</p>	<p>A system of assessments is used sporadically to monitor learning and to inform instruction.</p>	<p>A system of assessments is rarely, if ever, used to monitor learning and to inform instruction.</p>

Georgia School Performance Standards

Assessment Standard 3: Uses common assessments aligned with the required standards to monitor student progress, inform instruction, and improve teacher practices			
Level 4 <input type="checkbox"/> Exemplary	Level 3 <input type="checkbox"/> Operational	Level 2 <input type="checkbox"/> Emerging	Level 1 <input type="checkbox"/> Not Evident
<p>Teachers consistently use common assessments aligned with the required standards in nearly all content areas, grade levels, or both for diagnostic, summative, and formative purposes.</p> <p>The data from the common assessments are analyzed down to the item level, and the results are used to inform instruction and improve teacher practices.</p>	<p>Teachers use common assessments aligned with the required standards in most content areas to monitor student progress, inform instruction, and improve teacher practices.</p>	<p>Teachers use some common assessments aligned with the required standards in a few content areas with a limited amount of data analysis to monitor student progress, inform instruction, or improve teacher practices.</p>	<p>Teachers use few, if any, common assessments to monitor student progress, inform instruction, or improve teacher practices.</p>

Georgia School Performance Standards

Assessment Standard 4: Implements a process to collaboratively analyze assessment results to adjust instruction			
<input type="checkbox"/> Level 4 Exemplary	<input type="checkbox"/> Level 3 Operational	<input type="checkbox"/> Level 2 Emerging	<input type="checkbox"/> Level 1 Not Evident
Teachers extensively use a systematic, collaborative process to analyze assessment results. Instruction is consistently adjusted based on the analysis of assessment results across all content areas, grade levels, or both.	Teachers regularly use a collaborative process to analyze assessment results. Instruction is routinely adjusted based on the analysis of assessment results.	Teachers occasionally use a collaborative process to analyze assessment results. Instruction is sometimes adjusted based on the analysis of assessment results.	A collaborative process to analyze assessment results does not exist. Instruction is rarely, if ever, adjusted based on the analysis of assessment results.

 Richard Woods, Georgia's School Superintendent
 "Educating Georgia's Future"

Georgia School Performance Standards

Assessment Standard 5: Implements grading practices that provide an accurate indication of student progress on the required standards			
Level 4 <input type="checkbox"/> Exemplary	Level 3 <input type="checkbox"/> Operational	Level 2 <input type="checkbox"/> Emerging	Level 1 <input type="checkbox"/> Not Evident
The grading practices used by teachers across nearly all content areas, grade levels, or both, consistently provide an accurate indication of student progress on the required standards.	The grading practices used by teachers in most content areas, grade levels, or both provide an accurate indication of student progress on the required standards.	The grading practices used by teachers in some content areas, grade levels, or both provide an accurate indication of student progress on the required standards.	The grading practices used by teachers rarely, if ever, provide an accurate indication of student progress on the required standards.

Georgia School Performance Standards

INSTRUCTION

Designing and implementing teaching—learning—assessment tasks to ensure that all students increase their learning and achieve proficiency on curriculum standards

Instruction Standard 1: Provides a supportive and well-managed environment conducive to learning			
Level 4 <input type="checkbox"/> Exemplary	Level 3 <input type="checkbox"/> Operational	Level 2 <input type="checkbox"/> Emerging	Level 1 <input type="checkbox"/> Not Evident
<p>A supportive and well-managed environment conducive to learning is evident throughout the school.</p> <p>Students consistently stay on-task and take responsibility for their own actions.</p>	<p>A supportive and well-managed environment conducive to learning is evident in most classrooms.</p>	<p>A supportive and well-managed environment conducive to learning is evident in some classrooms.</p>	<p>A supportive and well-managed environment conducive to learning is evident in few, if any, classrooms.</p>

Georgia Department of Education
Richard Woods, Georgia's School Superintendent

Georgia School Performance Standards

Instruction Standard 2: Creates an academically challenging learning environment			
<input type="checkbox"/> Level 4 Exemplary	<input type="checkbox"/> Level 3 Operational	<input type="checkbox"/> Level 2 Emerging	<input type="checkbox"/> Level 1 Not Evident
<p>Nearly all teachers create an academically challenging, learning environment (e.g., higher-order thinking skills and processes, active student engagement, relevance, collaboration).</p> <p>Students consistently work independently and in teams to solve real-world problems that require advanced effort, decision-making, and critical and creative thinking.</p>	<p>Most teachers create an academically challenging, learning environment (e.g., higher-order thinking skills and processes, active student engagement, relevance, collaboration).</p>	<p>Some teachers create an academically challenging learning environment.</p>	<p>Few, if any, teachers create an academically challenging learning environment.</p>

Georgia School Performance Standards

Instruction Standard 3: Establishes and communicates clear learning targets and success criteria aligned to curriculum standards			
<input type="checkbox"/> Level 4 Exemplary	<input type="checkbox"/> Level 3 Operational	<input type="checkbox"/> Level 2 Emerging	<input type="checkbox"/> Level 1 Not Evident
<p>Nearly all teachers establish and communicate clear learning targets and success criteria aligned to the required curriculum standards.</p> <p>Learning targets are evident throughout the lesson and in student work. Articulation of the learning targets is consistent and pervasive among like content areas and grade levels.</p>	<p>Most teachers establish and communicate clear learning targets and success criteria aligned to the required curriculum standards.</p> <p>Learning targets are evident throughout the lesson and in student work.</p>	<p>Some teachers establish and communicate clear learning targets and success criteria aligned to the required curriculum standards.</p>	<p>Few, if any teachers establish clear learning targets and success criteria aligned to the required curriculum standards.</p>

Georgia Department of Education
Richard Woods, Georgia's School Superintendent
"Educating Georgia's Future"

Georgia School Performance Standards

Instruction Standard 4: Uses research-based instructional practices that positively impact student learning			
<input type="checkbox"/> Level 4 Exemplary	<input type="checkbox"/> Level 3 Operational	<input type="checkbox"/> Level 2 Emerging	<input type="checkbox"/> Level 1 Not Evident
Nearly all teachers pervasively demonstrate a repertoire of highly effective, research-based instructional practices that positively impact student learning (e.g., providing feedback, cooperative learning, advance organizers, questioning techniques, similarities and differences, reinforcing effort, goal setting, summarizers, graphic representations, reciprocal teaching).	Most teachers demonstrate a repertoire of effective, research-based instructional practices that positively impact student learning (e.g., providing feedback, cooperative learning, advance organizers, questioning techniques, similarities and differences, reinforcing effort, goal setting, summarizers, graphic representations, reciprocal teaching).	Some teachers demonstrate a repertoire of effective, research-based instructional practices that positively impact student learning.	Few, if any, teachers demonstrate a repertoire of effective, research-based instructional practices that positively impact student learning.

ALTERNATIVE EDUCATION PROGRAM

Based on SB Rule 160-4-8-.12

Serve as a tool for identifying areas of strength and areas needing improvement for each alternative education program or school within a district.

AEP Standard 1: Conducts routine and systematic program evaluations to improve educational programs and services			
Level 4 <input type="checkbox"/> Exemplary	Level 3 <input type="checkbox"/> Operational	Level 2 <input type="checkbox"/> Emerging	Level 1 <input type="checkbox"/> Not Evident
District and/or local school personnel work collaboratively to conduct ongoing program evaluations. Multiple sources of data (e.g., student achievement, budgets, course completion, graduation rate, attendance, disciplinary, classroom observation, perception, teacher quality, etc.) are collected, analyzed, and used to determine progress of the AEP.	District and/or local school personnel conduct frequent evaluations to determine progress of the AEP. Sources of data are collected and used to determine specific strengths and next steps needed to promote student achievement.	District and/or local school personnel conduct sporadic evaluations to determine progress. Limited data are used in the AEP evaluation process.	District and/or local school personnel do not conduct program evaluations.

Georgia Department of Education
Richard Woods, Georgia's School Superintendent
"Educating Georgia's Future"

Georgia School Performance Standards

AEP Standard 2: Implements a transition process to support a seamless entry to the alternative education program and a seamless return to the traditional home school or external agency, which includes a plan for transition success			
Level 4 <input type="checkbox"/> Exemplary	Level 3 <input type="checkbox"/> Operational	Level 2 <input type="checkbox"/> Emerging	Level 1 <input type="checkbox"/> Not Evident
<p>The AEP and traditional schools have collaborated to establish a well-defined process (e.g., orientation, assessment of the student, development of an individualized graduation plan, etc.) to address transition success.</p> <p>Student needs are deliberately addressed before, during and after the student's transition. Student Support Teams (SST) facilitate transitional services for each student.</p> <p>This process is also used each time a student is enrolled in an Ombudsman program, Department of Human Services (DHS), or Department of Juvenile Justice (DJJ).</p> <p>Transitional planning includes referrals to community agencies and support services</p>	<p>The AEP and traditional schools have agreed upon a process (e.g., orientation, assessment of the student, development of an individualized graduation plan, etc.) to address transition success.</p> <p>Student records, including the status of where the student is in the SST process from the sending school, are reviewed to determine appropriate placement and services both pre- and post-transition.</p> <p>Procedures for students to transition among external agencies (DHS, DJJ, etc.), schools and group homes are implemented.</p>	<p>The AEP has established a process to address transitions and has communicated the process to traditional schools.</p> <p>Student records are not shared in a timely manner and pre-entry and post-exit transitions are inconsistent.</p>	<p>There is little or no communication between the traditional school and the AEP regarding students' pre-entry and post-exit transitions.</p>

AEP Standard 6: Program leadership communicates effectively and efficiently			
Level 4 <input type="checkbox"/> Exemplary	Level 3 <input type="checkbox"/> Operational	Level 2 <input type="checkbox"/> Emerging	Level 1 <input type="checkbox"/> Not Evident
AEP leadership has developed and implements a detailed process to ensure consistent communication with stakeholders.	AEP leadership communicates with stakeholders in a timely manner. Rules, policies, practices, and procedures are regularly articulated and communicated throughout the school community through a variety of ways (e.g., newsletters, email, surveys, meetings, etc.).	AEP leadership attempts to communicate with stakeholders through random methods. Rules, policies, practices, and procedures are inconsistently articulated and communicated throughout the school community.	Rules, policies, practices, and procedures are infrequently articulated and communicated throughout the school community.

Georgia School Performance Standards

AEP Standard 9: Supports the academic success of students with the effective implementation of a rigorous, data-driven digital and virtual learning program aligned to state content standards

***This standard is only applicable to alternative education program schools that use digital and virtual learning programs.**

<input type="checkbox"/> Level 4 <input type="checkbox"/> Exemplary	<input type="checkbox"/> Level 3 <input type="checkbox"/> Operational	<input type="checkbox"/> Level 2 <input type="checkbox"/> Emerging	<input type="checkbox"/> Level 1 <input type="checkbox"/> Not Evident
<p>Students consistently access rigorous digital and virtual learning programs that incorporate literacy and communication skills, as well as engage students in multiple ways to learn.</p> <p>Digital and virtual learning programs are consistently and seamlessly used to provide enhanced, rigorous learning opportunities that further the academic growth of students.</p>	<p>Students routinely access rigorous digital and virtual learning programs that incorporate literacy and communication skills, as well as engage students in multiple ways to learn.</p> <p>The digital and virtual learning programs used provide timely, reliable and valid feedback that is routinely used to inform teaching and learning.</p>	<p>Students occasionally access digital and virtual learning programs that sometimes incorporate literacy and communication skills as well as engage students in multiple ways to learn.</p> <p>Data from digital and virtual learning programs are infrequently used to inform teaching and learning.</p>	<p>This category is not applicable for this standard.</p>

Georgia School Performance Standards

Glossary

Academically challenging environment – A robust learning environment exists that cultivates higher-order thinking skills and processes as students work independently and on teams to solve real-world problems that require advanced effort, decision making, and critical and creative thinking. Over time, teachers build student capacity to self-monitor with tools, such as rubrics or exemplars.

Advisement – Programs are in place in which adults, older students, or both are partnered with middle or high school students on a small group basis for academic and career counseling. Advisors may be teachers, administrators, parents, business representatives, community members, or older students, including college students performing community service.

Balanced system of assessments – A variety of assessment types are utilized to monitor student progress and inform instructional practices. This balanced, comprehensive approach should reveal a photo album rather than a snapshot of student progress. Balanced assessments can include tests and quizzes (selected-response and constructed-response items); reflective assessments (journals, logs, peer response groups, interviews, and conferences); academic prompts (with an articulated format, audience, topic, and purpose); and culminating performance tasks and projects.

Celebrations – Rituals, ceremonies, and programs exist within the school to acknowledge the individual, small group, and organizational achievements and accomplishments for both students and staff.

Collaborative planning – Teachers meet systematically and work together to develop lessons, units, and other curriculum documents. They also engage in activities such as reviewing teacher and student products to determine the effectiveness of instructional strategies and the progress of their students.

College and career readiness – Minimum high school graduation expectations are implemented that include a rigorous, robust, and well-rounded curriculum aligned with college- and career-ready standards that cover a wide range of academic and technical knowledge and skills to ensure that students leave high school ready to succeed in college and careers.

Common assessments – Assessments are used that are often collaboratively designed and administered by two or more teachers to inform students of their progress on curriculum standards and teachers of the effectiveness of their own instructional practices.

Richard Woods, Georgia's School Superintendent
"Educating Georgia's Future"

Georgia School Performance Standards

Continuous improvement – The school develops and implements a systematic and comprehensive process to ensure required standards are achieved by individual students, subgroups, and the school. This approach includes the ongoing process of data gathering and analysis and adjusting the teaching-learning-assessment processes to reinforce continual progress. The focus of this improvement process can range from the specific (i.e., lesson) to growing levels of complexity and comprehensiveness (i.e., from unit to unit, grading period to grading period, subject area to subject area, and grade level to grade level).

Culture – The ways in which the norms, values, standards, and practices interplay within a school community eventually define its culture. The culture is shaped, enhanced, and maintained by school leaders, teachers, other staff, and students.

Data analysis – Teachers and leaders use a process of analytical and logical reasoning to study various school or district data to highlight useful information, determine needs and trends, and facilitate decision making and problem solving.

Data-driven interventions – Specific strategies are aligned to specific needs and designed to be used with small groups or individual students to provide additional support for academics or behavior.

Descriptive feedback – Students or adults are provided specific information in the form of written comments or conversations to help them understand what they need to do to improve relative to required standards or expectations.

Diagnostic assessments – A variety of assessment tasks or processes are used to determine the level of knowledge, skills, and understandings of individual students at the beginning of a course, grade level, unit, or lesson.

Differentiate instruction – Instruction is differentiated to provide support for students according to their instructional needs, including modifying content, process, product, and learning environment based upon students' readiness levels, learning profile, interests, as well as background knowledge. (See *Universal Design for Learning*.)

Exemplars – Samples of work are used in a classroom to serve as models or sources for comparison to convey to students the expectations of the teacher or the requirement of the standards.

Expectations – Teachers and school leaders communicate behaviors or performances that they anticipate from students and staff on a daily basis.

Richard Woods, Georgia's School Superintendent
"Educating Georgia's Future"

Georgia School Performance Standards

Feedback – Information is communicated between the teacher and student based on diagnostic, formative, and summative assessment data involving how students are performing relative to the required curriculum standards. Effective feedback is timely, specific, understandable, and provided throughout the learning process. Feedback is also expected between school leaders and staff.

Formal and informal observations – Formal classroom observations are conducted for the summative purpose of teacher evaluation. Informal classroom observations are usually shorter and conducted for the formative purposes of providing feedback to improve professional practice or to monitor the implementation of professional learning or other initiatives.

Formative assessment – Formal and informal assessment processes and tasks are used throughout a unit or course of study to monitor student progress, elicit evidence of learning gaps and strengths, and provide feedback to students so that they can adjust their learning process. Formative assessment also provides important information for teachers as they design the next steps of instruction.

Georgia School Assessment on Performance Standards – This GaDOE-developed process is a review and assessment of a school's progress toward meeting the requirements of the Georgia School Performance Standards. This review includes analysis of student performance data, staff interviews and surveys, classroom observations, and a review of curriculum documents.

Higher-order processes – Cognitive processes such as investigation, problem solving, decision making, critical and creative thinking, self-regulation, and meta-cognition that are in place in the classroom or learning environment.

Higher-order thinking skills – Teachers engage students to use skills that require critical, logical, reflective, meta-cognitive, and creative thinking. The skills are activated when students encounter unfamiliar problems, questions, or dilemmas. Successful application of the skills results in problem solving, decisions, performances, and products.

Home support strategies – Families are encouraged to use specific strategies at home with children to support the educational efforts of the school staff. These strategies may be academic in nature, such as reading with or to students or quizzing students on math facts, but they may be organizational, such as designating a home study area and a specific time for study for students.

Richard Woods, Georgia's School Superintendent
"Educating Georgia's Future"

Georgia School Performance Standards

Job-embedded professional learning – This type of professional learning for teachers, leaders, and support staff learning is fundamental to day-to-day teaching practices and is designed to increase student achievement. This professional learning is primarily based at the school or classroom and occurs during the workday, consisting of teachers studying real problems and developing solutions as part of a cycle of continuous improvement.

Leadership Guide – The Leadership Guide to the Georgia School Performance Standards provides best practices to support the work of leadership teams as they define and implement the Georgia School Performance Standards. The Leadership Guide to the Georgia School Performance Standards is a companion resource to the Georgia School Performance Standards and is aligned to the GaDOE Teacher Keys and Leader Keys.

Learning walks or focus walks – Classroom visits are conducted by school or teacher leaders using a set protocol and are usually short in duration and designed to take a snapshot of a small number of practices to increase student achievement, monitor initiatives or apply professional learning, and encourage reflective practice.

Learning targets – A strategy used by teachers to clearly convey to students the destination or objectives for the lesson—what to learn, how deeply to learn it, and how to demonstrate their new learning.

Leader Keys Effectiveness System (LKES) – A common effectiveness system that will allow the state to ensure consistency and comparability across districts, based on a common definition of leader effectiveness. The *LKES* consists of three components that contribute to an overall Leader Effectiveness Measure (LEM): Leader Assessment on Performance Standards (LAPS), Governance and Leadership, and Student Growth and Academic Achievement.

Mission – The mission conveys an explicit message of the purpose of the school (or district) for all of its stakeholders and community. The mission communicates the academic direction of the school and the responsibility of the school to its students. The mission is understood, believed in, and practiced by school staff and students on a daily basis.

Model classrooms – School leaders and teachers design and set up classrooms to showcase specific, research-based instructional practices for teachers to observe and study.

Online reporting system – The school utilizes an electronic system that connects parents to the school's student information system and through which parents can view their children's attendance and academic records in real time.

Richard Woods, Georgia's School Superintendent
"Educating Georgia's Future"

Georgia School Performance Standards

Perception data – This type of school or district data often results from opinion surveys or the brainstorming activities of parents, staff, students, or other stakeholders.

Personal growth – The growth of students is related to the development of their learning, maturity, motivation, self-control, independence, perspective, and empathy. School staff may enhance the personal growth of students by providing support structures, such as counseling, mentoring, advisement, coaching, planning, goal-setting, time management, and problem-solving.

Performance tasks – Teachers use learning activities to engage students to apply advanced skills and knowledge to perform real-world investigations and problem solving. Performance tasks usually provide reliable evidence of student learning.

Process data – This type of data is collected on an ongoing basis regarding the implementation of initiatives or professional learning.
Professional learning designs – The school staff uses specific strategies for professional learning that are selected for intended goals. Professional learning designs include, but are not limited to, action research, lesson study, examination of student work, journaling, case discussions, peer observations, book studies, data analysis, study groups, and curriculum design. Some designs are used with individuals, small teams, and school-wide groups. Some designs may occur during the workday, after school, in the evenings, during the summer, and in online settings. While multiple designs exist, many have common features, such as active engagement, modeling, reflection, meta-cognition, application, feedback, ongoing support, and formative and summative assessment that support change in knowledge, skills, dispositions, and practice.

Reciprocal teaching – This instructional strategy allows students to become the teacher in small group reading sessions. Teachers model, and then help students learn to guide group discussions using four strategies: summarizing, question generating, clarifying, and predicting. Once students have learned the strategies, they take turns assuming the role of the teacher in leading a dialogue about what has been read.

Required curriculum or standards – This term is used throughout the *School Performance Standards* to mean the required content for a course and encompasses the state standards and some national standards, such as standards for Advanced Placement classes or international standards, such as those for the International Baccalaureate Program.

Research-based instructional practices – These teaching, learning, or assessment strategies and practices have been proven by reliable educational research to make a statistically significant difference in overall and disaggregated student achievement results. Such

Richard Woods, Georgia's School Superintendent
"Educating Georgia's Future"

Georgia School Performance Standards

practices can include, but are not limited to, pointing out similarities and differences, summarizing, note-taking, providing feedback, using questioning techniques, and using advance organizers.

Rigor – Learning experiences are considered to be rigorous when they challenge learners to demonstrate a greater depth of understanding, including such cognitive processes as explanation, interpretation, application, analysis of perspectives, empathy, and self-knowledge.

School leadership team – This representative team of teachers, support staff, and administrators is facilitated by the principal and works collaboratively to advance student learning. The team also works to develop, revise, implement, and monitor the school improvement plan. Team members consistently use consensus-driven protocols to maximize decision making and problem solving to enhance student performance and staff effectiveness.

Sense of community – A class or school develops a sense of community when students and staff develop a feeling of belonging and a feeling that needs of members matter to one another and to the group.

Summative assessment – Formal assessments are administered to evaluate the extent to which the student has mastered the required curriculum and related learning goals. Examples include, but are not limited to, unit tests, end-of-course tests, state assessments, and final exams. Traditionally, summative assessments factor heavily into a student's final average for grade reporting purposes.

Teacher Keys Effectiveness System (TKES) – An evaluation system that allows the state to ensure consistency and comparability across districts, based on a common definition of teacher effectiveness. *TKES* consists of multiple components which contribute to an overall Teacher Effectiveness Measure (TEM). These components include Teacher Assessment on Performance Standards (TAPS), Surveys of Instructional Practice, and Student Growth and Academic Achievement.

Transition coaching – Support is provided by designated school staff to incoming students to facilitate their transition usually from middle school to high school and from high school to college and careers.

Universal Design for Learning (UDL) – This educational framework is based on research in the learning sciences, including cognitive neuroscience, which guides the development of flexible learning environments that can accommodate individual learning difference. UDL calls for creating curriculum from the outset that provides:

- Multiple means of representation to give learners various ways of acquiring information and knowledge
- Multiple means of action and expression to provide learners alternatives for demonstrating what they know

Georgia School Performance Standards

- Multiple means of engagement to tap into learners' interests, challenge them appropriately, and motivate them to learn
