

Understanding Financial Efficiency

The Financial Efficiency Star Rating provides a comparison of per-student spending and overall student performance on a 0.5 to 5-star scale. A five-star rating represents strong student outcomes with lower levels of expenditures (proportionate to district size) in comparison with other districts. The star rating is an informational tool for school and district leaders, parents, and community stakeholders to use in conjunction with other information as they work towards improved student opportunities and outcomes.

Key Terms for Financial Efficiency

FAQs about Financial Efficiency

When will the Financial Efficiency Star Ratings display on the CCRPI reports?
FESR will display in March.

Does the Financial Efficiency Star Rating “count”?
Financial Efficiency Star Rating is for information purposes only. The rating carries no points towards the CCRPI score.

How can I see the Financial Efficiency Star Rating for a state charter school?
Although state charter schools comprise their own districts (LEAs), they do not receive a district-level FESR and are included only in the school-level calculations. To see the ratings, select the school level charter school report.
