New for 2016

The Post-Data must follow the requirements below.

Click the “Upload Data File” button before clicking “Save All”, or the data file will not be included with the post-data submission.

Must Includes a file name.
Principals: Post-Data Collection Application

Enter the Post-Data Description

• Describe the data being submitted – it should align with the pre-data submitted
• Clearly label charts and graphs
• Innovative Practice
  • Georgia Milestones data may be submitted
  • It has come to our attention that in light of SB364, some districts did not upload SLO post-data in Student Record, which closed June 15. Therefore, new guidance for post-data collection for schools that used SLO pre-data for innovative practice is forthcoming. We are working with the TLE team to provide guidance that will ensure that all schools that used SLOs for innovative practice will have the opportunity for application review.
    • If using charts and tables, include the following information: year, grade level, subject, other relevant information necessary to interpret the chart and/or table
    • Data submitted must be prior year and current year data OR pre and post data from within the current school year.
    • Submit school level reports relevant to the instructional practice and target population
• Personalized Climate
  • Include post-data for demonstrating growth to meet the stated goal (format of post-data must match format of pre-data)
  • If using charts and tables, refer to User Guide for Key Information which must be included
  • Submit school level reports relevant to the personalized climate and the school population, not district level reports
• Post-Data: General Guidelines
  • The data file size limit is 2 MB & there is a one file limit on post-data submitted
  • Do not include student names or other student identifiers
  • Do not submit district level data reports
