Remote Testing and Web Meeting Questions

Question: Why are remote testing sessions limited to five students?

Answer: Remote testing requires the Test Administrator to manage a web meeting with multiple students, which involves validating credentials and close monitoring all of students in the web meeting. Currently, the number of simultaneous testers is limited to ten to twelve students to keep web sessions manageable and more secure.

Question: Does DRC provide web conference services?

Answer: DRC does not provide web conference services. You need to use a third-party vendor web conferencing solution. Note: Most free or trial versions of web conference services do not provide sufficient functionality to meet remote test administration recommendations.

Question: How long are the recordings of remote test sessions retained, and what is recorded?

Answer: DRC does not provide, retain, or have access to recordings of remote testing session. Recordings are generally stored by the web conferencing service and are used to review testing sessions if any issues or test irregularities are reported locally. What is available for recording, including options and retention policies, varies by web conference service. Your web conference vendor should be able to provide clarification. If there are no issues during the assessment, recording can be deleted.

Question: What do I do if a student is dropped out of a web meeting?

Answer: During web meetings, students may encounter technical or Internet problems caused by bandwidth issues in their local environment or by their connection to the Internet. These issues are beyond DRC’s control. If the student experiences short, intermittent problems, you can choose whether or not to allow them to rejoin the web meeting in progress. Students can usually rejoin by clicking the link again. If connection problems are significant or disruptive to the flow of your meeting, you should reschedule them for a later time. If you choose to reschedule a student, you may want to invalidate their test and create a new test session for them.

Question: What do I do if a student is disruptive during the web meeting?

Answer: Most video conference services have functionality to remove a participant. Follow the instructions for your service to remove the participant. If the student already started the test, you may want to invalidate their test.

Question: How do I stop a test while the student is testing?

Answer: It is possible to “kick a student out of a test” by logging in to the same test, with the student’s login credentials, while the student is still in the test. If you do interrupt a student’s test, make sure to invalidate the test results.

Question: How can I tell if the student is using a cell phone during the test?

Answer: Preview each student’s environment at the onset of the web meeting and monitor them for any suspicious behavior, such as looking down or away from the camera during testing. Instruct the students to turn their phones off and place them out of reach prior to testing.

Question: With audio and video on, how do you minimize test disruption if a tester has a question or if you need to interact with a tester regarding a potential security infraction?

Answer: You should use a web conference service that allows the web host to control audio during a web meeting. Student audio should be muted. At the beginning of the web meeting, instruct the attendees on how
to get your attention via private chat (or by “raising their hand” if the software allows this). Use the breakout rooms if you need to interact with the student privately.

**Question: Instead of Zoom, can we use Google Hangouts or Microsoft Teams?**

**Answer:** Sites can use whatever web conference service they choose, as long as the functionality meets the guidelines for remote testing.

**Question: How do we prevent students from letting someone else take the test for them?**

**Answer:** To ensure that the student is not letting someone else take their test, Test Administrators should validate the identity of students entering the web meeting for testing. Test Administrators should also be documenting the time that the test was taken to ensure that the test was completed during the web meeting.

For the Public Browser only option, where the student is taking the test in an unsupervised setting, we cannot guarantee that the student is taking their own test. However, it does not benefit students to have someone perform better on the assessment than the student would themselves, as it would just place them in a level of operational test that may be too difficult for them. Suspicious results should be questioned.

Sites should be aware of this limitation in the Public Browser-only option and may choose to administer all remote tests using the remote test administration option.

**Question: How long are the recordings of remote test sessions retained, and what is recorded?**

**Answer:** DRC does not provide, retain, or have access to recordings of remote testing session. Recordings are generally stored by the web conferencing service and are used to review testing sessions if any issues or test irregularities are reported locally. What is available for recording, including options and retention policies, varies by web conference service. Your web conference vendor should be able to provide clarification. If there are no issues during the assessment, the recordings can be deleted.

### Test Administration Questions

**Question: Some assessments may be timed. If mine is one of those, is there any way to disable the timer?**

**Answer:** To disable the timer, the student needs to be given an accommodation for an “untimed test.” Confirm with your State or Program director whether this is allowed, as some programs have specific rules or guidelines regarding accommodations. Adding the “untimed test” accommodation needs to be done for each student individually. There is no way to disable the timer globally or by test session.

**Question: Is there a difference in security and reliability if the students take the assessment with the Public Browser rather than the DRC INSIGHT Secure Application?**

**Answer:** There is no difference in security and reliability as long as the testing protocols provided are followed. Based on student ease of use, the Public Browser is highly recommended for this assessment over utilizing the DRC INSIGHT Secure Application for remote testing at this time.

**Question: Will the Public Browser block off other screens or content during the testing so students cannot access anything else during the test?**

**Answer:** No. Only the DRC INSIGHT Secure Application provide a secure situation where the student is unable to leave the test to go to other web pages nor access any other documents or application while testing. When using Google Chrome public browser, it does not put the assessment in kiosk (secure) mode, so students are not prevented from toggling between the test and other materials on their device and/or the Internet. For the accuracy and integrity of the assessment results, it is important for students to stay within the test session and
for the Test Administrator as well as the parent or guardian to monitor that students interact with only the test session throughout the assessment.

**Question:** What will be the next steps in a situation in which a student's test is invalidated because they received support from a parent or other person to respond to a question or they used their phones or opened another screen on their device? Is there a second test version that can be administered (to avoid student taking the same version again)?

**Answer:** DRC's recommendation is that you suspend testing for that student. Then work with your Test Coordinators and/or teacher to determine if the assessment should be invalidated, whether there are options for other assessment forms and/or whether there should be an attempt to test the student again when they can return to an onsite test setting.

### Technical Questions

**Question:** What are the System Requirements for testing devices used by the students?

**Answer:** Full System Requirements are available in the DRC INSIGHT Portal. Go to My Applications > General Information > Downloads and click on the View System Requirements button at the bottom of the page. Requirements for testing devices can be found in the section DRC INSIGHT Testing Device Requirements and in the Important Notes which follow.

A high-level set of system requirements are provided in the Parent/Guardian Guide to Remote Testing document.

If the student is having trouble accessing the test or staying connected, make sure they are using a currently supported device and operating system and that they have sufficient memory, hard drive space, and bandwidth for testing. A good way to check this is to have them go through the Online Tools Training prior to testing.

DRC is not able to provide support directly to students, but we may be able to assist you with basic issues.

**Question:** If I have trouble with, or questions about, my web meeting or video conference software, what do I do?

**Answer:** DRC is not able to provide support for web conference software. Reach out to your vendor for support.

**Question:** Will remote testing work with the iOS/iPadOS platform?

**Answer:** Certain iOS/iPadOS devices are supported; however, for the Test Administrator to best view the student during the test, tablets (including iPads) should have a keyboard so the tablet’s camera can be positioned on the student.

Note: Smartphones and mobile devices are not allowed as test devices as their screen size does not meet the 9.5” or larger screen requirement.

**Question:** Does remote testing require any special software?

**Answer:** When accessed by the remote testing link, students will need to have the Google Chrome browser (or Safari with the iPad). No other special software is required. If the Google Chrome browser is not installed, follow the step-by-step instructions for downloading and installing the current version of the Chrome browser at www.google.com/chrome. The Chrome browser is free and should be the default browser used on the testing device. Students are taken directly to the test from the provided link.

A small software application may be required for your web meeting software. If the student does not have the meeting application already installed, they will usually be prompted to download and launch the meeting software.
Question: If a student is dropped from a test due to connectivity issues, do they have to complete the test the same day or can they resume the test the following day?

Answer: Incomplete tests are processed and scored overnight. If the student does not continue the test the same day, the Test Administrator must unlock the test on the day the student is ready to continue testing.

Question: Can remote testing be done on a Mac not using Chrome?

Answer: Remote testing requires the Google Chrome browser, which can be installed on a Mac.

Question: Are students required to have a webcam?

Answer: A webcam is required for the test administration of a remote assessment.

Question: Does remote testing require the student to have two devices: a device for the web conference and a device for test access?

Answer: No, the web conference and testing occur on the same device.

Question: Why can’t students use their smartphones or cell phones for remote testing?

Answer: Assessments are designed for a minimum screen size of 9.5” and a minimum resolution of 1024 x 768 pixels. Smartphones and cell phones do not meet this requirement.

If you have additional questions about Remote Testing, please contact DRC Customer Service.

The following pages are the Frequently asked Questions that have been shared with Parents/Guardians.
Testing Device Questions

Question: What are the System Requirements for testing devices used by my child?

Answer: A high-level set of system requirement are provided in the Parent/Guardian Guide to Remote Testing document. If you have questions about them, contact your child’s teacher, the school’s technology staff, and/or the school office for technical support.

Question: What should I do if I don’t have a testing device that meets the system requirements and/or our Internet service does not meet the reliability or bandwidth requirements?

Answer: You should contact your child’s teacher to see what options the school or District have for your child. Oftentimes they may have options available to address this issue.

Question: What type of device does my child need for this assessment?

Answer: Windows, Mac, iPad, or Chromebook devices can be used for this assessment. DRC recommends that iPads and any other tablet have a keyboard for this assessment.

Question: Why does an iPad need a keyboard?

Answer: For the Test Administrator to best view of your child during the assessment, an iPad with a keyboard is recommended so the iPad’s camera can be better positioned on your child.

Technical Questions

Question: What do I do if my child receives the message “Connection Retry is in Progress”?

Answer: This message means the testing device has lost its network connection. That could be due to the issues with the Wi-Fi or with the Internet connection.

For the next five minutes, while this message is displayed, DRC INSIGHT will attempt to successfully reconnect to the network. During this time, if a connection is re-established, the message will close and your child can continue the assessment. If a connection is not re-established during this time, the message will close and a Connection Error message will be displayed. At any time during the five-minute interval, your child can click Exit the Test to temporarily end the assessment session.

Note that loss of a network connection also impacts your child’s connection to the web meeting. There will not be the ability to chat or connect with the Test Administrator in the web meeting until the connection is restored.

What Should I Do?

- If the message disappears and your child returns to the assessment, you do not need to do anything—your child can resume the assessment. You may want to confirm that your child has also returned to the web meeting.
- If the message disappears and the Connection Error message is displayed, your child will need to discontinue the assessment session by clicking Ok to exit DRC INSIGHT. You should contact your child’s teacher, the school’s technology staff, and/or the school office for technical support. Your child can resume the assessment once the issue is resolved.
- If your child clicks Exit the Test while the Connection Retry is in Process message is displayed, the assessment ends and your child must re-enter the assessment.
If your child is having trouble staying connected, make sure they are using a currently supported device and operating system, and that they have sufficient memory, hard drive space and bandwidth for testing.

If you are comfortable with the process, you can also try to power off and restart your home’s network device. Sometimes refreshing the connection to the Internet will help resolve the issue.

Note that in all situations, all of your child’s assessment information has been recorded and saved. Once your child is able to return to the assessment, they can reenter their username and password and resume the assessment at the question they were on when the issue occurred.

**Question:** What do I do if my child’s assessment is interrupted?

**Answer:** If your child is having trouble accessing the assessment or staying connected, make sure they are using a currently supported device and operating system, and that they have sufficient memory, hard drive space, and bandwidth for testing. Once your child is able to return to the assessment, they can reenter their username and password and resume the assessment at the question they were on when the issue occurred.

**Question:** If my child’s assessment is interrupted, are all the responses for questions they have completed lost and do they need to start the assessment over from the beginning?

**Answer:** If there is any type of interruption during the assessment, all your child’s work and prior responses up to that point have been recorded and saved. Once your child is able to return to the assessment, your child can reenter their username and password and resume the assessment at the question they were on when the issue occurred.

**Question:** If my child is having technical issues, who can I contact for support?

**Answer:** If technical issues arise and/or an error message displays during the assessment, contact your child’s teacher, the school’s technology staff and/or the school office for technical support. If additional support is required, a school or district representative will reach out to DRC to determine a resolution. Do not attempt to contact DRC customer service directly for support. Any issue related to your home’s technology configurations must first be relayed to your child’s school and they will contact DRC if necessary.

**Question:** My child received an error message with a Customer Service number on it. Can I call that number for help?

**Answer:** Do not attempt to contact DRC customer service directly for support. Any issue related to your child’s assessment must first be relayed to your child’s school and they will contact DRC if necessary.

**Question:** Can my child use a browser other than the Google Chrome browser to take this assessment?

**Answer:** If your child is using an iPad, they can use Safari. On all other supported devices, your child needs to use the Google Chrome browser. The test software may not function properly using any other Internet browser. If the Google Chrome browser is not installed, follow the step-by-step instructions for downloading and installing the current version of the Chrome browser at [www.google.com/chrome](http://www.google.com/chrome). The Chrome browser is free and should be the default browser on the testing device.

**Web Conferencing Questions**

**Question:** Will there be training for my child before the assessment is delivered?

**Answer:** Your child’s teacher will schedule a practice session where they will walk through the web meeting process and allow your child time to use the system’s “Online Tools Training” feature. Here, your child will have time to work with sample assessment questions to become familiar with the type of questions they will see
during the assessment. They can also become familiar with the testing interface and all the testing tools that will be available to them during the assessment.

**Question: Why is a webcam and microphone necessary?**

**Answer:** The webcam and microphone allow the Test Administrator to monitor and support your child during the assessment much the same as they would do if your child was taking the assessment in their classroom.

**Question: Do I have to be present while my child is taking the assessment?**

**Answer:** Yes. You are an extra set of eyes and ears for the Test Administrator during the assessment. All parents or guardians are asked to:

- Encourage your child to try their best and to approach the assessment in a positive manner.
- Make sure your child has an adequate testing device and peripherals to take the assessment.
- Do their best to find a room for your child to test in that is quiet, private, and well-lit.
- Turn off any music, TV, or other background noise.
- Only help your child if there are difficulties with the testing device, issues logging into the web conference, and/or issues logging into the assessment.
- Not help your child with any questions on the assessment.
- Not read the assessment questions or answers to my child.
- Ensure your child stays in the testing interface and does not use other tools, devices or applications outside of the testing interface during the assessment.
- Emphasize that the security of the assessment questions must be maintained at all times. None of the materials from the online test may be copied, photographed, or recorded in any manner.

**Question: What type of headset and microphone will my child need for testing?**

**Answer:** The following are guidelines for audio and microphones to help maximize the potential for testing success:

- Make sure the browser has the proper permissions enabled to access the microphone.
- Make sure your audio is not muted and the volume is turned up.
- The following chart provides headset and microphone recommendations:

<table>
<thead>
<tr>
<th>Configuration</th>
<th>Suitability</th>
<th>Pros and Cons</th>
</tr>
</thead>
<tbody>
<tr>
<td>Over the ear headset with microphone</td>
<td>Ideal</td>
<td>Comfortable when worn for a longer time period by students of different ages. Weight and size of headphones can be selected based on students’ age. Portable headphones are smaller and lighter and hence may be suitable for younger students. Deluxe headphones are larger and heavier but have the advantage of canceling out more noise.</td>
</tr>
<tr>
<td>Noise Canceling headphones</td>
<td>Not Applicable</td>
<td>Noise cancellation often does not cancel out the sound of human voices, so this feature provides little benefit. Most of these devices do not have an integrated microphone so they can not be used for speaking without providing a second device to capture student’s audio responses while in the web meeting. Many headsets with a noise cancellation feature require a power source (e.g., batteries or USB connection).</td>
</tr>
<tr>
<td>Ear buds or ear headphones with microphone</td>
<td>Acceptable</td>
<td>Sound volume can vary based on the positioning of the buds in the ear, resulting in inconsistent audio playback. Many ear buds come with the microphone attached to the cord, making capturing the students’ voice more of a challenge.</td>
</tr>
</tbody>
</table>
Testing Device Questions

**Question: What are the System Requirements for testing devices used by my child?**

**Answer:** A high-level set of system requirement are provided in the Parent/Guardian Guide to Remote Testing document. If you have questions about them, contact your child’s teacher, the school’s technology staff and/or the school office for technical support.

**Question:** What should I do if I don’t have a testing device that meetings the system requirements and/or our Internet service does not meet the reliability or bandwidth requirements?

**Answer:** You should contact your child’s teacher to see what options the school or district have for your child. Many times they may have options available to address this issue for families in your situation.

**Question: What type of device does my child need for this assessment?**

**Answer:** Windows, MAC, iPad, or Chromebook devices can be used for this assessment. DRC recommends that iPads and other tablets have a keyboard for this assessment.

**Question: Why does an iPad need a keyboard?**

**Answer:** For the Test Administrator to best view of your child during the assessment, an iPad with a keyboard is recommended so that the iPad’s camera can be better positioned on your child.

Technical Questions

**Question: What do I do if my child receives the message with the title “Connection Retry is in Process”?**

**Answer:** This message means the testing device has lost its network connection. That could be due to the issues with the Wi-Fi or with the Internet connection.

For the next five minutes, while this message is displayed, DRC INSIGHT will attempt to successfully reconnects to the network. During this time, if a connection is re-established, the message will close and your child can continue the assessment. If a connection is not re-established during this time, the message will close and a Connection Error message will be displayed. At any time during the five-minute interval, your child can click Exit the Test to temporarily end the assessment session.

Note that loss of a network connection also impacts your child’s connection to the web meeting. There will not be the ability to chat or connect with the Test Administrator in the web meeting until the connection is restored.

**What Should I Do?**

- If the message disappears and your child returns to the assessment, you do not need to do anything—your child can resume the assessment. You may want to confirm that your child has also returned to the web meeting.
- If the message disappears and the Connection Error message is displayed, your child will need to discontinue the assessment session by clicking Ok to exit DRC INSIGHT. You should contact your child’s teacher.
