**Georgia Alternate Assessment 2.0 - Spring 2021 Results**

**Note:** 2020-2021 results should be considered in the context of this year's pandemic-related learning disruptions, particularly when making longitudinal comparisons. See further information below on the percent of enrolled Georgia students with the most significant cognitive disabilities assessed on the GAA 2.0, and visit the [2020-2021 Georgia assessment results page](https://www.gadoe.org) for more information on interpreting the 2020-2021 results of Georgia assessments.

**11,217 STUDENTS** **1,514 SCHOOLS** **195 DISTRICTS**
Defining: Achievement Levels

The Georgia Alternate Assessment 2.0 has four achievement levels developed and defined by Georgia educators, to describe the knowledge and skills students have demonstrated, as measured by the Extended Content Standards, Georgia’s alternate academic content standards. More information on the GAA 2.0 Achievement Level Descriptors for each grade and content area is available here.

GAA 2.0 POLICY ALDS

Level 1:
Students at this level demonstrate a limited understanding of the knowledge and skills specified in Georgia’s alternate academic content standards. They are actively working with adapted grade-level content that focuses on essential knowledge and skills and may need substantial academic support as they transition to the next grade/course, inclusive postsecondary education, or competitive integrated employment.

Level 2:
Students at this level demonstrate a partial understanding of the knowledge and skills specified in Georgia’s alternate academic content standards. They are actively working with adapted grade-level content that focuses on essential knowledge and skills and may need frequent academic support as they transition to the next grade/course, inclusive postsecondary education, or competitive integrated employment.

Level 3:
Students at this level demonstrate an adequate understanding of the knowledge and skills specified in Georgia’s alternate academic content standards. They are actively working with adapted grade-level content that focuses on essential knowledge and skills and may need occasional academic support as they transition to the next grade/course, inclusive postsecondary education, or competitive integrated employment.

Level 4:
Students at this level demonstrate a thorough understanding of the knowledge and skills specified in Georgia’s alternate academic content standards. They are actively working with adapted grade-level content that focuses on essential knowledge and skills and may need limited academic support as they transition to the next grade/course, inclusive postsecondary education, or competitive integrated employment.

*Note: Science is assessed in grades 5, 8, and high school. Social Studies is assessed in grades 8 and high school. GAA 2.0 scores are reported on a scale from 1000 to 1800 and are appropriate for comparisons across years and across students, but not across grades or content areas. For more information on GAA 2.0 scores, see the Score Interpretation Guide, or visit testing.gadoe.org.*

*This column indicates the percent of enrolled students tested and is reported in conjunction with summary scores to support appropriate interpretation and generalization. See further information below.*

### Spotlight on: Using GAA 2.0 Scores from 2020-2021

In 2020-2021, GAA 2.0 summary results are reported with the percent of enrolled students tested (see results above). Districts and schools with a low percentage of enrolled students tested should likewise interpret summary scores with additional caution as these summary scores may not well-represent the larger population of the school or district. The achievement history of the tested students was analyzed to identify, if present, any differences indicating that the students who did test this year may not be representative of the total population. Results of this analysis indicated that while the percent of enrolled students tested this year was lower than typical years, the students who completed the GAA 2.0 tests in 2021 are meaningfully representative of the full enrolled population based on their prior achievement. This research validates the use and interpretation of achievement summaries from this year, with the caution outlined below.

Summaries of GAA 2.0 scores should be interpreted as one measure of mastery of the knowledge and skills outlined in the state's alternate academic content standards. These scores should not be used as a part of a longitudinal trend analysis without including context of this year’s pandemic and associated learning disruptions.

Overall, these results meet the rigorous reliability standards of the GAA 2.0 assessment program and are valid when interpreted in context: as one measure of a student's achievement towards mastery of the state’s alternate academic content standards in the face of unprecedented challenges.
Defining: Extended Content Standards

The knowledge and skills measured in the GAA 2.0 are aligned to Georgia’s alternate academic content standards, the Extended Content Standards. The Extended Content Standards identify skills that connect to the grade-level content standards, allowing students to show learning of concepts at reduced levels of complexity.

More information on Georgia’s alternate academic content standards is available [here](#).
KEY TERMS

**Achievement Level**: An achievement level is a range of scores that defines a specific level of student performance. Achievement levels give meaning and context to scale scores by describing the knowledge and skills students must demonstrate to achieve each level.

**Achievement Level Descriptors (ALDs)**: ALDs are descriptions of the knowledge and skills expected at each of the four achievement levels for each grade level and content area.

**Extended Content Standards**: The Extended Content Standards identify skills that connect to the grade-level content standards and allow students to show learning of concepts at different levels.

**Scale Score**: A scale score is a representation of the total number of points a student earned, converted into a format which can be clearly interpreted and compared across years.

**Standard Deviation (SD)**: The standard deviation indicates how spread out the group scores are around the mean (average). A higher standard deviation indicates many scores in the group are far from the mean. A lower standard deviation indicates many scores in the group are close to the mean.
