APPENDIX: LANGUAGE PROGRESSIVE SKILLS, BY GRADE .................................... 114
THE GEORGIA MILESTONES ASSESSMENT SYSTEM

The purpose of the Georgia Student Assessment Program is to measure student achievement of the state-adopted content standards and inform efforts to improve teaching and learning. Results of the assessment program are utilized to identify students failing to achieve mastery of content, to provide educators with feedback about instructional practice, and to assist school districts in identifying strengths and weaknesses in order to establish priorities in planning educational programs.

The State Board of Education is required by Georgia law (O.C.G.A. §20-2-281) to adopt assessments designed to measure student achievement relative to the knowledge and skills set forth in the state-adopted content standards. The Georgia Milestones Assessment System (Georgia Milestones) fulfills this requirement and, as a key component of Georgia’s Student Assessment Program, is a comprehensive summative assessment program spanning grade 3 through high school. Georgia Milestones measures how well students have learned the knowledge and skills outlined in the state-adopted content standards in Language Arts, Mathematics, Science, and Social Studies. Students in grades 3 through 8 take an end-of-grade assessment in English Language Arts and Mathematics; additionally, students in grades 5 and 8 are assessed in Science; and students in grade 8 are assessed in Social Studies. High school students take an end-of-course assessment for each of the five courses designated by the State Board of Education. In accordance with State Board Rule, Georgia Milestones end-of-course measures serve as the final exams for the specified high school courses.

The main purpose of Georgia Milestones is to inform efforts to improve student achievement by assessing student performance on the standards specific to each course or subject/grade tested. Specifically, Georgia Milestones is designed to provide students and their parents with critical information about the students’ achievement and, importantly, their preparedness for the next educational level. The assessment system is a critical informant of the state’s accountability measure, the College and Career Ready Performance Index (CCRPI), providing an important gauge about the quality of the educational services and opportunities provided throughout the state. The ultimate goal of Georgia’s assessment and accountability system is to ensure that all students are provided the opportunity to engage with high-quality content standards, receive high-quality instruction predicated upon those standards, and are positioned to meet high academic expectations.

Features of the Georgia Milestones Assessment System include:

- technology-enhanced items in all grades and courses;
- open-ended (constructed-response) items in English Language Arts (all grades and courses);
- a writing component (in response to passages read by students) at every grade level and course within the English Language Arts assessment; and
- online administration as the primary mode of administration.
The mode of administration for the Georgia Milestones program is online. Paper/pencil test materials, such as Braille forms, will be available for the small number of students who cannot interact with the computer due to their disability as documented in an IEP, IAP/504, or EL-TPC Plan.

Georgia Milestones follows guiding principles to help ensure that the assessment system:

- is sufficiently challenging to ensure Georgia students are well positioned to compete with other students across the United States and internationally;
- is intentionally designed across grade levels to send a clear signal of student academic progress and preparedness for the next level, whether it is the next grade level, course, or college or career;
- is accessible to all students, including those with disabilities or limited English proficiency, at all achievement levels;
- supports and informs the state’s educator-effectiveness initiatives, ensuring items and forms are appropriately sensitive to quality instructional practices; and
- includes innovative technology-enhanced items.

GEORGIA MILESTONES END-OF-GRADE (EOG) ASSESSMENTS

As previously mentioned, Georgia law (§20-2-281) mandates that the State Board of Education adopt annual measures of student achievement in the content areas of English Language Arts (ELA) and Mathematics in grades 3–8, Science in grade 5 and 8, and Social Studies in grade 8. Students must participate in the Georgia Milestones content areas measured at the end of each grade in which they are enrolled. State law further mandates that student achievement in reading, as measured as a component of the Georgia Milestones English Language Arts (ELA) EOG assessment, be utilized in promotion and retention decisions for students in grades 3, 5, and 8, while student achievement in mathematics, as measured by the Georgia Milestones Mathematics EOG assessment, be considered in grades 5 and 8. Students who fail to demonstrate grade-level achievement on these measures must receive remediation and be offered an opportunity for a retest prior to consideration for promotion to grades 4, 6, and 9 (§20-2-283 and State Board of Education Rule 160-4-2-.11).

Results of the EOG assessments, according to the legislated and identified purposes, must:

- provide a valid measure of student achievement of the state content standards across the full achievement continuum;
- provide a clear signal of each student’s preparedness for the next educational level (i.e., grade);
- allow for the detection of the academic progress made by each student from one assessed grade to the next;
- be suitable for use in promotion and retention decisions at grades 3 (reading), 5 (reading and mathematics), and 8 (reading and mathematics);
- support and inform educator-effectiveness measures; and
- inform state and federal accountability measures at the school, district, and state levels.
ASSESSMENT GUIDE

The Georgia Milestones Grade 3 EOG Assessment Guide is provided to acquaint Georgia educators and other stakeholders with the structure and content assessed by the tests. Importantly, this guide is not intended to inform instructional planning. It is essential to note that there are a small number of content standards that are better suited for classroom or individual assessment rather than large-scale summative assessment. While those standards are not included on the tests, and therefore are not included in this Assessment Guide, the knowledge, concepts, and skills inherent in those standards are often required for the mastery of the standards that are assessed. Failure to attend to all content standards within a content area can limit a student’s opportunity to learn and show what he or she knows and can do on the assessments.

The Georgia Milestones Grade 3 EOG Assessment Guide is in no way intended to substitute for the state-mandated content standards; it is provided to help educators better understand the structure and content of the assessments, but is not all-encompassing of the knowledge, concepts, and skills covered in Grade 3 or assessed on the tests. The state-adopted content standards and associated standards-based instructional resources, such as the Content Frameworks, should be used to plan instruction. This Assessment Guide can serve as a supplement to those resources, in addition to any locally developed resources, but should not be used in isolation. In principle, this Assessment Guide is intended to be descriptive of the assessment program and should not be considered all-inclusive. The state-adopted content standards are located at www.georgiastandards.org.
TESTING SCHEDULE

The Georgia Milestones Grade 3 EOG assessment is offered during the Main Administration each spring and one Summer Administration for retests.

Students will take the Georgia Milestones Grade 3 EOG assessment on days specified by their local school district during the testing window. Each district determines a local testing window within the state-designated testing window.
DEPTH OF KNOWLEDGE DESCRIPTORS

Items found on the Georgia Milestones assessments, including the Grade 3 EOG assessment, are developed with a particular emphasis on cognitive complexity, or Depth of Knowledge (DOK). DOK is measured on a scale of 1 to 4 and refers to the level of cognitive demand required to complete a task (or in this case, an assessment item). The higher the level, the more complex the assessment; however, higher levels do not necessarily mean more difficult items. For instance, a question can have a low DOK but a medium or even high difficulty level. Conversely, a DOK 4 question may have a low difficulty level but still require a great deal of cognitive thinking (e.g., analyzing and synthesizing information instead of just recalling it). The following descriptions and table show the expectations of the four DOK levels in greater detail.

**Level 1** (Recall of Information) generally requires students to identify, list, or define, often asking them to recall who, what, when, and where. Consequently, this level usually asks students to recall facts, terms, concepts, and trends and may ask them to identify specific information contained in documents, excerpts, quotations, maps, charts, tables, graphs, or illustrations. Items that require students to “describe” and/or “explain” could be classified at Level 1 or Level 2, depending on what is to be described and/or explained. A Level 1 “describe” and/or “explain” would require students to recall, recite, or reproduce information.

**Level 2** (Basic Reasoning) includes the engagement of some mental processing beyond recalling or reproducing a response. A Level 2 “describe” and/or “explain” would require students to go beyond a description or explanation of recalled information to describe and/or explain a result or “how” or “why.”

**Level 3** (Complex Reasoning) requires reasoning, using evidence, and thinking on a higher and more abstract level than Level 1 and Level 2. Students will go beyond explaining or describing “how and why” to justifying the “how and why” through application and evidence. Level 3 questions often involve making connections across time and place to explain a concept or “big idea.”

**Level 4** (Extended Reasoning) requires the complex reasoning of Level 3 with the addition of planning, investigating, applying significant conceptual understanding, and/or developing that will most likely require an extended period of time. Students should be required to connect and relate ideas and concepts within the content area or among content areas in order to be at this highest level. The distinguishing factor for Level 4 would be evidence (through a task, a product, or an extended response) that the cognitive demands have been met.
# Depth of Knowledge Descriptors

The following table identifies skills that students will need to demonstrate at each DOK level, along with sample question cues appropriate for each level.

<table>
<thead>
<tr>
<th>Level</th>
<th>Skills Demonstrated</th>
<th>Question Cues</th>
</tr>
</thead>
</table>
| **Level 1** Recall of Information | • Make observations  
• Recall information  
• Recognize formulas, properties, patterns, processes  
• Know vocabulary, definitions  
• Know basic concepts  
• Perform one-step processes  
• Translate from one representation to another  
• Identify relationships | • Tell who, what, when, or where  
• Find  
• List  
• Define  
• Identify; label; name  
• Choose; select  
• Compute; estimate  
• Express as  
• Read from data displays  
• Order |
| **Level 2** Basic Reasoning | • Apply learned information to abstract and real-life situations  
• Use methods, concepts, and theories in abstract and real-life situations  
• Perform multi-step processes  
• Solve problems using required skills or knowledge (requires more than habitual response)  
• Make a decision about how to proceed  
• Identify and organize components of a whole  
• Extend patterns  
• Identify/describe cause and effect  
• Make basic inferences or logical predictions from data or text  
• Interpret facts  
• Compare or contrast simple concepts/ideas | • Apply  
• Calculate; solve  
• Complete  
• Describe  
• Explain how; demonstrate  
• Construct data displays  
• Construct; draw  
• Analyze  
• Extend  
• Connect  
• Classify  
• Arrange  
• Compare; contrast

| Level 3       | • Solve an open-ended problem with more than one correct answer  
• Create a pattern  
• Generalize from given facts  
• Relate knowledge from several sources  
• Draw conclusions  
• Translate knowledge into new contexts  
• Compare and discriminate between ideas  
• Assess value of methods, concepts, theories, processes, and formulas  
• Make choices based on a reasoned argument  
• Verify the value of evidence, information, numbers, and data | • Plan; prepare  
• Create; design  
• Ask “what if?” questions  
• Generalize  
• Justify; explain why; support; convince  
• Assess  
• Rank; grade  
• Test; judge  
• Recommend  
• Select  
• Conclude                                                                 |
| Level 4       | • Analyze and synthesize information from multiple sources  
• Examine and explain alternative perspectives across a variety of sources  
• Describe and illustrate how common themes are found across texts from different cultures  
• Apply mathematical models to illuminate a problem or situation  
• Design a mathematical model to inform and solve a practical or abstract situation  
• Combine and synthesize ideas into new concepts | • Design  
• Connect  
• Synthesize  
• Apply concepts  
• Critique  
• Analyze  
• Create  
• Prove                                                                 |
Scores

SCORING

Students will receive a scale score and an Achievement Level designation based on total test performance. In addition, students will receive information on how well they performed at the domain level. For more information on scoring, please see the Georgia Milestones End-of-Grade (EOG) Interpretive Guide for Score Reports. Additional information on the items contributing to these scores is found in the Description of Test Format and Organization sections for English Language Arts (ELA) and Mathematics.

Selected-response items and technology-enhanced items are machine scored. The Mathematics assessment consists of selected-response and technology-enhanced items. However, the English Language Arts (ELA) assessment consists of a variety of item types that contribute to the student’s score, including selected-response, technology-enhanced, constructed-response, extended constructed-response, and extended writing-response. Items that are not machine scored—i.e., constructed-response, extended constructed-response, and extended writing-response items—require rubrics for manual scoring.
ENGLISH LANGUAGE ARTS (ELA)

DESCRIPTION OF TEST FORMAT AND ORGANIZATION

The Georgia Milestones English Language Arts (ELA) EOG assessment is a criterion-referenced test, designed to provide information about how well a student has mastered the grade-level state-adopted content standards in English Language Arts (ELA). The assessment consists of both operational items and field test items (newly written items that are being tried out and do not contribute to the student’s score). Each student will receive one of four Achievement Level designations, depending on how well the student has mastered the content standards. The four Achievement Level designations are Beginning Learner, Developing Learner, Proficient Learner, and Distinguished Learner. In addition to criterion-referenced information, the Georgia Milestones measures will also produce an estimate of how Georgia students are achieving relative to their peers nationally. The norm-referenced information provided is supplementary to the criterion-referenced Achievement Level designation and will not be utilized in any manner other than to serve as a barometer of national comparison. Only the criterion-referenced scores and Achievement Level designations will be utilized in the accountability metrics associated with the assessment program (such as student growth measures, educator-effectiveness measures, or the CCRPI).

The table on the following page outlines the number and types of items included on the Grade 3 English Language Arts EOG assessment.
## Grade 3 English Language Arts (ELA) EOG Assessment Design

</tbody>
</table>

\(^1\) **Technology-Enhanced**: Possible variants of the technology-enhanced item types used for ELA include evidence-based selected-response, drag-and-drop, and drop-down.

\(^2\) **1-point Selected-Response and Technology-Enhanced Items**: The ratio of selected-response to technology-enhanced items may vary. The target range of 1-point technology-enhanced items is 0 to 5.

\(^3\) **Field Test Items**: Field test items may include 1-point selected-response, 1-point technology-enhanced, 2-point evidence-based selected-response, 2-point technology-enhanced, and 4-point extended constructed-response items.

\(^4\) **Total**: Of the total 51 items, 45 contribute to the student’s ELA score.

The test will be given in three sections. Students will be given a maximum of 90 minutes to complete Section 1, which includes the extended writing-response. Students may have up to 80 minutes per section to complete Sections 2 and 3. The total estimated testing time for the Grade 3 English Language Arts (ELA) EOG assessment ranges from approximately 125 to 250 minutes. Total testing time describes the amount of time students have to complete the assessment. It does not take into account the time required for the test examiner to complete pre-administration and post-administration activities (such as reading the standardized directions to students). Section 1, which focuses on writing, must be administered on a separate day. Sections 2 and 3 must be scheduled such that both will be completed in a single day or over the course of two consecutive days (one section each day) and should be completed within the same week following the district’s testing protocols for the EOG measures (in keeping with state guidance).

### CONTENT MEASURED

The Grade 3 English Language Arts (ELA) assessment will measure the Grade 3 standards that are described at [www.georgiastandards.org](http://www.georgiastandards.org).
The content of the assessment is organized into two groupings, or domains, of standards for the purposes of providing feedback on student performance. A content domain is a reporting category that broadly describes and defines the content of the course, as measured by the EOG assessment. The standards for Grade 3 English Language Arts (ELA) are grouped into two domains: Reading and Vocabulary, and Writing and Language. Each domain was created by organizing standards that share similar content characteristics. The content standards describe the level of expertise that Grade 3 English Language Arts (ELA) educators should strive to develop in their students. Educators should refer to the content standards for a full understanding of the knowledge, concepts, and skills that may be assessed on the EOG assessment.

The approximate proportional number of points associated with each domain is shown in the following table. A range of cognitive levels will be represented on the Grade 3 English Language Arts (ELA) EOG assessment. Educators should always use the content standards when planning instruction.

ITEM TYPES

The English Language Arts (ELA) portion of the Grade 3 EOG assessment consists of selected-response, technology-enhanced, constructed-response, extended constructed-response, and extended writing-response items.

A selected-response item, sometimes called a multiple-choice item, is defined as a question, problem, or statement that appears on a test followed by several answer choices, sometimes called options or response choices. The incorrect choices, called distractors, usually reflect common errors. The student’s task is to choose, from the alternatives provided, the best answer to the question posed in the stem (the question). The English Language Arts (ELA) selected-response items will have four answer choices.

A technology-enhanced item is an innovative way to measure student skills and knowledge by using scaffolding within a multi-step process. Technology-enhanced items are worth one or two points. If the item is worth two points, partial credit is awarded for special combinations of responses that do not include all the correct answers. For ELA, there are a number of specific technology-enhanced item types being used:

- In Evidence-Based Selected-Response (EBSR) items, the student responds to a two-part question. In the first part, the student responds to an inferential or key concept question related to a stimulus text. In the second part, the student provides evidence from the same text to support the inference or idea. In both parts of an EBSR item, the student selects the responses from the choices provided. There is one correct answer for each part of an EBSR item. If the student responds correctly to both parts of the EBSR item, the student receives two points. Partial credit may be awarded when a student answers the first part correctly.

- In drag-and-drop items, the student can show language, writing, research, or comprehension skills by organizing or sequencing information into a table or simple graphic. The student uses a mouse, touchpad, or touchscreen to move responses to designated areas on the screen.

- In drop-down menu items, the student reads a stimulus text with two to four drop-down menus embedded in the text. The student uses a mouse, touchpad, or touchscreen to open each drop-down menu and select the correct answer from the drop-down options. Each drop-down menu will include two to four options.

- Since some technology-enhanced items in this guide were designed to be used only in an online, interactive-delivery format, some of the item-level directions will not appear to be applicable when working within the format presented in this document (for example, “Move the descriptions onto the lines of the paragraph” or “Click To Respond”).

- This icon identifies special directions that will help the student answer technology-enhanced items as shown in the format presented within this guide. These directions do not appear in the online version of the test but explain information about how the item works that would be easily identifiable if the student were completing the item in an online environment.

To give students practice using technology-enhanced items in an online environment very similar to how they will appear on the online test, visit “Experience Online Testing Georgia.”

1. Go to the website “Welcome to Experience Online Testing Georgia” (http://gaexperienceonline.com/).
2. Select “Test Practice.”
3. On the right side of the page, you will see “End-of-Grade (EOG) Spring Main.” Select “Online Tools Training” which appears underneath it.
4. Select “EOG Test Practice.”
5. Select “Technology Enhanced Items.”
6. Select “All Grades.”
7. You will be taken to a login screen. Use the username and password provided on the screen to log in and practice navigating technology-enhanced items online.

Please note that Google Chrome is the only supported browser for this public version of the online testing environment.

A constructed-response item asks a question and solicits the student to provide a response he or she constructs on his or her own, as opposed to selecting from options provided. The constructed-response items on the EOG assessment will be worth two points. Partial credit may be awarded if part of the response is appropriate based upon the prompt and the rubric.

An extended constructed-response item is a specific type of constructed-response item that elicits a longer, more detailed response from the student than a two-point constructed-response item. The stimulus used for this type of item may be a literary or informational passage or a paired passage set. A paired passage set may consist of two literary passages, two informational passages, or one of each passage type. The extended constructed-response items on the EOG assessment will be worth four points. For English Language Arts (ELA), the student will respond to a narrative prompt based on a passage the student has read, and the response will be scored for the Writing and Language domain. Partial credit may be awarded if part of the response is appropriate based upon the prompt and the rubric.

The extended writing-response items require students to write an opinion piece or develop an informative/explanatory response. As part of the extended writing task, students must first read two passages and then respond to three multiple-choice items and one constructed-response item. All of these items help students write their extended essay by focusing them on the main idea(s) and key details in the passages. Two of the selected-response items will address each of the passages separately. One selected-response item and the constructed-response item will address both of the passages together. All three selected-response and the constructed-response item contribute to the Reading and Vocabulary domain. These items will be followed by an extended writing-prompt, which requires the student to draw from reading experiences when writing an essay response and to cite evidence from the passage(s) to support claims and conclusions in the essay. The writing task is worth seven points that contribute to the Writing and Language domain.
ENGLISH LANGUAGE ARTS (ELA) DEPTH OF KNOWLEDGE EXAMPLE ITEMS

Example items that represent the applicable DOK levels across various Grade 3 English Language Arts (ELA) content domains are provided.

All example and sample items contained in this guide are the property of the Georgia Department of Education.

Example Items 1 and 2
Read the passage and answer example items 1 and 2.

<table>
<thead>
<tr>
<th>Your Weekly Calendar</th>
</tr>
</thead>
<tbody>
<tr>
<td>Have you ever wondered how some kids remember everything? They always hand in their homework on time. They never forget their gym shoes. Their library books are never late. They are ready for the day, every day!</td>
</tr>
<tr>
<td>Everyone has tasks at home and at school. You may belong to afterschool groups or play sports too. How can you be prepared for the day? A weekly calendar can help you plan for what you need to do each day.</td>
</tr>
<tr>
<td><strong>Stay on Track in School</strong></td>
</tr>
<tr>
<td>Think of all the things you need to remember for a week at school. Think about everything—from gym class to tests. Make a note on your calendar for the days you need gym shoes. Do you have a spelling test each week? If you know the test is coming up, you will remember to study. Then you might get a wonderful score on the test! If homework is due on a certain day, write that down. Perhaps your class has a field trip planned. Be sure to write everything you need to do for the week on your calendar.</td>
</tr>
<tr>
<td><strong>Be Prepared for Activities</strong></td>
</tr>
<tr>
<td>Along with planning for your busy week at school, sit down and think about what you will need for your activities. For example, you might have a piano lesson coming up that you need to practice for. You can write a note to pack clothes for sports practice. You will never show up for soccer without your shoes again! Write down any club meetings you need to attend, as well as anything special you need to bring along.</td>
</tr>
</tbody>
</table>
**Help at Home**

There is usually just as much to do at home as there is at school. You may wish chores were not a part of your week, but doesn’t it feel good to get them done? Nothing is worse than getting called in from outside to clean your bedroom. You can be one step ahead by knowing which chore needs to be done on which day. You can remind yourself to take out the garbage or care for a family pet. You can also add special things like birthdays or family outings.

When you forget the things you need to do, your days can be harder. Why not start with a weekly calendar today? Hang your calendar in a spot where you will see it every day. Check it often to be ready for what is coming up. Ready, set, go!
Example Item 1

Selected-Response: 1 point

DOK Level: 2

English Language Arts (ELA) Grade 3 Content Domain: Reading and Vocabulary

Standard: ELAGSE3RI5. Use text features and search tools (e.g., key words, sidebars, hyperlinks) to locate information relevant to a given topic quickly and efficiently.

According to the calendar, on which day does the student have the MOST things to do?

A. Monday
B. Tuesday
C. Friday
D. Sunday

Correct Answer: C

Explanation of Correct Answer: The correct answer is choice (C) Friday. The student has four different things to prepare for. Choice (A) is incorrect because the student has only three activities. Choice (B) is incorrect because the student has only two activities. Choice (D) is incorrect because the student has only one activity.
Example Item 2

Drag-and-Drop Technology-Enhanced: 2 points

DOK Level: 3

English Language Arts (ELA) Grade 3 Content Domain: Reading and Vocabulary

Standard: ELAGSE3RI3. Describe the relationship between a series of historical events, scientific ideas or concepts, or steps in technical procedures in a text, using language that pertains to time, sequence, and cause/effect.

Move the MOST LIKELY result of having a weekly calendar into the first column. Then move the detail from the passage that BEST supports the result into the second column.

Due to the size of the response area, this item has a “Click To Respond” button on the screen. Clicking this button will bring up the response area at full size.

Go on to the next page to finish example item 2.
Example Item 2. *Continued.*

<table>
<thead>
<tr>
<th>MOST LIKELY Result of Having a Weekly Calendar</th>
<th>Supporting Detail</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Results**
- good grades
- less homework
- more field trips
- fun music lessons

**Details**
- Do you have a spelling test each week?
- If you know the test is coming up, you will remember to study.
  - Perhaps your class has a field trip planned.
  - For example, you might have a piano lesson coming up that you need to practice for.

Use a mouse, touchpad, or touchscreen to move the descriptions below the chart into the boxes in the chart.
Example Item 2. Continued.

### Scoring Rubric

<table>
<thead>
<tr>
<th>Points</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>The student correctly fills in both columns.</td>
</tr>
<tr>
<td>1</td>
<td>The student correctly fills in the first column.</td>
</tr>
<tr>
<td>0</td>
<td>The student correctly fills in the second column or does not correctly fill in either column.</td>
</tr>
</tbody>
</table>

### Exemplar Response

The correct response is shown below.

<table>
<thead>
<tr>
<th>MOST LIKELY Result of Having a Weekly Calendar</th>
<th>Supporting Detail</th>
</tr>
</thead>
<tbody>
<tr>
<td>• good grades</td>
<td>• If you know the test is coming up, you will remember to study.</td>
</tr>
</tbody>
</table>

**Results**

- less homework
- more field trips
- fun music lessons

**Details**

Do you have a spelling test each week?

Perhaps your class has a field trip planned.

For example, you might have a piano lesson coming up that you need to practice for.

The correct response in the first column is “good grades.” The detail that supports this response is “If you know the test is coming up, you will remember to study.” These are the correct responses because information in the third paragraph supports the idea that a student will likely get good grades by keeping a calendar and remembering to study.
Example Item 3

Extended Writing-Response: 7 points

DOK Level: 4

English Language Arts (ELA) Grade 3 Content Domain: Writing and Language

Standards:
ELAGSE3W2. Write informative/explanatory texts to examine a topic and convey ideas and information clearly.
ELAGSE3L1. Demonstrate command of the conventions of Standard English grammar and usage when writing or speaking.
ELAGSE3L2. Demonstrate command of the conventions of Standard English capitalization, punctuation, and spelling when writing.

This section of the test assesses your skill to comprehend reading passages and use information from the passages to write an informational piece.

Before you begin writing your piece, you will read two passages.
As you read the passages, think about details you may use in an informational piece about how some scientists solve problems.

These are the titles of the passages you will read:

1. Nature All Around
2. Looking for Answers
Nature All Around

Eva stood still and listened to the song. She looked around to see where it was coming from. She smiled when she finally discovered the singing frog. It was hidden between tall blades of thick grass. She took out her pencil and drew a picture of what she saw. She hoped her mom was recording the song.

Eva and her parents are part of a science group that studies frogs and toads. They have learned to recognize the frogs and toads by the sounds (or songs) that they make. First, the group writes down what they see and hear. They also take pictures and record the sounds. Next, they post their findings online. Finally, scientists look at the information.

Even though Eva is only eight years old, she is a “citizen naturalist.” Citizen naturalists are ordinary people who care about Earth. They want to keep it safe and clean for people, plants, and animals. Citizen naturalists are curious about the world around them. They spend time outside observing (or carefully looking at) nature.

Eva’s group learns about frogs and toads, but there are different types of groups around the country. People come together to watch different things in nature. Some groups watch birds. Others count fireflies. Still others help protect monarch butterflies. Some groups even watch the stars. Like Eva’s group, these groups collect facts and share them with scientists.

Many of the people who start these groups feel it is important for young people to notice and care about nature. Kids can join groups that meet in their neighborhoods, at parks, or at their schools. Groups may be led by parents, teachers, scientists, or people from the neighborhood who simply love wildlife. Anyone can become a citizen naturalist—even you! A person needs only to have a love for nature.
Looking for Answers

Have you ever wondered what makes a seed grow into a plant? Or have you wondered why certain animals only come out at night? The curious learner is full of questions. One way of seeking answers to those questions is known as the scientific method.

Scientists have lots of questions. They are interested in learning about the world around them. They pay careful attention to what they see. Often, scientists want to solve problems to make the world a better place in which to live.

Scientists often write things down because they want to remember what they see. This is known as observation [ob-zur-VEY-shuhn]. When scientists have a question to answer, they make observations. Once they have a few observations, they come up with a guess about what the answer to their question might be. This guess is called a hypothesis [hi-POTH-uh-sis].

Next, it is time for an experiment. An experiment [ek-SPER-uh-ment] is a test to find something out. Scientists think of ways to test if the hypothesis is correct. Then they watch to see what happens. Do you remember what it is called when scientists watch to see what happens? Observation! They write down the facts that they see. A fact is something that is true.

Scientists look at the facts they’ve gathered and think about what they might mean. This helps the scientists know if the hypothesis, or guess, is likely to be correct. Based on the observations, the facts, and the experiment, scientists make a conclusion. A conclusion [kuhn-KLOO-zhuhn] is a short paragraph about what was learned from the experiment.

Scientists are not the only people who can use the scientific method. Any person with a question can follow these steps to find the answers to his or her question.
WRITING TASK

Scientists have different ways of learning new information. Think about the ideas in BOTH passages. Then write an informational piece about how some scientists and citizen naturalists answer questions and solve problems. Be sure to use information from BOTH passages in your informational piece.

Writer’s Checklist

Be sure to:

• Introduce the topic clearly.
• Use information from the two passages so that your piece includes important details.
• Develop the topic in a clear order, with facts, definitions, and details related to the topic.
• Identify the passages by title or number when using details or facts directly from the passages.
• Develop your ideas clearly and use your own words, except when quoting directly from the passages.
• Use linking words to connect ideas.
• Use clear language and vocabulary.
• Have a strong conclusion that supports the information presented.
• Check your work for correct usage, grammar, spelling, capitalization, and punctuation.

Now write your informational piece on your answer document. Refer to the Writer’s Checklist as you write and proofread your piece.
The following is an example of a seven-point response. See the seven-point, two-trait rubric for a text-based informational/explanatory response on pages 67 and 68 to see why this example would earn the maximum number of points.

Citizen naturalists like Eva answer questions and solve problems by spending time in nature. When they want to learn about frogs, they spend time observing them. Citizen naturalists took pictures, recorded the sounds, and wrote notes about what they saw and heard the frogs do. The information they put together was put online for scientists to read.

Scientists use the scientific method to answer questions and solve problems. If scientists were learning about frogs they would first watch the frogs to see how they act and what they sound like. Then they would make a guess that is called a hypothesis. They might guess about the way the frogs make their sounds or which frogs make the different sounds.

Their experiment could be testing the frogs and the sounds they make. They could catch the frogs and see what will make them sing.

In the end, they make a conclusion about the things they learned about the frogs.
ENGLISH LANGUAGE ARTS (ELA) ADDITIONAL SAMPLE ITEMS

This section has two parts. The first part is a set of 24 sample items for the English Language Arts (ELA) portion of the EOG assessment. The second part contains a table that shows for each item the standard assessed, the DOK level, the correct answer (key), and a rationale/explanation about the key and distractors. The sample items can be utilized as a mini-test to familiarize students with the item formats found on the assessment.

All example and sample items contained in this guide are the property of the Georgia Department of Education.
Read the story and answer questions 1 through 12.

**Buried Treasure**

Michael and his sister Anna climbed the stairs to the attic. Their family had moved into the old house a week ago. The porch sagged like a droopy smile, and the window shutters hung like crooked teeth. Michael opened the door at the top of the stairs. Their mother wanted them to clean the room. He stared at the dusty boxes piled against the wall.

“This will be the perfect place to play games,” Anna announced. She twirled across the floor, ignoring the spider webs. “We can paint the walls yellow.”

“They are full of cracks,” Michael sighed. Anna had big ideas, but he was more practical. “Let’s get this job done.”

“Okay,” Anna agreed. She brought two boxes down the steps before she stopped again.

“Look what I found in this old tin box!” she squeaked. Her brown eyes sparkled with excitement. “It is a treasure map.”

Michael took the faded paper from her hands and studied the scribbled pictures. “Some little kid drew this years ago. You will not find that treasure anymore,” he said.

“I might,” Anna argued.

“It is a waste of time,” Michael said. Anna did not listen. She slipped the map into her pocket.

After lunch, Michael went outside to practice shooting baskets. Anna kept dashing past him like a flash of lightning. Finally the muscles in his arms started to ache, and he headed inside. His sister was sitting down in a kitchen chair.

“How is the treasure hunting?” Michael teased.

“I wasted my time,” Anna mumbled.

Michael opened his mouth to agree, but the words caught in his throat. Anna looked like a balloon after it had lost its air. Her face was sweaty, and her mouth was turned down.

“Let me help,” he suggested, picking up the paper.

“Really?” asked Anna, jumping up like a spring. A moment later, they stood outside staring at the map.

“I can only find one tree,” Anna said, pointing to a small pine near the steps.

Michael looked at the tree and grinned. “That is not the right tree,” he explained. “It is on the wrong side of the house, and it is only a few years old. There is a big stump on the other side. The tree on the map must have been cut down.”
Michael felt his heart pound as he got caught up in the excitement. At any moment, he felt as though they would stumble across a sandy hill covered with daisies and find the cement-covered well. Finally, they spotted an unusual rock shaped like a bird.

“Bird rock!” cheered Anna, clapping her hands.

Soon Michael discovered a tin box in a hollow spot at the base of the rock. Anna worked the cover loose, and together, they stared at an old wooden yo-yo.

“We really found a treasure!” shouted Anna. Michael laughed at her enthusiasm.

Then he shared in her excitement. For the first time, he could see the old house the way Anna imagined it.

**Item 1**

**Selected-Response: 1 point**

**What is the central message of the story?**

A. Cleaning is an important activity.
B. Maps are useful and fun to draw.
C. Brothers and sisters are often different.
D. Fun can be found in unexpected places.
**Item 2**

Selected-Response: 1 point

Which detail from the story BEST supports the idea that Michael cares about his sister?

A. Their mother wanted them to clean the room. He stared at the dusty boxes piled against the wall.
B. Michael took the faded paper from her hands and studied the scribbled pictures.
C. Michael opened his mouth to agree, but the words caught in his throat. Anna looked like a balloon after it had lost its air.
D. Soon Michael discovered a tin box in a hollow spot at the base of the rock. Anna worked the cover loose, and together, they stared at an old wooden yo-yo.

**Item 3**

Selected-Response: 1 point

Which sentence BEST describes why Anna is unable to find the treasure before Michael helps her?

A. She is looking at the wrong side of the map.
B. The map is old and shows a tree that is no longer there.
C. She does not have the map with her while she is looking.
D. The map is confusing and shows rocks shaped like animals.

**Item 4**

Selected-Response: 1 point

Read the scene from the beginning of the story.

Michael and his sister Anna climbed the stairs to the attic. Their family had moved into the old house a week ago. The porch sagged like a droopy smile, and the window shutters hung like crooked teeth. Michael opened the door at the top of the stairs. Their mother wanted them to clean the room. He stared at the dusty boxes piled against the wall.

Why is this scene important to the story?

A. It shows the feelings of the characters in the story by telling how Michael and Anna have similar ideas about the new house.
B. It provides the setting of the story by explaining that Michael and Anna have moved into a new house.
C. It gives the problem in the story by telling what Michael and Anna hope to find in the new house.
D. It tells the central message of the story by explaining that Michael and Anna can do a little hard work to improve the new house.
Item 5
Selected-Response: 1 point

In the beginning of the story, how are Michael’s and Anna’s views different?

A. Anna is excited about the map, and Michael thinks the map is useless.
B. Anna wants Michael’s help with the map, and Michael wants to clean his room.
C. Anna is eager to unpack boxes, and Michael thinks they need to find the treasure.
D. Anna wants to work together to find the treasure, and Michael wants to work alone.

Item 6
Selected-Response: 1 point

Which sentence BEST explains how the picture of the treasure map adds to the story?

A. It shows readers what the treasure looks like when it is found.
B. It shows readers where the treasure should be hidden in the house on Lane Street.
C. It shows readers the information Anna and Michael have about where to find the treasure.
D. It shows readers information about how much time it took Anna and Michael to find the treasure.
Finish retelling the story “Buried Treasure.” Move the THREE MOST important events into the chart in the order in which they happen in the story.

Due to the size of the response area, this item has a “Click To Respond” button on the screen. Clicking this button will bring up the response area at full size.

Go on to the next page to finish item 7.
Item 7. *Continued.*

<table>
<thead>
<tr>
<th>Event 1</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Event 2</th>
<th>Anna looks for the treasure herself but cannot find it.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Event 3</td>
<td></td>
</tr>
<tr>
<td>Event 4</td>
<td>After searching together, the children find the treasure.</td>
</tr>
<tr>
<td>Event 5</td>
<td></td>
</tr>
</tbody>
</table>

Michael offers to help Anna look for the treasure.

Anna sits down in a kitchen chair while Michael shoots baskets outside.

Michael begins to feel happy about living in the new house.

The attic looks old and worn, and Anna would like to paint it.

Michael and Anna find a treasure map while cleaning the attic of the new house.

Use a mouse, touchpad, or touchscreen to move the descriptions below the chart into the boxes in the chart.
**Item 8**

**Selected-Response: 1 point**

Which sentence BEST explains the meaning of the phrase *like a flash of lightning* as it is used in the sentence?

Anna kept dashing past him like a flash of lightning.

A. Anna was very fast.
B. Anna was in danger.
C. Anna was very bright.
D. Anna was hard to see.

**Item 9**

**Selected-Response: 1 point**

Read the sentence from the story.

Michael took the faded paper from her hands and studied the scribbled pictures.

What is the meaning of the word *studied* as it is used in the sentence?

A. immediately learned
B. carefully planned
C. closely observed
D. suddenly remembered

**Item 10**

**Selected-Response: 1 point**

What does the prefix *un-* mean in *unusual*?

Finally, they spotted an unusual rock shaped like a bird.

A. not
B. very
C. under
D. before
**Item 11**

Evidence-Based Selected-Response Technology-Enhanced: 2 points

This question has two parts. Answer Part A, and then answer Part B.

**Part A**

Which sentence BEST describes the change in Michael’s attitude toward the treasure map?

A. Michael thinks the treasure map is a fake until he sees the treasure marked with an X.
B. Michael thinks the treasure map is silly until he and his sister find a treasure in their yard.
C. Michael thinks the treasure map is dangerous until he sees that it includes a picture of his house.
D. Michael thinks the treasure map is drawn incorrectly until his sister finds a tree stump in their yard.

**Part B**

Which pair of sentences from the story BEST supports the answer to Part A?

A. “It is a waste of time,” Michael said.
   Soon Michael discovered a tin box in a hollow spot at the base of the rock.
B. “You will not find that treasure anymore,” he said.
   “It is on the wrong side of the house, and it is only a few years old.”
C. “Some little kid drew this years ago.”
   “The tree on the map must have been cut down.”
D. “How is the treasure hunting?” Michael teased.
   Michael laughed at her enthusiasm.
Item 12

Extended Constructed-Response: 4 points

Write a conclusion to the story in which Anna and Michael go back to the attic to see what else they can find.

Be sure to include what they say to each other and descriptions of how the attic looks.

Narrative Writer’s Checklist

Be sure to:

• Develop a real or imagined experience.
• Include a situation and introduce a narrator and/or characters.
• Organize events in order.
  ◦ Use words and phrases to show the sequence of events.
• Use dialogue and/or descriptions of actions, thoughts, and feelings to:
  ◦ develop events.
  ◦ show how characters respond to situations.
• Include a conclusion.
• Use ideas and/or details from the passage(s).
• Check your work for correct usage, grammar, spelling, capitalization, and punctuation.

Now write your narrative on your answer document. Refer to the Writer’s Checklist as you write and proofread your narrative.

Go on to the next page to finish item 12.
**Items 13 and 14**

This section of the test assesses your skill to comprehend reading passages and use information from the passages to write an informational piece.

Before you begin writing your piece, you will read two passages and answer one short constructed-response question about what you have read.

As you read the passages, think about details you may use in an informational piece about how some scientists solve problems.

**These are the titles of the passages you will read:**

1. Nature All Around
2. Looking for Answers
Eva stood still and listened to the song. She looked around to see where it was coming from. She smiled when she finally discovered the singing frog. It was hidden between tall blades of thick grass. She took out her pencil and drew a picture of what she saw. She hoped her mom was recording the song.

Eva and her parents are part of a science group that studies frogs and toads. They have learned to recognize the frogs and toads by the sounds (or songs) that they make. First, the group writes down what they see and hear. They also take pictures and record the sounds. Next, they post their findings online. Finally, scientists look at the information.

Even though Eva is only eight years old, she is a “citizen naturalist.” Citizen naturalists are ordinary people who care about Earth. They want to keep it safe and clean for people, plants, and animals. Citizen naturalists are curious about the world around them. They spend time outside observing (or carefully looking at) nature.

Eva’s group learns about frogs and toads, but there are different types of groups around the country. People come together to watch different things in nature. Some groups watch birds. Others count fireflies. Still others help protect monarch butterflies. Some groups even watch the stars. Like Eva’s group, these groups collect facts and share them with scientists.

Many of the people who start these groups feel it is important for young people to notice and care about nature. Kids can join groups that meet in their neighborhoods, at parks, or at their schools. Groups may be led by parents, teachers, scientists, or people from the neighborhood who simply love wildlife. Anyone can become a citizen naturalist—even you! A person needs only to have a love for nature.
looking for answers

have you ever wondered what makes a seed grow into a plant? or have you wondered why certain animals only come out at night? the curious learner is full of questions. one way of seeking answers to those questions is known as the scientific method.

scientists have lots of questions. they are interested in learning about the world around them. they pay careful attention to what they see. often, scientists want to solve problems to make the world a better place in which to live.

scientists are not the only people who can use the scientific method. any person with a question can follow these steps to find the answers to his or her question.
Item 13

Constructed-Response: 2 points

Explain the steps BOTH authors provide to show how people can learn from nature.

Use details from BOTH passages to support your answer. Write your answer on the lines on your answer document.
Item 14
Extended Writing-Response: 7 points

WRITING TASK

Scientists have different ways of learning new information.
Think about the ideas in BOTH passages. Then write an informational piece about how some scientists and citizen naturalists answer questions and solve problems.
Be sure to use information from BOTH passages in your informational piece.

Writer’s Checklist

Be sure to:

• Introduce the topic clearly.
• Use information from the two passages so that your piece includes important details.
• Develop the topic in a clear order, with facts, definitions, and details related to the topic.
• Identify the passages by title or number when using details or facts directly from the passages.
• Develop your ideas clearly and use your own words, except when quoting directly from the passages.
• Use linking words to connect ideas.
• Use clear language and vocabulary.
• Have a strong conclusion that supports the information presented.
• Check your work for correct usage, grammar, spelling, capitalization, and punctuation.

Now write your informational piece on your answer document. Refer to the Writer’s Checklist as you write and proofread your piece.
Items 15–24

Item 15

Selected-Response: 1 point

Which word in the sentence is an abstract noun?

My sister had a lot of luck on the day she won first prize.

A. sister
B. luck
C. day
D. prize

Item 16

Selected-Response: 1 point

Which sentence uses correct subject-verb agreement?

A. Dogs makes wonderful pets.
B. They makes wonderful pets.
C. Dogs make wonderful pets.
D. It make wonderful pets.

Item 17

Selected-Response: 1 point

Read the sentences.

My brother has an old, soft teddy bear. He likes to put it on his pillow.

Which sentence is the BEST way to rewrite the sentences without changing the meaning?

A. My brother has an old, soft pillow and a teddy bear that he likes to put on it.
B. My brother has a pillow with an old, soft teddy bear that he likes to put on it.
C. My brother has a teddy bear that he likes to put on his old, soft pillow.
D. My brother has an old, soft teddy bear that he likes to put on his pillow.
English Language Arts (ELA)

**Item 18**

**Selected-Response:** 1 point

Read the address.

230 N. Roosevelt, Street  
Wichita, Kansas 67208

Which change should be made to correctly write this address?

A. Remove the comma after “Roosevelt.”
B. Add a comma after “Street.”
C. Remove the comma after “Wichita.”
D. Add a comma after “Kansas.”

**Item 19**

**Selected-Response:** 1 point

Read the sentences.

My sister likes to sit in the kitchen and make art. She has made some large drawings that are almost as big as the table.

Which underlined word is spelled incorrectly?

A. kitchen  
B. large  
C. allmost  
D. table
**Item 20**

**Selected-Response: 1 point**

A student is writing a paragraph about watching a fireworks display with her family. Read the paragraph.

1. Every year the Old Time Music Festival puts on a fireworks display.
2. My family and I really enjoy it.
3. The musicians give a concert.
4. Then, we sit on the grass and watch neat lights zoom across the sky.
5. There is every color of the rainbow you can imagine.
6. Some burn out quickly and others glow for a long time.
7. Sitting there, I forget about everything but those fireworks.

Which edit should be made to the paragraph to BEST describe the beauty the student sees?

A. In sentence 2 change “enjoy” to “love.”
B. In sentence 4 change “neat” to “sparkling.”
C. In sentence 5 change “imagine” to “think of.”
D. In sentence 6 change “a long time” to “a while.”
**Item 21**

**Drop-Down Technology-Enhanced: 1 point**

Choose the correct word from each drop-down menu to complete the sentences.

The three schools in my city all begin the school day at different times. My school opens the _[ ]_ of the three. My brother is in middle school, and his school opens _[ ]_ than my school.

Use a mouse, touchpad, or touchscreen to click the arrow beside each of the two blank boxes. When you click the arrow, a drop-down menu will appear, showing you all the possible options for that blank. Each drop-down menu with its options is shown below.

The three schools in my city all begin the school day at different times. My school opens the _[ ]_ of the three. My brother is in middle school, and his school opens _[ ]_ than my school.
**Item 22**

**Drag-and-Drop Technology-Enhanced: 2 points**

Read the sentence. Complete the chart to show how each of the underlined words in the sentence is used.

The small kitten **happily licked** its **paws** as it sat in the **warm** sunshine.

<table>
<thead>
<tr>
<th>Word</th>
<th>Which part of speech is the word?</th>
<th>What does the word do?</th>
</tr>
</thead>
<tbody>
<tr>
<td>happily</td>
<td></td>
<td></td>

</tr>
</tbody>
</table>

**Which part of speech is the word?**

- verb
- noun
- adverb
- adjective

**What does the word do?**

- It is a person, place, or thing.
- It describes a person, place, or thing.
- It is an action word.
- It describes an action.

 frente a Use a mouse, touchpad, or touchscreen to move the descriptions below the chart into the boxes in the chart.
Item 23
Drop-Down Technology-Enhanced: 1 point

Choose the word or phrase from each drop-down menu that BEST connects the ideas in the story.

A family of squirrels lived in a tree near the edge of a meadow. The smallest squirrel was named Benny. Benny left the tree to explore the meadow on his own. Benny realized he had gone too far. At first, he was worried, but then he quickly found his way home.

Use a mouse, touchpad, or touchscreen to click the arrow beside each of the two blank boxes. When you click the arrow, a drop-down menu will appear, showing you all the possible options for that blank. Each drop-down menu with its options is shown below.

A family of squirrels lived in a tree near the edge of a meadow. The smallest squirrel was named Benny. Benny left the tree to explore the meadow on his own. Benny realized he had gone too far. At first, he was worried, but then he quickly found his way home.

- One day
- Before long
- Earlier that day
- All of a sudden
- After that
- Finally
Item 24
Drag-and-Drop Technology-Enhanced: 2 points

A student is writing a report about fruits grown in Georgia. Complete the chart by moving the TWO sources that would BEST help the student gather information for the report into the chart.

- an article: “Famous Restaurants of Georgia”
- a cookbook: Ten Healthy Meals from Georgia
- a book: Important Crops Farmed in Georgia
- a travel guide: An Atlas of Georgia’s Cities and Trails
- a webpage: “Georgia, Leading Grower of Peanuts and Peaches”

## ENGLISH LANGUAGE ARTS (ELA) ADDITIONAL SAMPLE ITEM KEYS

<table>
<thead>
<tr>
<th>Item</th>
<th>Standard/Element</th>
<th>DOK Level</th>
<th>Correct Answer</th>
<th>Explanation</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>ELAGSE3RL2</td>
<td>3</td>
<td>D</td>
<td>The correct answer is choice (D) Fun can be found in unexpected places. The children initially didn’t expect to have fun cleaning the attic, but then they discovered the treasure map. Later, Michael learned that helping his sister, even though he thought it was pointless, turned out to be fun. Choice (A) is incorrect because cleaning is not the main focus of the story; finding the treasure is. Choice (B) is incorrect because the children don’t actually draw a map; they simply follow it. Choice (C) is incorrect because nothing in the story supports this generalized conclusion about brothers and sisters.</td>
</tr>
<tr>
<td>2</td>
<td>ELAGSE3RL1</td>
<td>2</td>
<td>C</td>
<td>The correct answer is choice (C) Michael opened his mouth to agree, but the words caught in his throat. Anna looked like a balloon after it had lost its air. At this point in the story, Michael realizes that being kind to his sister is better than making her feel even more foolish for thinking the map would still lead to treasure after all these years. Choice (A) is incorrect because it does not show any interaction between Michael and Anna. Choice (B) is incorrect because it does not reveal that Michael is caring nor is he reacting in any way to Anna. Choice (D) is incorrect because it only describes Michael and Anna working together to open the box.</td>
</tr>
<tr>
<td>3</td>
<td>ELAGSE3RL2</td>
<td>2</td>
<td>B</td>
<td>The correct answer is choice (B) The map is old and shows a tree that is no longer there. Because the map shows features that have changed over time, Anna can’t rely on them to find the treasure. Choice (A) is incorrect because there is no indication of a right or wrong side of the map in the story. Choice (C) is incorrect because Anna does carry the map with her throughout the story. Choice (D) is incorrect because the rock shaped like a bird actually helps Anna and Michael find the treasure; the map does not confuse them.</td>
</tr>
<tr>
<td>4</td>
<td>ELAGSE3RL5</td>
<td>2</td>
<td>B</td>
<td>The correct answer is choice (B) It provides the setting of the story by explaining that Michael and Anna have moved into a new house. Choice (A) is incorrect because Michael and Anna do not have similar ideas about the new house. Choice (C) is incorrect because only Anna is hopeful about what will be found in the new house. Choice (D) is incorrect because the story as a whole is not about improving the new house.</td>
</tr>
<tr>
<td>Item</td>
<td>Standard/Element</td>
<td>DOK Level</td>
<td>Correct Answer</td>
<td>Explanation</td>
</tr>
<tr>
<td>------</td>
<td>------------------</td>
<td>-----------</td>
<td>----------------</td>
<td>-------------</td>
</tr>
<tr>
<td>5</td>
<td>ELAGSE3RL6</td>
<td>3</td>
<td>A</td>
<td>The correct answer is choice (A) Anna is excited about the map, and Michael thinks the map is useless. In the story, he says, “It is a waste of time.” Choices (B) and (D) are incorrect because the story does not discuss Michael cleaning his room or working alone. Choice (C) is incorrect because at the beginning of the story, Michael does not want to find the treasure.</td>
</tr>
<tr>
<td>6</td>
<td>ELAGSE3RL7</td>
<td>2</td>
<td>C</td>
<td>The correct answer is choice (C) It shows readers the information Anna and Michael have about where to find the treasure. Choice (A) is incorrect because the picture does not show what the treasure looks like. Choice (B) is incorrect because the picture does not show the treasure is hidden inside the house. Choice (D) is incorrect because the picture does not indicate how much time it took Anna and Michael to find the treasure.</td>
</tr>
<tr>
<td>7</td>
<td>ELAGSE3RL2</td>
<td>2</td>
<td>N/A</td>
<td>See scoring rubric and exemplar response on page 56.</td>
</tr>
<tr>
<td>8</td>
<td>ELAGSE3RL4</td>
<td>2</td>
<td>A</td>
<td>The correct answer is choice (A) Anna was very fast. The phrase “like a flash of lightning” is figurative language describing her speed. Choice (B) is incorrect because Anna is not in danger in the story. Choices (C) and (D) are incorrect because they are literal interpretations that do not reflect her speed.</td>
</tr>
<tr>
<td>9</td>
<td>ELAGSE3L4a</td>
<td>2</td>
<td>C</td>
<td>The correct answer is choice (C) closely observed. Michael is looking at the map and thinking about what he sees. Choices (A) and (B) are incorrect because Michael hasn’t learned anything about the map yet or made plans based on it; he has only just started looking at it. Choice (D) is incorrect because this is only the first time he has gotten a good look at the map, so he couldn’t have remembered anything about it yet.</td>
</tr>
<tr>
<td>10</td>
<td>ELAGSE3L4b</td>
<td>1</td>
<td>A</td>
<td>The correct answer is choice (A) not. The word “unusual” refers to something that is not typically expected or something that stands out. In this case, the rock shaped like a bird is “unusual” or “not normal” because most rocks don’t have recognizable or memorable shapes. Choice (B) is incorrect because it would suggest that the rock is “very usual,” which is not accurate because the rock is shaped like a bird. Choice (C) is incorrect because the rock is not under anything. Choice (D) is incorrect because the rock does not come before anything.</td>
</tr>

<td>------------------</td>
<td>-----------</td>
<td>----------------</td>
<td>-------------</td>
</tr>
<tr>
<td>11</td>
<td>ELAGSE3RL3</td>
<td>3</td>
<td>B/A</td>
<td>The correct answers are choice (B) Michael thinks the treasure map is silly until he and his sister find a treasure in their yard, and choice (A) “It is a waste of time,” Michael said. Soon Michael discovered a tin box in a hollow spot at the base of the rock. At the beginning of the story, Michael does not think the treasure map is worth pursuing, but then later he helps his sister use it to find a treasure. The correct answer choice for Part B of the item shows text that supports Michael’s change in attitude. In Part A, choice (A) is incorrect because there is no indication that Michael thinks the map is fake. Choice (C) is incorrect because there is no indication that Michael thinks the map is dangerous; he dismisses it initially because he thinks it is too old to be useful. Choice (D) is incorrect because Michael shows his sister that she is using the map incorrectly, not that there is something wrong with the map. The incorrect options in Part B support incorrect answers in Part A.</td>
</tr>
<tr>

ENGLISH LANGUAGE ARTS (ELA) EXAMPLE SCORING RUBRICS AND EXEMPLAR RESPONSES

Item 7

Scoring Rubric

<table>
<thead>
<tr>
<th>Points</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>The student correctly fills in all three rows.</td>
</tr>
<tr>
<td>1</td>
<td>The student correctly fills in two rows.</td>
</tr>
<tr>
<td>0</td>
<td>The student does not correctly fill in at least two rows.</td>
</tr>
</tbody>
</table>

Exemplar Response

The correct response is shown below.

<table>
<thead>
<tr>
<th>Event 1</th>
<th>Michael and Anna find a treasure map while cleaning the attic of the new house.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Event 2</td>
<td>Anna looks for the treasure herself but cannot find it.</td>
</tr>
<tr>
<td>Event 3</td>
<td>Michael offers to help Anna look for the treasure.</td>
</tr>
<tr>
<td>Event 4</td>
<td>After searching together, the children find the treasure.</td>
</tr>
<tr>
<td>Event 5</td>
<td>Michael begins to feel happy about living in the new house.</td>
</tr>
</tbody>
</table>

Anna sits down in a kitchen chair while Michael shoots baskets outside.

The attic looks old and worn, and Anna would like to paint it.

The first event is “Michael and Anna find a treasure map while cleaning the attic of the new house.” The third event is “Michael offers to help Anna look for the treasure.” The fifth event is “Michael begins to feel happy about living in the new house.” These are the correct responses because they are not only key ideas that should be included in a summary; they are also listed in the order in which the events occur in the story. NOTE: Response order does matter.
### Item 12

To view the four-point holistic rubric for a text-based narrative response, see pages 65 and 66.

#### Exemplar Response

<table>
<thead>
<tr>
<th>Points Awarded</th>
<th>Sample Response</th>
</tr>
</thead>
</table>
| 4              | Anna said to Michael, “Now that we’ve found the treasure, let’s go back to the attic to see if there are other things to find!”  
Michael told Anna that her idea was a good one. The two children ran back into the attic and started looking around the dirty and dusty boxes.  
“Look at this!” Michael shouted. Anna saw Michael holding up a diary. It was old and the cover was torn, but the writing was as clear as could be.  
Inside the cover, it said, “Jonathan’s Diary, 1936.” Anna and Michael looked at each other in surprise at how old the diary really was. “1936!” they said at the same time.  
Over the next few days, the two children found many more treasures because of the clues Jonathan had written so long ago. Michael was glad he changed his mind about hidden treasures. |
| 3              | Anna said to Michael, “Now that we’ve found the treasure, let’s go back to the attic to see if there are other things to find!”  
Michael told Anna that her idea was a good one. The two children ran back into the attic and started looking around the dirty and dusty boxes.  
They found an old diary, and it had directions to more treasures. They followed them and found more things. |
| 2              | Anna said to Michael that they should go back to the attic to look for more things.  
They found a diary when they got there. It had more directions to treasures. Anna and Michael had fun finding them. |
| 1              | Anna said to Michael that they should go back to the attic to look for more things. “That’s a good idea,” Michael said. |
| 0              | Anna and Michael were happy to find the treasure and wanted more. |
### Item 13

#### Scoring Rubric

<table>
<thead>
<tr>
<th>Points</th>
<th>Description</th>
</tr>
</thead>
</table>
| 2      | The response achieves the following:  
  - Gives sufficient evidence of the ability to describe the relationship between a series of scientific ideas or concepts in a text  
  - Includes specific examples/details that make clear reference to the texts  
  - Adequately explains the relationship between a series of scientific ideas or concepts with clearly relevant information based on the texts |
| 1      | The response achieves the following:  
  - Gives limited evidence of the ability to describe the relationship between a series of scientific ideas or concepts in a text  
  - Includes vague or limited examples/details that make clear reference to the texts  
  - Gives a partial or limited explanation of the relationship between a series of scientific ideas or concepts with clearly relevant information based on the texts |
| 0      | The response achieves the following:  
  - Gives no evidence of the ability to describe the relationship between a series of scientific ideas or concepts in a text |

#### Exemplar Response

<table>
<thead>
<tr>
<th>Points Awarded</th>
<th>Sample Response</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>The author of “Nature All Around” and the author of “Looking for Answers” both give steps to show how people can learn from nature. In “Nature All Around,” the author mentions that people can join a group just like Eva did. Then, the author says people should observe the world around them and write down what they see and hear. They can also take pictures and post findings online. They can “collect facts and share them with scientists.” The author of “Looking for Answers” tells the readers to “pay careful attention to what they see” and to “write things down.” This author tells people to make a guess and to plan an experiment. Finally, the author tells readers to “make a conclusion.”</td>
</tr>
<tr>
<td>1</td>
<td>The authors of both articles say that people should look around the world and write down what they see. This helps people to observe the world and learn about nature.</td>
</tr>
<tr>
<td>0</td>
<td>Just about anyone can learn from nature by following steps.</td>
</tr>
</tbody>
</table>
Item 14

The following is an example of a seven-point response. See the seven-point, two-trait rubric for a text-based informational/explanatory response on pages 67 and 68 to see why this example would earn the maximum number of points.

Citizen naturalists like Eva answer questions and solve problems by spending time in nature. When they want to learn about frogs, they spend time observing them. Citizen naturalists took pictures, recorded the sounds, and wrote notes about what they saw and heard the frogs do. The information they put together was put online for scientists to read.

Scientists use the scientific method to answer questions and solve problems. If scientists were learning about frogs they would first watch the frogs to see how they act and what they sound like. Then they would make a guess that is called a hypothesis. They might guess about the way the frogs make their sounds or which frogs make the different sounds.

Their experiment could be testing the frogs and the sounds they make. They could catch the frogs and see what will make them sing.

In the end, they make a conclusion about the things they learned about the frogs and write about it.
**Item 21**

**Scoring Rubric**

<table>
<thead>
<tr>
<th>Points</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>The student correctly selects both drop-down menu options.</td>
</tr>
<tr>
<td>0</td>
<td>The student does not correctly select both drop-down menu options.</td>
</tr>
</tbody>
</table>

**Exemplar Response**

The correct response is shown below.

The three schools in my city all begin the school day at different times. My school opens the earliest of the three. My brother is in middle school, and his school opens later than my school.

In the first drop-down menu, the correct response is “earliest” because the sentence references three schools, which makes the superlative form the only correct response. In the second drop-down menu, the correct response is “later” because the sentence only compares two items and thus calls for the comparative form.
Item 22

Scoring Rubric

<table>
<thead>
<tr>
<th>Points</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>The student correctly fills in all four rows.</td>
</tr>
<tr>
<td>1</td>
<td>The student correctly fills in two or three rows, the middle column, or the last column.</td>
</tr>
<tr>
<td>0</td>
<td>The student correctly fills in one row or does not correctly fill in any rows.</td>
</tr>
</tbody>
</table>

Exemplar Response

The correct response is shown below.

<table>
<thead>
<tr>
<th>Word</th>
<th>Which part of speech is the word?</th>
<th>What does the word do?</th>
</tr>
</thead>
<tbody>
<tr>
<td>happily</td>
<td>adverb</td>
<td>It describes an action.</td>
</tr>
<tr>
<td>licked</td>
<td>verb</td>
<td>It is an action word.</td>
</tr>
<tr>
<td>paws</td>
<td>noun</td>
<td>It is a person, place, or thing.</td>
</tr>
<tr>
<td>warm</td>
<td>adjective</td>
<td>It describes a person, place, or thing.</td>
</tr>
</tbody>
</table>

The correct response for the first box is “adverb.” The answer for the associated box is “It describes an action.” The correct response for the second box is “verb.” The answer for the associated box is “It is an action word.” The correct response for the third box is “noun.” The answer for the associated box is “It is a person, place, or thing.” The correct response for the fourth box is “adjective.” The answer for the associated box is “It describes a person, place, or thing.” These are the correct responses because each word in context can only be one particular part of speech that performs in the sentence in a certain way. There is only one correct response per box.
Item 23

Scoring Rubric

<table>
<thead>
<tr>
<th>Points</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>The student correctly selects both drop-down menu options.</td>
</tr>
<tr>
<td>0</td>
<td>The student does not correctly select both drop-down menu options.</td>
</tr>
</tbody>
</table>

Exemplar Response

The correct response is shown below.

A family of squirrels lived in a tree near the edge of a meadow. The smallest squirrel was named Benny. One day, Benny left the tree to explore the meadow on his own. All of a sudden, Benny realized he had gone too far. At first, he was worried, but then he quickly found his way home.

In the first drop-down menu, the correct response is “One day” because it is the most logical phrase to signal time order in the paragraph. In the second drop-down menu, the correct response is “All of a sudden” because it also most logically signals time order.
Item 24

**Scoring Rubric**

<table>
<thead>
<tr>
<th>Points</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>The student correctly fills in both bullets (order within the box does not matter).</td>
</tr>
<tr>
<td>1</td>
<td>The student correctly fills in one bullet (order within the box does not matter).</td>
</tr>
<tr>
<td>0</td>
<td>The student does not correctly fill in either bullet.</td>
</tr>
</tbody>
</table>

**Exemplar Response**

The correct response is shown below.

Best Sources for the Student's Report

- a book: *Important Crops Farmed in Georgia*
- a webpage: “Georgia, Leading Grower of Peanuts and Peaches”
- an article: “Famous Restaurants of Georgia”
- a cookbook: *Ten Healthy Meals from Georgia*
- a travel guide: *An Atlas of Georgia’s Cities and Trails*

The two correct responses are “a book: *Important Crops Farmed in Georgia*” and “a webpage: ‘Georgia, Leading Grower of Peanuts and Peaches.’” The book is one of the correct responses because a book about crops farmed in Georgia will likely have a significant amount of information about fruits grown in Georgia. Similarly, a webpage about how Georgia is a leading grower of peaches would also likely provide detailed information about fruits grown in Georgia.
ENGLISH LANGUAGE ARTS (ELA) WRITING RUBRICS

Grade 3 items that are not machine-scored—i.e., constructed-response, extended constructed-response, and extended writing-response items—are manually scored using either a holistic rubric or a two-trait rubric.

Four-Point Holistic Rubric

Genre: Narrative

A holistic rubric essentially has one main trait. On the Georgia Milestones EOG assessment, a holistic rubric contains a single point scale ranging from zero to four. Each point value represents a qualitative description of the student’s work. To score an item on a holistic rubric, a scorer or reader need only choose the criteria and associated point value that best represents the student’s work. Increasing point values represent a greater understanding of the content and, thus, a higher score.

Seven-Point, Two-Trait Rubric

Genre: Opinion or Informational/Explanatory

A two-trait rubric, on the other hand, is an analytic rubric with two traits. On the Georgia Milestones EOG assessment, a two-trait rubric contains two point scales, one for each trait, ranging from zero to four on one scale (ideas) and zero to three on the other (conventions). A score is given for each of the two traits, for a total of seven possible points for the item. To score an item on a two-trait rubric, a scorer or reader must choose the criteria and associated point value for each trait that best represents the student’s work. The two scores are added together. Increasing point values represent a greater understanding of the content and, thus, a higher score.

On the following pages are the rubrics that will be used to evaluate writing on the Georgia Milestones Grade 3 English Language Arts (ELA) EOG assessment.
# Four-Point Holistic Rubric

**Genre: Narrative**

<table>
<thead>
<tr>
<th>Writing Trait</th>
<th>Points</th>
<th>Criteria</th>
</tr>
</thead>
</table>
| **This trait examines the writer’s ability to effectively develop real or imagined experiences or events using effective techniques, descriptive details, and clear event sequences based on a text that has been read.** | 4 | The student’s response is a well-developed narrative that fully develops a real or imagined experience based on text as a stimulus.  
- Effectively establishes a situation and introduces a narrator and/or characters  
- Organizes an event sequence that unfolds naturally  
- Effectively uses narrative techniques, such as dialogue and description, to develop interesting experiences and events or show the response of characters to situations  
- Uses a variety of words and phrases consistently to signal the sequence of events  
- Provides a sense of closure that follows from the narrated experiences or events  
- Integrates ideas and details from source material effectively  
- Has very few or no errors in usage and/or conventions that interfere with meaning* |
| | 3 | The student’s response is a complete narrative that develops a real or imagined experience based on text as a stimulus.  
- Establishes a situation and introduces one or more characters  
- Organizes events in a clear, logical order  
- Uses narrative techniques, such as dialogue and description, to develop experiences and events or show the response of characters to situations  
- Uses words and/or phrases to indicate sequence  
- Provides an appropriate sense of closure  
- Integrates some ideas and/or details from source material  
- Has a few minor errors in usage and/or conventions with no significant effect on meaning* |
| | 2 | The student’s response is an incomplete or oversimplified narrative based on text as a stimulus.  
- Introduces a vague situation and at least one character  
- Organizes events in a sequence but with some gaps or ambiguity  
- Attempts to use a narrative technique, such as dialogue and description, to develop experiences and events or show the response of characters to situations  
- Uses occasional signal words to indicate sequence  
- Provides a weak or ambiguous sense of closure  
- Attempts to integrate ideas or details from source material  
- Has frequent errors in usage and conventions that sometimes interfere with meaning* |

*Includes spelling and punctuation errors.
### Four-Point Holistic Rubric

**Genre: Narrative**  
*(continued)*

<table>
<thead>
<tr>
<th>Writing Trait</th>
<th>Points</th>
<th>Criteria</th>
</tr>
</thead>
</table>
| This trait examines the writer’s ability to effectively develop real or imagined experiences or events using effective techniques, descriptive details, and clear event sequences based on a text that has been read. | 1 | The student’s response provides evidence of an attempt to write a narrative based on text as a stimulus.  
- Response is a summary of the story  
- Provides a weak or minimal introduction of a situation or a character  
- May be too brief to demonstrate a complete sequence of events  
- Shows little or no attempt to use dialogue or description to develop experiences and events or show the response of characters to situations  
- Uses words that are inappropriate, overly simple, or unclear to convey any sense of event order  
- Provides a minimal or no sense of closure  
- May use few, if any, ideas or details from source material  
- Has frequent major errors in usage and conventions that interfere with meaning* |
| | 0 | The student will receive a condition code for various reasons:  
- Blank  
- Copied  
- Too Limited to Score/Illegible/Incomprehensible  
- Non-English/Foreign Language  
- Off Topic/Off Task/Offensive |

*Students are responsible for language conventions learned in their current grade as well as in prior grades. Refer to the language skills for each grade to determine the grade-level expectations for grammar, syntax, capitalization, punctuation, and spelling. Also refer to the “Language Progressive Skills, by Grade” chart in the Appendix for those standards that need continued attention beyond the grade in which they were introduced.*
## Seven-Point, Two-Trait Rubric

### Trait 1 for Informational/Explanatory Genre

<table>
<thead>
<tr>
<th>Writing Trait</th>
<th>Points</th>
<th>Criteria</th>
</tr>
</thead>
</table>
| Idea Development, Organization, and Coherence | 4 | The student’s response is a well-developed informative/explanatory text that examines a topic in depth and conveys ideas and information clearly based on text as a stimulus.  
- Effectively introduces a topic  
- Effectively develops the topic with multiple facts, definitions, and details  
- Groups related ideas together to give some organization to the writing  
- Effectively uses linking words and phrases to connect ideas within categories of information  
- Provides a strong concluding statement or section |
| | 3 | The student’s response is a complete informative/explanatory text that examines a topic and presents information based on text as a stimulus.  
- Introduces a topic  
- Develops the topic with some facts, definitions, and details  
- Groups some related ideas together to give partial organization to the writing  
- Uses some linking words to connect ideas within categories of information, but relationships may not always be clear  
- Provides a concluding statement or section |
| | 2 | The student’s response is an incomplete or oversimplified informative/explanatory text that cursorily examines a topic based on text as a stimulus.  
- Attempts to introduce a topic  
- Attempts to develop a topic with too few details, but not all of these are supported or relevant to the topic  
- Ineffectively groups some related ideas together  
- Uses few linking words to connect ideas, but not all ideas are well connected to the topic  
- Provides a weak concluding statement or section |
| | 1 | The student’s response is a weak attempt to write an informative/explanatory text that examines a topic based on text as a stimulus.  
- May not introduce a topic or topic is unclear  
- May not develop a topic  
- May be too brief to group any related ideas together  
- May not use any linking words to connect ideas  
- Provides a minimal or no concluding statement or section |
| | 0 | The student will receive a condition code for various reasons:  
- Blank  
- Copied  
- Too Limited to Score/Illegible/Incomprehensible  
- Non-English/Foreign Language  
- Off Topic/Off Task/Offensive |
## Seven-Point, Two-Trait Rubric

**Trait 2 for Informational/Explanatory Genre**

*Students are responsible for language conventions learned in their current grade as well as in prior grades. Refer to the language skills for each grade to determine the grade-level expectations for grammar, syntax, capitalization, punctuation, and spelling. Also refer to the “Language Progressive Skills, by Grade” chart in the Appendix for those standards that need continued attention beyond the grade in which they were introduced.
# Seven-Point, Two-Trait Rubric

## Trait 1 for Opinion Genre

<table>
<thead>
<tr>
<th>Writing Trait</th>
<th>Points</th>
<th>Criteria</th>
</tr>
</thead>
</table>
| **Idea**      | 4      | The student’s response is a well-developed opinion piece that effectively examines a topic and supports a point of view, with reasons, clearly based on text as a stimulus.  
  - Effectively introduces a topic and clearly states an opinion  
  - Creates an effective organizational structure to group reasons  
  - Provides clear, relevant reasons to support the opinion  
  - Uses linking words and phrases effectively to connect opinions and reasons  
  - Provides a strong concluding statement or section |
| **Development, Organization, and Coherence** | 3 | The student’s response is a complete opinion piece that examines a topic and supports a point of view based on text.  
  - Introduces a topic and states an opinion  
  - Provides some organizational structure to group reasons  
  - Provides reasons to support the opinion  
  - Uses some linking words to connect opinions and reasons  
  - Provides a concluding statement or section |
|              | 2 | The student’s response is an incomplete or oversimplified opinion piece that examines a topic and partially supports a point of view based on text.  
  - Attempts to introduce a topic and state an opinion  
  - Attempts to provide some organization, but structure sometimes impedes the reader  
  - Attempts to provide reasons that sometimes support the opinion  
  - Uses few linking words to connect opinions and reasons; connections are not always clear  
  - Provides a weak concluding statement or section |
|              | 1 | The student’s response is a weak attempt to write an opinion piece that examines a topic and does not support a text-based point of view.  
  - May not introduce a topic or state an opinion  
  - May not have any organizational structure evident  
  - May not provide reasons to support the opinion  
  - May not use any linking words to connect opinions and reasons  
  - Provides a minimal or no concluding statement or section |
|              | 0 | The student will receive a condition code for various reasons:  
  - Blank  
  - Copied  
  - Too Limited to Score/Illegible/Incomprehensible  
  - Non-English/Foreign Language  
  - Off Topic/Off Task/Offensive |
### Seven-Point, Two-Trait Rubric

MATHEMATICS

DESCRIPTION OF TEST FORMAT AND ORGANIZATION

The Georgia Milestones Mathematics EOG assessment is a criterion-referenced test, designed to provide information about how well a student has mastered the grade-level state-adopted content standards in Mathematics. The assessment consists of both operational items and field test items (newly written items that are being tried out and do not contribute to the student’s score). Each student will receive one of four Achievement Level designations, depending on how well the student has mastered the content standards. The four Achievement Level designations are Beginning Learner, Developing Learner, Proficient Learner, and Distinguished Learner. In addition to criterion-referenced information, the Georgia Milestones measures will also produce an estimate of how Georgia students are achieving relative to their peers nationally. The norm-referenced information provided is supplementary to the criterion-referenced Achievement Level designation and will not be utilized in any manner other than to serve as a barometer of national comparison. Only the criterion-referenced scores and Achievement Level designations will be utilized in the accountability metrics associated with the assessment program (such as student growth measures, educator-effectiveness measures, or the CCRPI).

The table on the following page outlines the number and types of items included on the Grade 3 Mathematics EOG assessment.
### Grade 3 Mathematics EOG Assessment Design

<table>
<thead>
<tr>
<th>Description</th>
<th>Number of Items</th>
<th>Number of Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>1-point Selected-Response and Technology-Enhanced Items(^1,2)</td>
<td>42</td>
<td>42</td>
</tr>
<tr>
<td>2-point Technology-Enhanced Items(^1)</td>
<td>8</td>
<td>16</td>
</tr>
<tr>
<td>Field Test Items(^3)</td>
<td>5</td>
<td>0</td>
</tr>
<tr>
<td><strong>Total(^4)</strong></td>
<td><strong>55</strong></td>
<td><strong>58</strong></td>
</tr>
</tbody>
</table>

\(^1\) **Technology-Enhanced**: Possible variants of the technology-enhanced item types used for Mathematics include multiple-part selected-response, multiple-select, drag-and-drop, drop-down, graphing, and keypad-input.

\(^2\) **1-point Selected-Response and Technology-Enhanced Items**: The ratio of selected-response to technology-enhanced items may vary. The target range of 1-point technology-enhanced items is 0 to 5.

\(^3\) **Field Test Items**: Field test items may include 1-point selected-response, 1-point technology-enhanced, and 2-point technology-enhanced items.

\(^4\) **Total**: Of the total 55 items, 50 contribute to the student’s Mathematics score.

The test will be given in two sections. Students may have up to 65 minutes per section to complete Sections 1 and 2. The total estimated testing time for the Grade 3 Mathematics EOG assessment ranges from approximately 60 to 130 minutes. Total testing time describes the amount of time students have to complete the assessment. It does not take into account the time required for the test examiner to complete pre-administration and post-administration activities (such as reading the standardized directions to students). Sections 1 and 2 must be scheduled such that both will be completed in a single day or over the course of two consecutive days (one section each day) and should be completed within the same week following the district’s testing protocols for the EOG measures (in keeping with state guidance).
CONTENT MEASURED

The Grade 3 Mathematics assessment will measure the Grade 3 standards that are described at www.georgiastandards.org.

The content of the assessment is organized into four groupings, or domains, of standards for the purposes of providing feedback on student performance. A content domain is a reporting category that broadly describes and defines the content of the course, as measured by the EOG assessment. The standards for Grade 3 Mathematics are grouped into four domains: Operations and Algebraic Thinking, Number and Operations (including Number and Operations in Base 10 and Number and Operations—Fractions), Measurement and Data, and Geometry. Each domain was created by organizing standards that share similar content characteristics. The content standards describe the level of expertise that Grade 3 Mathematics educators should strive to develop in their students. Educators should refer to the content standards for a full understanding of the knowledge, concepts, and skills subject to be assessed on the EOG assessment.

The approximate proportional number of points associated with each domain is shown in the following table. A range of cognitive levels will be represented on the Grade 3 Mathematics EOG assessment. Educators should always use the content standards when planning instruction.

GRADE 3 MATHEMATICS: DOMAIN STRUCTURES AND CONTENT WEIGHTS

<table>
<thead>
<tr>

</tbody>
</table>

The Standards for Mathematical Practice (1–8) will be embedded within items aligned to the mathematical content standards.
ITEM TYPES

The Mathematics portion of the Grade 3 EOG assessment consists of selected-response and technology-enhanced items.

A selected-response item, sometimes called a multiple-choice item, is defined as a question, problem, or statement that is followed by several answer choices, sometimes called options or response choices. The incorrect choices, called distractors, usually reflect common errors. The student’s task is to choose, from the choices provided, the best answer to the question (the stem). The Mathematics selected-response items will have four answer choices.

A technology-enhanced item is an innovative way to measure student skills and knowledge by using scaffolding within a multi-step process. Technology-enhanced items are worth one or two points. If the item is worth two points, partial credit is awarded for special combinations of responses that do not include all the correct answers. For Mathematics, there are a number of specific technology-enhanced item types being used:

- In multi-select items, the student is asked to pick two or three correct responses from five or six answer options.
- In multi-part items, the student responds to a question, statement, or prompt that has two or more parts.
- In drag-and-drop items, the student uses a mouse, touchpad, or touchscreen to move responses to designated areas on the screen.
- In drop-down menu items, the student uses a mouse, touchpad, or touchscreen to open a drop-down menu and select an option from the menu. A drop-down menu item may have multiple drop-down menus.
- In keypad-input items, the student uses the physical keyboard or the pop-up keyboard on a touchscreen to type a number, expression, or equation into an answer box.
- In coordinate-graph items, the student uses a mouse, touchpad, or touchscreen to draw lines and/or plot points on a coordinate grid on the screen.
- In line-plot items, the student uses a mouse, touchpad, or touchscreen to place Xs above a number line to create a line plot.
- In bar-graph items, the student uses a mouse, touchpad, or touchscreen to select the height of each bar to create a bar graph.
- In number-line items, the student uses a mouse, touchpad, or touchscreen to plot a point and/or represent inequalities.

Since some technology-enhanced items in this guide were designed to be used only in an online, interactive-delivery format, some of the item-level directions will not appear to be applicable when working within the format presented in this document (for example, “Move the clocks into the graph” or “Create a scatter plot”).

This icon identifies special directions that will help the student answer technology-enhanced items as shown in the format presented within this guide. These directions do not appear in the online version of the test but explain information about how the item works that would be easily identifiable if the student were completing the item in an online environment.
To give students practice using technology-enhanced items in an online environment very similar to how they will appear on the online test, visit “Experience Online Testing Georgia.”

1. Go to the website “Welcome to Experience Online Testing Georgia” (http://gaexperienceonline.com/).
2. Select “Test Practice.”
3. On the right side of the page, you will see “End-of-Grade (EOG) Spring Main.” Select “Online Tools Training” which appears underneath it.
4. Select “EOG Test Practice.”
5. Select “Technology Enhanced Items.”
6. Select “All Grades.”
7. You will be taken to a login screen. Use the username and password provided on the screen to log in and practice navigating technology-enhanced items online.

Please note that Google Chrome is the only supported browser for this public version of the online testing environment.
MATHEMATICS DEPTH OF KNOWLEDGE EXAMPLE ITEMS

Example items that represent the applicable DOK levels across various Grade 3 Mathematics content domains are provided.

All example and sample items contained in this guide are the property of the Georgia Department of Education.

Example Item 1
Selected-Response: 1 point
DOK Level: 1
Mathematics Grade 3 Content Domain: Measurement and Data
Standard: MGSE3.MD.6. Measure areas by counting unit squares (square cm, square m, square in., square ft, and improvised units).

The grid represents the floor of a rectangular closet.

<table>
<thead>
<tr>
<th>Key</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 square foot</td>
</tr>
</tbody>
</table>

What is the TOTAL area of the floor?

A. 10 square feet
B. 16 square feet
C. 24 square feet
D. 36 square feet

Correct Answer: C

Explanation of Correct Answer: The correct answer is choice (C) 24 square feet. There are 6 rows of 4 squares and $6 \times 4 = 24$. Choice (A) is incorrect because it adds the two side lengths. Choice (B) is incorrect because it counts the outside squares. Choice (D) is incorrect because it is the product of $6 \times 6$. 
Example Item 2

Selected-Response: 1 point

DOK Level: 2

Mathematics Grade 3 Content Domain: Number and Operations in Base Ten

Standard: MGSE3.NBT.1. Use place value understanding to round whole numbers to the nearest 10 or 100.

On Saturday, 353 people attended a school play. On Sunday, 489 people attended the school play.

Which expression will give the TOTAL number of people who attended the play on Saturday and Sunday rounded to the tens place?

A. 350 + 480
B. 350 + 490
C. 360 + 490
D. 360 + 500

Correct Answer: B

Explanation of Correct Answer: The correct answer is choice (B) 350 + 490 (Each number rounds to the nearest 10). Since 3 in the ones place is less than 5, 353 rounds down to 350; and 9 in the ones place is greater than 5, so 489 rounds up to 490. Choice (A) is incorrect because 489 should be rounded to 490. Choice (C) is incorrect because 353 should be rounded to 350. Choice (D) is incorrect because it rounds 489 to the nearest hundred and incorrectly rounds 353 to 360 instead of 350.
Example Item 3

Selected-Response: 1 point

DOK Level: 3

Mathematics Grade 3 Content Domain: Operations and Algebraic Thinking

Standard: MGSE3.OA.2. Interpret whole number quotients of whole numbers, e.g., interpret 56 ÷ 8 as the number of objects in each share when 56 objects are partitioned equally into 8 shares (How many in each group?), or as a number of shares when 56 objects are partitioned into equal shares of 8 objects each (How many groups can you make?).

Riaz wants to use the number sentence shown to solve a problem.

\[ 12 \div 3 = \underline{\hspace{1cm}} \]

Which problem could be solved using this number sentence?

A. A pet store has 12 cats. If 3 of them are sold, how many cats have not been sold?
B. A key chain can hold 3 keys. How many similar key chains are needed to hold 12 keys?
C. A necklace has 3 blue beads and 12 green beads. How many beads does the necklace have in all?
D. A sewing machine can sew 1 button in 3 seconds. How many seconds will it take to sew 12 buttons?

Correct Answer: B

Explanation of Correct Answer: The correct answer is choice (B) A key chain can hold 3 keys. How many similar key chains are needed to hold 12 keys? Choice (A) is incorrect because it uses subtraction instead of division. Choice (C) is incorrect because it uses addition instead of division. Choice (D) is incorrect because it uses multiplication instead of division.
MATHEMATICS ADDITIONAL SAMPLE ITEMS

This section has two parts. The first part is a set of 19 sample items for the Mathematics portion of the EOG assessment. The second part contains a table that shows for each item the standard assessed, the DOK level, the correct answer (key), and a rationale/explanation about the key and distractors. The sample items can be utilized as a mini-test to familiarize students with the item formats found on the assessment.

All example and sample items contained in this guide are the property of the Georgia Department of Education.
**Item 1**  
*Selected-Response: 1 point*

The students in an art class made 6 flowers. Each flower was made with 8 bottle caps as shown.

Which expression represents the TOTAL number of bottle caps needed to make the flowers?

A. $8 + 6$
B. $8 - 6$
C. $8 \times 6$
D. $8 \div 6$

**Item 2**  
*Selected-Response: 1 point*

An equation is shown.

$\square \div 12 = 7$

What number belongs in the box to make the equation true?

A. 5  
B. 19  
C. 74  
D. 84
Item 3
Selected-Response: 1 point

The picture graph shows what the weather was like in a city for 60 days.

<table>
<thead>
<tr>
<th>Weather</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>cloudy</td>
<td>☀ ☀</td>
</tr>
<tr>
<td>sunny</td>
<td>☀ ☀ ☀</td>
</tr>
<tr>
<td>rainy</td>
<td>☀ ☀ ☀ ☀ ☀ ☀</td>
</tr>
</tbody>
</table>

How many MORE days were rainy than cloudy?

A. 18
B. 21
C. 24
D. 33
Item 4

Selected-Response: 1 point

Look at the expression.

156 + 100 + 100 + 10 + 4

What is the sum of this expression?

A. 360  
B. 370  
C. 460  
D. 856

Item 5

Selected-Response: 1 point

Which expression is equivalent to 4 × 3 × 6?

A. 4 × 9  
B. 4 × 36  
C. 12 × 6  
D. 12 × 24
Item 6

Selected-Response: 1 point

Mark wants to measure the nails he found in his garage.

Which line plot shows the lengths of these nails to the nearest quarter inch?

Go on to the next page to finish item 6.
Item 6. Continued.

A. Nail Lengths

B. Nail Lengths

C. Nail Lengths

D. Nail Lengths
Item 7

Selected-Response: 1 point

Emily rounded the number of rubber ducks entered in a race to the nearest hundred. She says there are about 700 rubber ducks entered in the race.

Which of these could be the number of rubber ducks entered in the race?

A. 648
B. 671
C. 762
D. 783

Item 8

Selected-Response: 1 point

Which statement is NOT true about all squares and all rectangles?

A. They all have right angles.
B. They all have 4 sides and 4 angles.
C. They all have 4 sides of equal lengths.
D. They all have opposite sides that are parallel.
Item 9

Multi-Part Technology-Enhanced: 2 points

A bag of 54 marbles will be shared equally among some friends. The equation shows that each friend takes 9 marbles.

\[ 54 \div \square = 9 \]

Part A
How many friends share the bag of marbles?

A. 6  
B. 45  
C. 63  
D. 486  

Part B
Kim suggests they each take only 6 marbles so that they can share the bag of marbles with more people. How many people can now share the bag of 54 marbles?

A. 9  
B. 48  
C. 60  
D. 324
**Item 10**

*Multi-Select Technology-Enhanced: 2 points*

Mrs. Pike has pieces of paper that are different colors. Each piece of paper is a rectangle. The table shows the length and width for the different colors of paper.

**Mrs. Pike’s Colors of Paper**

<table>
<thead>
<tr>
<th>Color</th>
<th>Width (inches)</th>
<th>Length (inches)</th>
</tr>
</thead>
<tbody>
<tr>
<td>yellow</td>
<td>4</td>
<td>9</td>
</tr>
<tr>
<td>white</td>
<td>7</td>
<td>5</td>
</tr>
<tr>
<td>brown</td>
<td>10</td>
<td>4</td>
</tr>
<tr>
<td>green</td>
<td>6</td>
<td>6</td>
</tr>
<tr>
<td>orange</td>
<td>5</td>
<td>8</td>
</tr>
<tr>
<td>red</td>
<td>12</td>
<td>3</td>
</tr>
</tbody>
</table>

Select THREE colors of paper that each have an area of 36 square inches. (Area = Length × Width)

A. yellow
B. white
C. brown
D. green
E. orange
F. red
Mathematics

**Item 11**

Multi-Part Technology-Enhanced: 2 points

**Part A**

A city plans to build a new rectangular-shaped park. The perimeter of the park will be 940 meters. The width of the park will be 300 meters. \((\text{Perimeter} = \text{Length} + \text{Width} + \text{Length} + \text{Width})\)

What will be the length, in meters, of the new park?

A. 170
B. 340
C. 600
D. 640

**Part B**

The old city park is rectangular. It has a length of 350 meters. It has a width of 125 meters.

What is the perimeter, in meters, of the old city park?

A. 250
B. 475
C. 700
D. 950
**Item 12**

**Drag-and-Drop Multi-Part Technology-Enhanced:** 2 points

**Part A**

Alvin has 24 crayons.

Move boxes of crayons into the rectangle to represent Alvin’s crayons.

Use a mouse, touchpad, or touchscreen to move the boxes of crayons into the rectangle. Each box of crayons can be used up to 10 times.

*Go on to the next page to finish item 12.*
Part B

Jen has 5 boxes of pencils. Each box contains 8 pencils.

How many pencils does Jen have?

A. 3
B. 13
C. 40
D. 58

Use a mouse, touchpad, or touchscreen to select a response.
**Item 13**

Drag-and-Drop Multi-Part Technology-Enhanced: 2 points

**Part A and Part B**

**Part A**

Move numbers into each box to create an expression that is equivalent to $4 \times 16$.

![Drag-and-Drop Multi-Part Technology-Enhanced: 2 points](image)

**Part B**

Move numbers into each box to create an expression that is equivalent to $5 \times 2 \times 7$.

![Drag-and-Drop Multi-Part Technology-Enhanced: 2 points](image)

Use a mouse, touchpad, or touchscreen to move a number into each box. Each number may be used 3 times in Part A and twice in Part B.
**Item 14**

Drag-and-Drop Multi-Part Technology-Enhanced: 2 points

**Part A**

Use a mouse, touchpad, or touchscreen to move numbers onto the lines. Each number can be used once.

*Go on to the next page to finish item 14.*
Item 14. *Continued.*

**Part B**

A pattern is shown.

\[1, 6, 11, 16, 21, \ldots\]

Which rule can be used to find the next number in the pattern?

- [ ] add 5
- [ ] add 10
- [ ] multiply by 6
- [ ] multiply by 11

Use a mouse, touchpad, or touchscreen to select a response.
**Item 15**

**Coordinate-Graph Multi-Part Technology-Enhanced:** 2 points

**Part A**

A rectangle is drawn on the grid.

Draw two line segments to partition the rectangle so that each part is $\frac{1}{4}$ of the rectangle.

Use a mouse, touchpad, or touchscreen to draw line segments. At most 2 line segments can be drawn.

*Go on to the next page to finish item 15.*
Item 15. *Continued.*

Part B

The circle shown is partitioned equally.

Which fraction represents one part of the circle?

- 1/8
- 1/6
- 1/4
- 1/3

Use a mouse, touchpad, or touchscreen to select a response.
**Item 16**

**Line-Plot Technology-Enhanced:** 2 points

Alleen measures the lengths, in inches, of the four binder clips shown.

Complete the line plot by adding an X to represent the lengths, in inches, of each of the four binder clips.

Use a mouse, touchpad, or touchscreen to add Xs to the line plot. At most 4 Xs can be plotted for each length.
**Item 17**

**Drop-Down Technology-Enhanced:** 2 points

A store opens at the same time every morning and closes at the same time every evening. The times are shown.

![Clock](image)

Use the drop-down menus to complete the statements about the store.

The store opens at [ ] every morning and closes at [ ] every evening.

The store is open for [ ] hours and 30 minutes each day.

Use a mouse, touchpad, or touchscreen to click the arrow beside each of the three blank boxes. When you click the arrow, a drop-down menu will appear, showing you all the possible options for that blank box. Each drop-down menu with its options is shown below.

The store opens at [ ] every morning and closes at [ ] every evening.

The store is open for [10:00, 11:00, 12:00] hours and 30 minutes each day.

The store is open for [3, 4, 6, 8, 9] hours and 30 minutes each day.
Item 18

Keypad-Input Multi-Part Technology-Enhanced: 2 points

Part A

Kyoko has a vegetable garden.

Part A  Kyoko’s garden has 40 plants in equal rows. There are 8 plants in each row.

Create an expression to represent the number of rows of plants in Kyoko’s garden.

Use a mouse, touchpad, or touchscreen to enter a response.

Go on to the next page to finish item 18.
Item 18. *Continued.*

**Part B**

Kyoko has a vegetable garden.

**Part B** Kyoko has $60 to buy new plants. The price of each plant is $9.

What is the greatest number of plants Kyoko can buy?

Use a mouse, touchpad, or touchscreen to enter a response.
**Item 19**

**Number-Line Technology-Enhanced:** 1 point

Plot a point on the number line to represent $\frac{4}{6}$.

Use a mouse, touchpad, or touchscreen to plot a point on the number line. Only 1 point can be plotted.

<tr>
<td>1</td>
<td>MGSE3.OA.1</td>
<td>2</td>
<td>C</td>
<td>The correct answer is choice (C) $8 \times 6$. The students will need 6 groups of 8 bottle caps, which can be represented with multiplication. Choices (A), (B), and (D) use incorrect operations to relate the numbers.</td>
</tr>
<tr>
<td>2</td>
<td>MGSE3.OA.4</td>
<td>2</td>
<td>D</td>
<td>The correct answer is choice (D) 84. The number in the box is the product of 7 and 12, which is 84. Choice (A) is incorrect because it is the difference between 12 and 7. Choice (B) is incorrect because it is the sum of 12 and 7. Choice (C) is the result of failing to regroup the ones when multiplying.</td>
</tr>
<tr>
<td>3</td>
<td>MGSE3.MD.3</td>
<td>2</td>
<td>B</td>
<td>The correct answer is choice (B) 21. Each circle represents 6 days. There are $5 \frac{1}{2}$ circles for rainy, so 33 days were rainy. There are 2 circles for cloudy, so 12 days were cloudy. $33 - 12 = 21$. Choice (A) is incorrect because it compares the wrong categories. Choice (C) is incorrect because it counts 6 circles for rainy days instead of $5 \frac{1}{2}$. Choice (D) is incorrect because it is the number of rainy days.</td>
</tr>
<tr>
<td>4</td>
<td>MGSE3.NBT.2</td>
<td>1</td>
<td>B</td>
<td>The correct answer is choice (B) 370. Choice (A) is the result of adding the 4 and 6 in the ones place to get 0 instead of 10. Answer choices (C) and (D) are the results of incorrect place value of 10 as 100. Choice (D) has an addition place value error of 4 as 400.</td>
</tr>
<tr>
<td>5</td>
<td>MGSE3.OA.5</td>
<td>2</td>
<td>C</td>
<td>The correct answer is choice (C) $12 \times 6$. By the associative property of multiplication, $4 \times (3 \times 6) = (4 \times 3) \times 6 = 12 \times 6$. Choice (A) is incorrect because it is the result of adding 3 and 6 instead of multiplying. Choice (B) is incorrect because it combines the 3 and 6 to become 36 and multiplies it by 4. Choice (D) is incorrect because it multiplies both 3 and 6 by 4.</td>
</tr>
<tr>
<td>6</td>
<td>MGSE3.MD.4</td>
<td>2</td>
<td>D</td>
<td>The correct answer is choice (D). There are four nails that measure $1 \frac{3}{4}$ inches. There is one nail that measures $2 \frac{1}{4}$ inches. There are two nails that measure 3 inches. Choices (A), (B), and (C) are incorrect because the nails are measured incorrectly and/or the lengths are plotted incorrectly.</td>

<td>Explanation</td>
</tr>
<tr>
<td>------</td>
<td>-----------------</td>
<td>-----------</td>
<td>----------------</td>
<td>-------------</td>
</tr>
<tr>
<td>7</td>
<td>MGSE3.NBT.1</td>
<td>2</td>
<td>B</td>
<td>The correct answer is choice (B) 671. To round to the nearest hundred, look at the digits in the tens place. If the digit is 5 or greater, round the hundreds place up. Since 7 is greater than 5, 671 rounds to 700. Choice (A) is incorrect because 648 rounds to 600. Choices (C) and (D) are incorrect because they round to 800.</td>
</tr>
<tr>
<td>8</td>
<td>MGSE3.G.1</td>
<td>1</td>
<td>C</td>
<td>The correct answer is choice (C) They all have 4 sides of equal lengths. All rectangles have two pairs of sides of equal length, but only squares have four sides of equal length. Choices (A), (B), and (D) are incorrect because they are true statements about all squares and all rectangles.</td>
</tr>
</tbody>
</table>
| 9    | MGSE3.OA.4      | 3         | Part A: A, Part B: A | Part A: The correct answer is choice (A) 6. The inverse of division is multiplication, so 9 × 6 is 54. Choice (B) is incorrect because it uses subtraction. Choice (C) is incorrect because it uses addition. Choice (D) is incorrect because it multiplies 54 by 9.  
Part B: The correct answer is choice (A) 9. The number 54 divided by 6 is 9. Choice (B) is incorrect because it uses subtraction. Choice (C) is incorrect because it uses addition. Choice (D) is incorrect because it multiplies 54 by 6. |
| 10   | MGSE3.MD.7b     | 2         | A/D/F          | The correct answers are choices (A), (D), and (F). Choice (A) is correct because 4 multiplied by 9 is 36. Choice (D) is correct because 6 multiplied by 6 is 36. Choice (F) is correct because 12 multiplied by 3 is 36. Choice (B) is incorrect because 7 multiplied by 5 is 35. Choice (C) is incorrect because 10 multiplied by 4 is 40. Choice (E) is incorrect because 5 multiplied by 8 is 40. |
| 11   | MGSE3.MD.8      | 2         | Part A: A, Part B: D | Part A: The correct answer is choice (A) 170. Remove the two widths from the perimeter to get 940 – 300 – 300 = 340. This is the sum of two lengths, so divide by 2 to determine that one length is 170. Choice (B) is incorrect because it is the total of both lengths. Choice (C) is incorrect because it is the sum of the two widths. Choice (D) is incorrect because it is the difference between the perimeter and one width.  
Part B: The correct answer is choice (D) 950. Perimeter is adding all the sides together, so 350 + 125 + 350 + 125. Choice (A) is incorrect because it is the sum of two widths. Choice (B) is incorrect because it is the sum of one width and one length. Choice (C) is incorrect because it is the sum of two lengths. |

### Item 12

#### Scoring Rubric

<table>
<thead>
<tr>
<th>Points</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>The student correctly answers both Part A and Part B.</td>
</tr>
<tr>
<td>1</td>
<td>The student correctly answers either Part A OR Part B.</td>
</tr>
<tr>
<td>0</td>
<td>The student does not correctly answer either part.</td>
</tr>
</tbody>
</table>

#### Exemplar Response

**Part A**

Three possible correct responses are shown below.

![Diagram](image1)

OR

![Diagram](image2)

**Go on to the next page to finish item 12.**
**Item 12**

OR

The boxes of crayons contain either 4 or 6 crayons each. To get 24 crayons, one way is to have 4 boxes of 6 crayons, represented by $4 \times 6$. Another way to get 24 crayons is to have 6 boxes of 4 crayons, or $6 \times 4$. The total of 24 can also be found by adding a combination of boxes together, like 2 boxes of 6 crayons and 3 boxes of 4 crayons, represented by $2 \times 6 + 3 \times 4$ or $6 + 6 + 4 + 4 + 4$.

**Part B**

The correct answer is choice (C) 40. Since each box contains 8 pencils and there are 5 boxes, there are 40 pencils ($8 \times 5 = 40$). Choice (A) is incorrect because it is the result of subtracting 5 from 8 instead of multiplying. Choice (B) is incorrect because it is the result of adding 8 and 5. Choice (D) is incorrect because it is the result of simply putting the 5 and 8 next to each other to create a new number, 58.
Item 13

Scoring Rubric

<table>
<thead>
<tr>
<th>Points</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>The student correctly answers both Part A and Part B.</td>
</tr>
<tr>
<td>1</td>
<td>The student correctly answers either Part A OR Part B.</td>
</tr>
<tr>
<td>0</td>
<td>The student does not correctly answer either part.</td>
</tr>
</tbody>
</table>

Exemplar Response

Part A

A possible correct response is shown below. There are other possible correct responses as well.

\[2 \times 4 \times 8 = 4 \times 16\]

1 2 3 4 5 6 7 8
9 10 11 12 13 14 15 16

The numbers 4 and 16 in the expression can both be factored further to create equivalent multiplication expressions. In the response shown, the 16 is factored into 2 × 8 and the 4 remains the same. Note that because of the commutative property of multiplication, the order of the factors in the answer does not matter. Therefore, the answer 2 × 8 × 4 would also be correct. Another possible response would be to factor 4 into 2 × 2 and multiply by 16 to get 2 × 2 × 16. Other possible responses are 4 × 4 × 4, 1 × 4 × 16, and 1 × 8 × 8. All of these expressions have a value of 64, so they are all equivalent.

Go on to the next page to finish item 13.
Item 13

Part B

A possible correct response is shown below. There are other possible correct responses as well.

\[(5 \times \boxed{7}) + (5 \times \boxed{7}) = 5 \times 2 \times 7\]

The multiplication expression \(5 \times 2 \times 7\) can be rearranged to be \(2 \times 5 \times 7\), and multiplying anything by 2 is the same as adding it to itself, so \(2 \times 5 \times 7\) is the same as \((5 \times 7) + (5 \times 7)\). There are other ways to get an equivalent expressions as well, such as \((5 \times 4) + (5 \times 10)\) or \((5 \times 2) + (5 \times 12)\). As long as the expression has a value of 70, it is equivalent to the given expression.
**Item 14**

**Scoring Rubric**

<table>
<thead>
<tr>
<th>Points</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>The student correctly answers both Part A and Part B.</td>
</tr>
<tr>
<td>1</td>
<td>The student correctly answers either Part A OR Part B.</td>
</tr>
<tr>
<td>0</td>
<td>The student does not correctly answer either part.</td>
</tr>
</tbody>
</table>

**Exemplar Response**

**Part A**

The correct response is shown below.

As shown by the “8, 10, 12” at the end, the pattern is skip counting by 2s. Since the pattern starts at 2, the two missing terms are 4 and 6.

**Part B**

The correct answer is choice (A) add 5. The rule must apply to each number in the pattern, starting with the first number, and adding 5 to each number given results in the next number in the pattern. Choice (B) is incorrect because adding 10 skips from 1 to 11 and does not include the number 6, which is in the pattern, plus it will miss every other number in the pattern. Choice (C) is incorrect because it works only for the starting number to get the next number (1 × 6 = 6), and it does not work for any of the following numbers in the pattern. Choice (D) is incorrect because it skips from the first number to the third number and does not work for any of the other numbers in the pattern.
**Item 15**

**Scoring Rubric**

<table>
<thead>
<tr>
<th>Points</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>The student correctly answers both Part A and Part B.</td>
</tr>
<tr>
<td>1</td>
<td>The student correctly answers either Part A OR Part B.</td>
</tr>
<tr>
<td>0</td>
<td>The student does not correctly answer either part.</td>
</tr>
</tbody>
</table>

**Exemplar Response**

**Part A**

A correct response is shown below.

The rectangle is partitioned into 4 equal-sized pieces, making each piece $\frac{1}{4}$ of the whole rectangle.

**Part B**

The correct answer is choice (B) $\frac{1}{6}$. The circle is partitioned into 6 equal-sized pieces, so each part represents 1 of the 6 pieces. Choice (A) is incorrect because it represents a circle partitioned into 8 pieces. Choice (C) is incorrect because it represents a circle partitioned into 4 pieces. Choice (D) is incorrect because it represents a circle partitioned into 3 pieces.
**Item 16**

**Scoring Rubric**

<table>
<thead>
<tr>
<th>Points</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>The student correctly plots all four X’s.</td>
</tr>
<tr>
<td>1</td>
<td>The student correctly plots three X’s.</td>
</tr>
<tr>
<td>0</td>
<td>The student does not correctly plot at least three X’s.</td>
</tr>
</tbody>
</table>

**Exemplar Response**

The correct response is shown below.

The lengths of the binder clips from shortest to longest are \( \frac{1}{2} \) inch, \( \frac{3}{4} \) inch, \( 1 \frac{1}{4} \) inches and 2 inches. The four Xs are placed above the hash marks that correspond to each length on the line plot.
Item 17

Scoring Rubric

<table>
<thead>
<tr>
<th>Points</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>The student correctly completes both statements.</td>
</tr>
<tr>
<td>1</td>
<td>The student correctly completes one of the statements.</td>
</tr>
<tr>
<td>0</td>
<td>The student does not correctly complete either of the statements.</td>
</tr>
</tbody>
</table>

Exemplar Response

The correct response is shown below.

The store opens at 10:00 $\text{\textbullet}^\circ$ every morning and closes at 6:30 $\text{\textbullet}^\circ$ every evening.

The store is open for 8 $\text{\textbullet}^\circ$ hours and 30 minutes each day.

This is the correct response because the analog clocks show the times 10:00 and 6:30 to represent the opening and closing time of the store. The elapsed time from 10:00 to 6:30 is 8 hours and 30 minutes.
Item 18

Scoring Rubric

<table>
<thead>
<tr>
<th>Points</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>The student correctly answers both Part A and Part B.</td>
</tr>
<tr>
<td>1</td>
<td>The student correctly answers either Part A OR Part B.</td>
</tr>
<tr>
<td>0</td>
<td>The student does not correctly answer either part.</td>
</tr>
</tbody>
</table>

Exemplar Response

Part A

The correct response is shown below.

This is the correct response because the context is dividing 40 plants into equal groups of 8.

Part B

The correct response is shown below.

This is the correct response because 60 divided by 9 is 6 with a remainder of 6. Kyoko cannot buy part of a plant, and she does not have enough money to buy a seventh plant.
Item 19

Scoring Rubric

<table>
<thead>
<tr>
<th>Points</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>The student correctly plots the point.</td>
</tr>
<tr>
<td>0</td>
<td>The student does not correctly plot the point.</td>
</tr>
</tbody>
</table>

Exemplar Response

The correct response is shown below.

The number line is divided into 6 parts, so each tick mark represents one-sixth. The point that represents $\frac{4}{6}$ is the fourth tick mark from 0.
