## CAREER PATHWAYS

### 1ST GRADE ACTIVITY BOOK

# About Career Pathways

## Activity Book

What do you want to be when you grow up? Children are asked this question often throughout their years in school. Many children will say a doctor, a lawyer, a teacher, a firefighter, while others will say “I don’t know”. Regardless of the answer, children start exploring careers as early as elementary school. As children start to take more classes, mature, and move through middle and high school, they become more aware of their individual interest. From there, they start to think about career possibilities and what they WILL be now that they are more grown up.

With this in mind, the Career & Technical Education Department of Savannah-Chatham County Public School System developed this activity book to bring awareness to the career preparation and career pathways available to children within this school system. The activities in this book are designed to be challenging and fun. This book will also enhance basic academic skills while raising awareness about work skills and career options.

Parents, Teachers, and Counselors are encouraged to use this activity book with children to explore career options. Parents, Teachers, and Counselors may visit [www.sccpss.com](http://www.sccpss.com) to obtain more information about Career Pathways and Career & Technical Education in Savannah, GA.

HB 713 mandates a comprehensive K-12 career development process. To support schools in fulfilling these requirements, the grade specific career awareness activities listed as an indicators on the College and Career Ready Performance Index (CCRPI), have been developed to assist students with career awareness.

The Georgia Department of Education has developed seventeen (17) elementary career awareness activities for local school systems to use as a guide to assist with the implementation of the College and Career Readiness Performance Indicators appropriate for the career awareness and career development indices. As an additional resource, The Georgia Department of Education has created an *Elementary Tracking Form* for HB 713 to assist local school systems in tracking completed and uncompleted career activities for transferring students. The form will provide accountability documentation for students as they move from one school or school system to another. It also provides a method for the career cluster activities facilitator to have a record of the activities that need to be completed by the student in a timely manner.

It is recommended that a designated person keep a record of completed activities as documentation, so that when a student transfers to a new school, the completed and uncompleted activities can be tracked and listed and the tracking form will follow the student to the new school. The tracking form helps with a consistency of record keeping for the local school systems as local schools need to maintain rolls per grade level of those students who have participated in career awareness activities.

This process will help ensure the legislative mandate of HB 713 is being met to enable students to graduate with a vision that will lead them successfully into the career planning process. Please remember that appropriate documentation should be maintained as a reporting requirement of the College and Career Ready Performance Index.
