Therapeutic Services - Public Safety Communications
<p>Careers in the Therapeutic Services pathway are focused primarily on changing the health status of the patient over time. Health professionals in this pathway work directly with patients and may provide care, treatment, counseling and health education information. National labor market information indicates that eight out of the top twenty fastest-growing occupations are in the Health Science industry. (OOH)</p> <p>Based on an aging population and a retiring workforce, the demand for health care workers will remain high through 2020. As the role of careers in Therapeutic Services change, professionals in this pathway will find increased opportunities to work independently. Additionally, an increasing number of career opportunities are becoming available outside of the traditional hospital setting.</p> <p>Educational levels vary from occupation to occupation. Most Health Science occupations require additional education after high school and require that potential employees acquire the appropriate certification and/or licensing.</p> <p>Workers in the Health Sciences industry must have a solid background in math, science, communications, and technical skills, be knowledgeable in their subject area, have the ability to communicate with others, and inspire trust and confidence.</p> <p>Occupations in the Health Sciences represent the largest and fastest-growing industry in the United States employing over 10 million workers in more than 200 careers.</p> <p>Police, fire, and ambulance dispatchers work in an emergency communication center. Most police, fire, and ambulance dispatchers have a high school diploma or GED. Additional requirements may vary.</p> <p>Many states require dispatchers to become certified. Employment of police, fire, and ambulance dispatchers is expected to grow by 12 percent from 2010 to 2020, about as fast as average for all occupations. A larger and older population is likely to mean more emergency calls and, therefore, a need for more dispatchers.</p>
