# PROGRAM OF STUDY: Commercial Fishing

This Program of Study may serve as a graduation guide for the next four plus years, along with other career planning and educational materials. Courses listed in this model may include recommended coursework and should be individualized to students’ educational and career goals. Each graduation plan needs to meet minimum high school graduation requirements. Dual Enrollment courses can be high school academic and/or career technical education courses.

### NOTE:
Students have many options to ENTER and EXIT from their academic studies into the workforce. When a student graduates from high school, they are eligible to choose one of many ENTRANCE POINT options: 1. Enroll in either a 2 or 4 year post-secondary program; 2. Enroll in an apprenticeship program or the military; or 3. Enter the workforce using technical skills learned in high school. When a student finishes a 2- or 4-year degree program, they may choose to EXIT and 1. Enroll in an apprenticeship program or the military; 2. Enroll in a professional university degree program; or 3. Enter the workforce using technical skills learned.

### Pathway Completers - Industry Credentialing for High School Students

Upon completion of sequenced courses in the Forest Natural Resources Management Pathway, students are eligible to complete the Industry-Recognized student credential for fulfillment of the End of Pathway Assessment. Secondary students completing the Forest Natural Resources Management pathway will be able to sit for the National Industry Credentialed assessment offered on-line from NOCTI and Precision. Once mastery is reached, students will receive recognition for completion and use this credential in conjunction with their job or continuing training. For specific assessment information, refer to: [http://bit.ly/AgricultureEOPA](http://bit.ly/AgricultureEOPA).
The commercial fisheries courses allow students to have prior experience before going into job fields such as marine biology, oceanography engineering, geographic information science, diesel mechanics, welding, carpentry, and fishing (just to name a few). Some groups that students may choose to have a career with include Coast Guard, Department of Natural Resources, National Oceanic and Atmospheric Administration, various marine extension offices, and various commercial fishing vessels.

Skill sets needed to perform a multitude of tasks on any commercial fishing vessel includes (but not excluded to) knowledge and experience in diesel mechanics, net mending, welding, carpentry, information technology, navigation, business, and communications.

Educational requirements in this field vary by job from high school diploma to graduate degrees (particularly for research-related jobs). Those who are interested in this field should be able to work independently and as a team. Students should also have a commitment to preservation and conservation along with good communication skills.

Completion of this pathway includes First Aid/CPR certification, possible internships during high school, along with experience that is vital to the safety of anyone that is involved in the commercial fisheries field.
