

# Resources for the Co-Teaching in the 3-D Classroom Video

**These resources go with the video on co-teaching in the 3-D science classroom.**

**April 15, 2019**

1. Co-teaching modules- Modules developed by the Georgia Department of Education special education team to go over how to use the co-teaching models, co-teach effectively, data analysis and start/maintain a co-teaching relationship. These can be accessed using the following links: [Co-teaching series](#) and additional [Co-teaching modules](#).
2. High leverage practices- The high leverage practices are practices that are considered to be highly effective for supporting students in the classroom. These can be accessed using the following link: [special education high leverage practices](#).
3. **General Education High Leverage Practices**- The list of practices can be found at the following link: [General Education High Leverage Practice List](#).
4. **General Education High Leverage Practices science information**- Application to Science Resources can be found at the following link: [General Education High Leverage-Science](#).
5. **High Leverage Practices in Special Education**- this site contains information about the high leverage practices. This site can be found at the following link: [High Leverage Practices in Special Education](#)
6. **A Framework for K-12 Science Education** - This book is available for download at the following link: [The Framework Book](#).
7. **STEM Teaching Tools**- These are short articles/tools with information about equity. Each of these tools has information about why the topic is important and how to address them in class. Stem teaching tool #15 and stem teaching tool #57 are the most general and provide information about promoting equity in the classroom. The following link will take you to the tools that relate to equity: [STEM Teaching Tools](#).
