

## Feeder Pattern Grant Requirement

A goal of *Literacy for Learning, Living, and Leading in Georgia* is to create systemic improvements; therefore, sub-grant awardees will strategically review data and prioritize implementation of changes by looking at how children may matriculate through the systems within a community.

Each LEA-Partnership must include a feeder system that includes at least one early education center (e.g., Head Start, Early Head Start, and/or Quality Rated (QR) child care (or a QR applicant), and/or Georgia PreK), a community partner organization, and schools serving students from Kindergarten through grade 12.

The Department of Early Care and Learning provides a searchable list of child care and Pre-K programs here: <http://families.decal.ga.gov/> and here: <http://families.decal.ga.gov/PreK/>

In addition, the U.S. Department of Health and Human Services has a searchable list of Head Start programs here: <https://eclkc.ohs.acf.hhs.gov/center-locator>

On the Fluid Review grant website, each LEA will be asked:

a) Yes or No:

\_\_\_\_\_ Have you included one feeder system in your application?

\_\_\_\_\_ Have you included additional sites and schools?

You will be asked to include the center/school name and school ID for any K-12 school included and the legal name/title of any early learning and community partners.
