Hearing and vision screenings are the responsibility of the general education program. Hearing and vision problems can go unnoticed and/or untreated, which impacts student's ability to succeed in the classroom.

Below is a suggested timeline for completion of the hearing and vision screenings for Grades 1, 3, 5, and 8, including the follow-up on the Certificate of Vision, Hearing, Dental, And Nutrition Screening (3300 Form).

If a student requires follow-up per the 3300 Form upon school entry, begin with **Step 1** as a follow up (rescreening) if not completed already.

**Step 1:** Conduct a Hearing and Vision Screening for designated grade levels. (completed by Oct 1st or within 30 school days upon school entry for new students)

**Step 2:** For students who need follow-up, the Local Education Agency (LEA) will complete rescreening procedures between 10-14 school days.

**Step 3:** If the student requires follow-up after the rescreening (Step 2), send home a parent notification letter (within 10 school days) to recommend next steps. (See Sample Letter)

**Step 4:** If the parent does not complete the follow-up from Step 3, send home a 2nd parent notification letter within 30 school days of the 1st notification.

**Step 5:** If parent follow-up has not been completed within 15 school days of the 2nd parent notification (Step 4), the LEA will provide the diagnostic evaluation for the student after obtaining informed parent consent.
