

## **Module 1: Introduction Transcript**

### **Training in the Use of the Occupational and Physical Therapy Tools: Modules Overview**

Hello my name is Elise Lynch and I am the state consultant for school based occupational therapists and physical therapists. Today this training tool is going to be discussing two documents created by the Department of Education to assist schools based physical therapists and occupational therapist in providing services for students with disabilities.

The first document is called the “Characteristics of Educationally Relevant Therapy and Medical/Clinical Therapy Model Guidance. The second **document** is the “Georgia Considerations for Educationally Relevant” tool, which was adopted from a Florida Model. We will be discussing each of these tools separately and for the purposes of this training all of the conversation applies only to students who have IEPs.
