

## **Activity 4.1**

### **Learning Style Inventory**

1. Review and Discuss the Learning Style Inventory Form (Search for other Learning Style Inventories if this one does not fit your needs).
2. Decide on a Plan to facilitate having students, or a student, complete the Learning Style Inventory.
3. Be sure to explain that you are administering this Inventory in order to gain an understanding of their learning style in order to better meet their needs as learners.
4. Use the data from the inventory to assist in developing a lesson plan that meets the needs of each of the learning styles necessary for the student or students. Be sure to assess student learning for this lesson.
5. Once you have taught the lesson you will want to use the assessment data from the activity to determine if students met the outcomes. You will also self-reflect or collaborate with a team of teachers that taught the same lesson to take notes of what was successful as well as any opportunities for improvement the next time the lesson is taught.
