A Closer Look at Strategies for Promoting School Attendance

Renee Mixon, Claire Smith, Dr. Deshonda Stringer

October 25, 2016
Overview

• Define chronic absenteeism
• Develop a multi-pronged approach to addressing chronic absenteeism
• Access tools, resources, and strategies to address chronic absenteeism
Table Talk

• Was attendance identified as a barrier during your district’s comprehensive data analysis?
• If yes, did you include action steps to address this barrier in your SSIP action plan?
• If no, is it possible that attendance was an underlying cause of another barrier that you addressed in your SSIP action plan?
What is Chronic Absenteeism?

• At your tables, come to a consensus on a definition.
Chronic Absenteeism

• “Missing at least 10% of school days in a year for any reason, excused or unexcused…”

US Department of Education

• How does this definition compare to the criteria used to calculate your district’s CCRPI score?
Consequences of Chronic Absenteeism

• An abundance of studies link chronic absence to academic achievement.

• Chronic absenteeism may prevent children from reaching early learning milestones.

• Irregular attendance can be a better predictor of whether students will drop out before graduation than test scores.

• Frequent absences from school can shape adulthood.

Chronic Absenteeism in the Nation’s Schools, (2016)
Understanding the Factors Contributing to Chronic Absence in Your School
(Revised – December 2010)

Once you have been able to collect data on the prevalence of chronic absence for your school (and ideally district-wide), it is important to unpack—and understand—the factors that lead children to miss school for extended periods of time. These factors can vary across schools, communities and groups of families. Developing a more informed picture of the story behind the statistics on prevalence is a critical step in developing effective interventions.

The strategies described below will help you to identify what is occurring in your school and community. The attached matrix also offers a framework for using these activities to answer key questions about factors that contribute to chronic absence, as well as what assets might be engaged to improve school attendance.

1. Examine data on chronic absence.
   Review and reflect upon your school and district data on chronic absence. Some issues to discuss include:

In your comprehensive data analysis, have you addressed:

• What is the district’s attendance data: 5 or fewer days; 6 to 15 days; more than 15 days?
• How discrepant are the attendance data across subgroups? If so, what are possible reasons for this discrepancy?
• Is there higher absenteeism for a particular content area? If so, is there a correlation between the content area and performance/retention?
• How do tardies impact performance in content classes?
• What is the correlation between teacher attendance and student attendance?
• What policies and processes impact attendance? Are those policies and processes consistent across all schools?
• What kinds of perception data could provide root causes for these trends?
Types of Data

- **Demographic Data**: How well do we know our customers?
  Some examples are enrollment data, SES Data, Graduation Data, Dropout Data.

- **Student Learning Data**: How well are students demonstrating what they know?
  Some examples are Milestones Data, Benchmark Data, EOG/EOC Data.

- **Perception Data**: Perceptions are real to those that have them.
  Some examples are Parent Surveys, School Climate Data.

- **Process Data**: The way we go about doing business.
  Some examples are instructional strategies, tiered supports for teachers and students.
Universal vs. Targeted

- **Universal** – applied to all schools and/or students
- **Targeted** – applied to selected schools and/or students
Develop a Multi-Pronged Approach for District and School

- School Actions/Strategies
- Family & Community Actions/Strategies
- Student Actions/Strategies
Effective Strategies for Districts and Schools

• **Districts**
  • Assess effectiveness of local policies and practices.
  • Identify exemplary schools as well as those needing extra support.

• **Schools**
  • Reinforce attendance strategies in small group and individual programs such as mentoring and tutoring.
  • Use case management and coaching.
  • Provide attendance data monitoring.
  • School/family/community partnerships.
  • Develop and maintain a comprehensive tiered approach to improving attendance.
Effective Strategies for Families, Communities, and Students

• **Families & Communities**
  - Involve parents for students with poor attendance.
  - Cultivate school/family/community partnerships.

• **Students**
  - Provide academic support.
  - Implement incentive programs.
  - Offer student engagement programs.
  - Help students overcome attendance barriers.
  - Encourage positive peer support.
# Self-Assessment

## School Attendance Practices: Self-Assessment Tool

Universal Attendance Supports

- **Tier I** supports are often sufficient to maintain the attendance of students missing less than 5 percent of school and improve attendance for students missing 5 to 10 percent.

- **Examples**
  - School-wide culture of good attendance.
  - Warm, engaging school climate where students feel welcomed and noticed.
  - Helping families recognize that missing just two days a month can cause a student to fall off track academically.

Preventing Missed Opportunity, 2016
Universal Strategies

Targeted Attendance Supports

- **Tier II** supports are early interventions designed to help moderately chronically absent students.

- **Examples**
  - Provide personalized early outreach.
  - Develop tailored action plans.
  - Connect to a caring adult or mentor.
  - Increase student engagement including afterschool programming.

Preventing Missed Opportunity, 2016
Targeted Attendance Supports

- **Tier III** supports involve strategies with intensive supports offered to chronically absent students who face the greatest challenges to getting to school.

- **Examples:**
  - Provide intensive case management.
  - Develop a coordinated, cross-agency approach.
  - Interventions depend upon students’ personal circumstances and grade level.
