(1) PROGRAM PURPOSE AND SERVICES

(a) The Georgia Network for Educational and Therapeutic Support (GNETS) is a service available within the continuum of supports for LEAs to consider when determining the least restrictive environment for students with emotional and behavioral disabilities. The main goal is to provide an option in the continuum of services that prevent children from requiring residential or other more restrictive placements. GNETS services are available for students with social-emotional disabilities, ages 5-21. Specifically, GNETS provides comprehensive educational and therapeutic support services to students who exhibit emotional/behavioral disorders (EBD) of a severity and frequency or duration such that the provision of education and related services in the general education environment has not enabled him or her to benefit educationally based on the IEP.

(b) GNETS services aim to support students with emotional and behavioral disabilities. These student’s behaviors may include but are not limited to, significant acting out, self-destructive, withdrawal and aggressive behaviors. Children receiving GNETS services are taught coping skills, behavior regulation, and adaptive behaviors, with a keen focus on developing positive interpersonal relationships with others.

(c) GNETS behavioral, social-emotional and academic supports are implemented with students for a greater duration, intensity, and frequency than what is typically delivered in a general education school setting. The supplemental aids and services available at GNETS must be appropriate and necessary in order for the child’s IEP team to consider services for the student in a GNETS program.

(d) GNETS programs will be staffed to meet the intensive needs of a unique population of students requiring intensive individualized supports, including providing appropriate therapeutic services identified in the IEP. The staff receive specialized training in skills designed to deescalate major disruptive behaviors and assist students with meeting behavioral, social-emotional, and academic goals established in their IEPs.

(e) GNETS Programs will collaborate with professionals from a variety of disciplines to promote the positive social-emotional well-being and academic achievement for children served based on the individual student’s IEPs.

(f) The IEP team will assess at least annually whether the student with disabilities is ready to transition to a less restrictive setting. Data should be reviewed to determine if the student is ready to receive a free appropriate education (FAPE) in the less restrictive setting with the use of appropriate special education and related services.
CONSIDERATION FOR GNETS SERVICES

(a) Consideration for GNETS services is determined by the student’s Individualized Education Program (IEP) team using the criteria set forth in IDEA regulations.

(b) IEP teams considering recommendation of GNETS Program services will, follow the notice requirements of IDEA, convene an IEP meeting. The IEP meeting will include a GNETS director or their designee from the GNETS program being considered. The GNETS director or designee must be knowledgeable of the behavioral, social-emotional and academic services available to meet the needs of any student considered for GNETS.

(c) An individual student is considered for GNETS Program services only if his or her IEP team recommends GNETS Program services based on the existence of all of following, which will be documented in the student’s education record:

i. Documentation indicating prior services in the full continuum of services available in a less restrictive environment and the student’s inability to receive FAPE in that environment.

ii. A Functional Behavioral Assessment (FBA) and/or Behavior Intervention Plan (BIP) administered within the past year.

iii. Documentation that a comprehensive evaluation or a more frequent reevaluation as required by IDEA has been completed within the last 2 years.

CONTINUUM OF GNETS SERVICE DELIVERY AND ENVIRONMENTS

(a) To the maximum extent appropriate, the IEP team must determine that specialized services in the GNETS Program are necessary for the student to receive FAPE. Removal from the general education setting will occur only when the nature or severity of the disability of the student is such that education in a general education setting with the use of supplementary aids and services cannot be achieved.

(b) The IEP team will consider the full spectrum of environments in which GNETS Program services may be delivered and determine whether the individual student is likely to receive FAPE in each environment, beginning with the least restrictive, and will place each individual student in the least restrictive educational environment as consonant with his or her IEP needs and strengths.

(c) The GNETS continuum of services by environment may be delivered as follows:

i. Services provided in the general education setting in the student’s Zoned School or other public school.
