EL Language Programs

ESOL Language Program

English Learners in Georgia Virtual School

COURSE APPLICATION PROCESS

Many local education agencies (LEAs) are using Georgia Virtual School (GAVS) as a viable option for virtual learning this fall. Consequently, GaVS is seeing an increase in enrollments, which includes growth in EL students as well. The following process (also on the [ESOL website](#)) must be followed to ensure GaVS teachers know that the student is an English learner needing language scaffolds, differentiation, and assessment accommodations as established in the recent [USED Fact Sheet on English Learners](#), May 2018.

Step 1: During the course application approval process, the GA Virtual School Facilitator must identify the student's classification

in the dropdown menu for each course application. Choose *ESL—English as a Second Language* **or** *English Learner: Monitored*.

Step 2: In addition, the EL student's most recent ACCESS test results, EL/TPC form, and English Language Development Plan must be uploaded to the student profile in the GaVS registration system. Choose the *Special Needs Document/Accommodations* from the Document Type dropdown menu.

ESOL Language Program – LEAs' Legal Obligations

Title VI of the Civil Rights Act of 1964 and EEOA

1. Monitor and evaluate EL students progress in English and academic grade-level knowledge;
2. Exit them when they are proficient in English; and
3. Monitor exited students to ensure they were not prematurely exited.

Evaluate the effectiveness of the LEA's ESOL Program to ensure EL students acquire English and that the program is reasonably calculated to allow ELs to attain parity of participation in the standard instructional program with a reasonable time period.

The student is identified as an EL and is placed in an ESOL program....now what?

1. Must ensure ELs participate **meaningfully** in curricular and extra curricular activities
 - Provide access to **core curriculum**
 - Academic deficits incurred while learning English may hinder equal participation.
 - Extra curricular: PreK, magnet, career/technical, counseling, AP, IB, Gifted/talented, online/distance learning, performing/visual arts, athletics, clubs, honor societies
2. Meet the needs of students whose parents waive ESOL.
3. Monitor EL students progress in school.

Curriculum & Instruction

WHAT WE KNOW

Vocabulary knowledge is the single greatest contributor to reading comprehension and thus a strong predictor of overall academic achievement.

--Kate Kinsella, Isabel Beck, Robert Marzano, Doug Fisher, et. al.

Effective means
that students
learn the words,
use the words,
and remember
the words.
~Kylene Beers

**Selecting
essential words**

**Explicitly
defining and
contextualizing
those words**

**Helping
students to
actively process
the information**

**Providing
multiple
exposures to
the words**

Where to Start?

TEACHER GUIDANCE

For teaching the Georgia Standards of Excellence (GSE)

**Available for
all grade levels**

	Eighth Grade GSE
	Reading Literary (RL)
	ELACC8RL10: By the end of the year, read and comprehend literature, including stories, dramas, and poems, at the high end of grades 6-8 text complexity band independently and proficiently.

Skills/Concepts for Students:

- Practice careful and attentive reading of both assigned texts and independent text choices
- Read a wide variety of texts, including a variety of styles, genres, literary periods, authors, perspectives, and subjects
- Use annotation and note-taking
- Read within appropriate time frame for extended text
- Choose works from multiple genres, cultures, and literary periods
- Consider keeping a notebook of texts read with notes, annotations, and any relevant student work produced
- Use self-correction when subsequent reading indicates an earlier miscue (self-monitoring and self-correcting)
- Read with a rhythm, flow, and meter that sounds like everyday speech (prosody)

Instructional Strategies for Teachers:

- Choose texts of appropriate complexity
- Require reading through multiple modes: group, pairs, individual, in class, out of class, via digital mediums, etc.
- Provide scaffolding on difficult texts through commentary and interpretation, group discussion, complementary visual texts, and professional annotations, as appropriate
- Require specific textual evidence for all claims and inferences about texts, even in informal discussion
- Include the work of Georgia authors, as appropriate

Sample Performance-based/Standards-based Task(s):

Conference with students to set personal literacy goals appropriate to each individual, including a suggested reading list (this list may include poems, films, and works of art as well). Students can keep a notebook which includes notes and personal commentary on each text read over the course of the year, including any relevant analyses or other work produced in relation to given texts. An extension of this activity can include students creating "book cards" that give plot, setting, characters, author, publication details, personal review, and summary of a text. These cards may be reproduced to provide each student with an extensive set of cards that include summaries of all books read by all classmates. Ideally, by the end of the year, each student has a reference library of notes on a number of books, useful for building overall literary expertise and breadth of knowledge of authors and titles, and from which to draw recommendations for continued independent reading

Suggested Key Terms:

Literary	Fiction	Informational	Non-Fiction	Genre
Claim	Plot	Setting	Character	Analysis
Annotation	Evidence	Inference	Summary	Prosody

Driving Practices & Unified Skillsets for ELA

This document contains holistic, standards-based skillsets for grades K-12. These unified skillsets support specific driving practices that are integral parts of meaningful and purposeful learning in English language arts.

June 2020

Grades 4-5

4-5 Unified Skillset:

- ~ Build the stamina and skills to read widely and deeply from a range of challenging fiction, informational texts, and other materials.
- ~ Build knowledge about subjects through informal research projects and respond analytically to literary and informational sources in other content areas.
- ~ Learn variations in word meanings: synonyms, antonyms, idioms, and words with more than one meaning.
- ~ Solidify essential language skills (roots, prefixes, suffixes) that are used to analyze the meanings of complex words.
- ~ Explain what books say—both explicitly and what is implied from its details.
- ~ Write effective summaries, book reports, essays, and descriptions of characters or events.

Driving Practice: *Acquire and Use Vocabulary.*

L.4: Word Meanings

L.5: Nuances in Meaning

L.6: Academic/Disciplinary Vocabulary

4 th Grade	5 th Grade
ELA.GSE.4.L4: Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on grade 4 reading and content, choosing flexibly from a range of strategies. <ul style="list-style-type: none"> a. Use context (e.g., definitions, examples, or restatements in text) as a clue to the meaning of a word or phrase. b. Use common, grade-appropriate Greek and Latin affixes and roots as clues to the meaning of a word (e.g., telegraph, photograph, autograph). c. Consult reference materials (e.g., dictionaries, glossaries, thesauruses), both print and digital, to find the pronunciation and determine or clarify the precise meaning of key words and phrases. 	ELA.GSE.5.L4: Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on grade 5 reading and content, choosing flexibly from a range of strategies. <ul style="list-style-type: none"> a. Use context (e.g., cause/effect relationships and comparisons in text) as a clue to the meaning of a word or phrase. b. Use common, grade-appropriate Greek and Latin affixes and roots as clues to the meaning of a word (e.g., photograph, photosynthesis). c. Consult reference materials (e.g., dictionaries, glossaries, thesauruses), both print and digital, to find the pronunciation and determine or clarify the precise meaning of key words and phrases.
ELA.GSE.4.L5: Demonstrate understanding of figurative language, word relationships, and nuances in word meanings. <ul style="list-style-type: none"> a. Explain the meaning of simple similes and metaphors (e.g., as pretty as a picture) in context. b. Recognize and explain the meaning of common idioms, adages, and proverbs. c. Demonstrate understanding of words by relating them to their opposites (antonyms) and to words with similar but not identical meanings (synonyms). 	ELA.GSE.5.L5: Demonstrate understanding of figurative language, word relationships, and nuances in word meanings. <ul style="list-style-type: none"> a. Interpret figurative language, including similes and metaphors, in context. b. Recognize and explain the meaning of common idioms, adages, and proverbs. c. Use the relationship between particular words (e.g., synonyms, antonyms, homographs) to better understand each of the words.

English Language Arts Georgia Standards of Excellence

The Georgia Standards of Excellence require that students gain, evaluate, and present increasingly complex information, ideas and evidence through listening and speaking as well as through media. The standards recognize that students must be able to use formal English in their writing and speaking but that they must also be able to make informed, skillful choices among the many ways to express themselves through language. It is important to note the impact of the standards on classroom instruction: **building knowledge** through **content-rich nonfiction**; reading, writing and speaking grounded in **evidence from the text**, both literary and informational; and regular practice with **complex text** and its **academic language**.

July 2020

NEW Resources

Distance Learning Resources

Sample learning plans with exemplar diagnostic assessments, evidence-based practices, resources, plugged and unplugged activities, and ideas for differentiation and acceleration for each grade and course.

Analytic Geometry/Geometry

[Analytic Geometry COMPREHENSIVE COURSE OVERVIEW](#)

[Geometry COMPREHENSIVE COURSE OVERVIEW](#)

Sample Mathematics Learning Plan

Big Idea/ Topic

- Experiment with transformations in the plane and develop an understanding of congruence in terms of rigid motion.

Standard(s) Alignment

MGSE9-12.G.CO.2 Represent transformations in the plane using, e.g., transparencies and geometry software; describe transformations as functions that take points in the plane as inputs and give other points as outputs. Compare transformations that preserve distance and angle to those that do not (e.g., translation versus horizontal stretch).

MGSE9-12.G.CO.3 Given a rectangle, parallelogram, trapezoid, or regular polygon, describe the rotations and reflections that carry it onto itself.

MGSE9-12.G.CO.4 Develop definitions of rotations, reflections, and translations in terms of angles, circles, perpendicular lines, parallel lines, and line segments.

MGSE9-12.G.CO.5 Given a geometric figure and a rotation, reflection, or translation, draw the transformed figure using, e.g., graph paper, tracing paper, or geometry software. Specify a sequence of transformations that will carry a given figure onto another.

Diagnostic Assessment

When completing the diagnostic assessment task found at the link below, students will translate, reflect, and rotate a shape about the origin. The student will also compare transformations to determine if figures are congruent.

[Analytic Geometry and Geometry Diagnostic Exemplar Tasks](#)

This assessment task can be used to diagnose students' level of understanding of the big idea and standards addressed in this learning plan.

Evidence-Based, Research-Based

Instructional Design

Many of these activities have been adapted from an Illustrative Mathematics lesson titled, "Equivalent Equations". Found here: <https://curriculum.illustrativemathematics.org/HS/teachers/1/2/6/preparation.html>

Engage

(Include an evidence-based instructional strategy that can be used as an introduction that mentally engages students to capture their interest, provides an opportunity to communicate what they know, and allow them to connect what they know to new ideas)

- **Synchronous** : Presented like a [Number Talk](#), write an equation on the board and have students think of an equivalent equation. They should be encouraged to remain quiet and think of multiple equivalent equations so that all students have time to think about their responses. Example: $6x + 9 = 12$. Responses might include: $2x + 3 = 4$, $3x + 4.5 = 6$, etc. After a few minutes, the teacher can record their responses and allow students to self-correct, listen to each other, and share strategies for finding equivalent equations. Extension: Ask students how they might represent the equation without using any numbers (i.e. pictorial representation). How do you know these equations are equivalent?
- **Asynchronous**
Using a tool such as [Flipgrid](#), present an equation to the students and instruct them to respond with an equivalent equation. They should then respond to a classmate with questions about their strategy, comments about how their equations are similar or different, an explanation of how their equations are equivalent, etc.
- **Unplugged/ Offline**
Consider having students keep a journal for daily math entries. The prompt for this day could be: Given the following equation, write as many equivalent equations as you can. How do you know when two equations are equivalent? How do you know when two equations are NOT equivalent? Support your response with at least three examples.

Explore

(Include an evidence-based instructional strategy that allows students to engage in hands-on activities to explore the new concept/big idea at a deep level)

- **Synchronous** – [Seesaw 3-Act](#) task by Graham Fletcher. [Click here](#) to read more about 3-Act tasks as a strategy for engaging students in more conceptual learning of mathematics.
- **Asynchronous** – The Seesaw 3-Act task has been reworked into an online [Desmos activity](#). [click here.](#)
- **Unplugged/ Offline** -- The Seesaw 3-Act task has been adapted into an [offline activity](#). Students can complete the activity like a worksheet. It would be great to encourage dialogue between the different questions, to whatever degree you have the ability to facilitate with your students.

Planning for Quality Instruction

- Engage
 - Synchronous
 - Asynchronous
- Explore
 - Unplugged/offline
- Apply
- Reflect

Equity Instructional Planning Look-For Document

- This document is to assist teachers in evaluating their lessons for equity during the planning process.
- This document can be found in the Teacher Resource Link (TRL) essential tool kit in the need to know bucket
- It can also be found at the following link [Look Fors document](#)

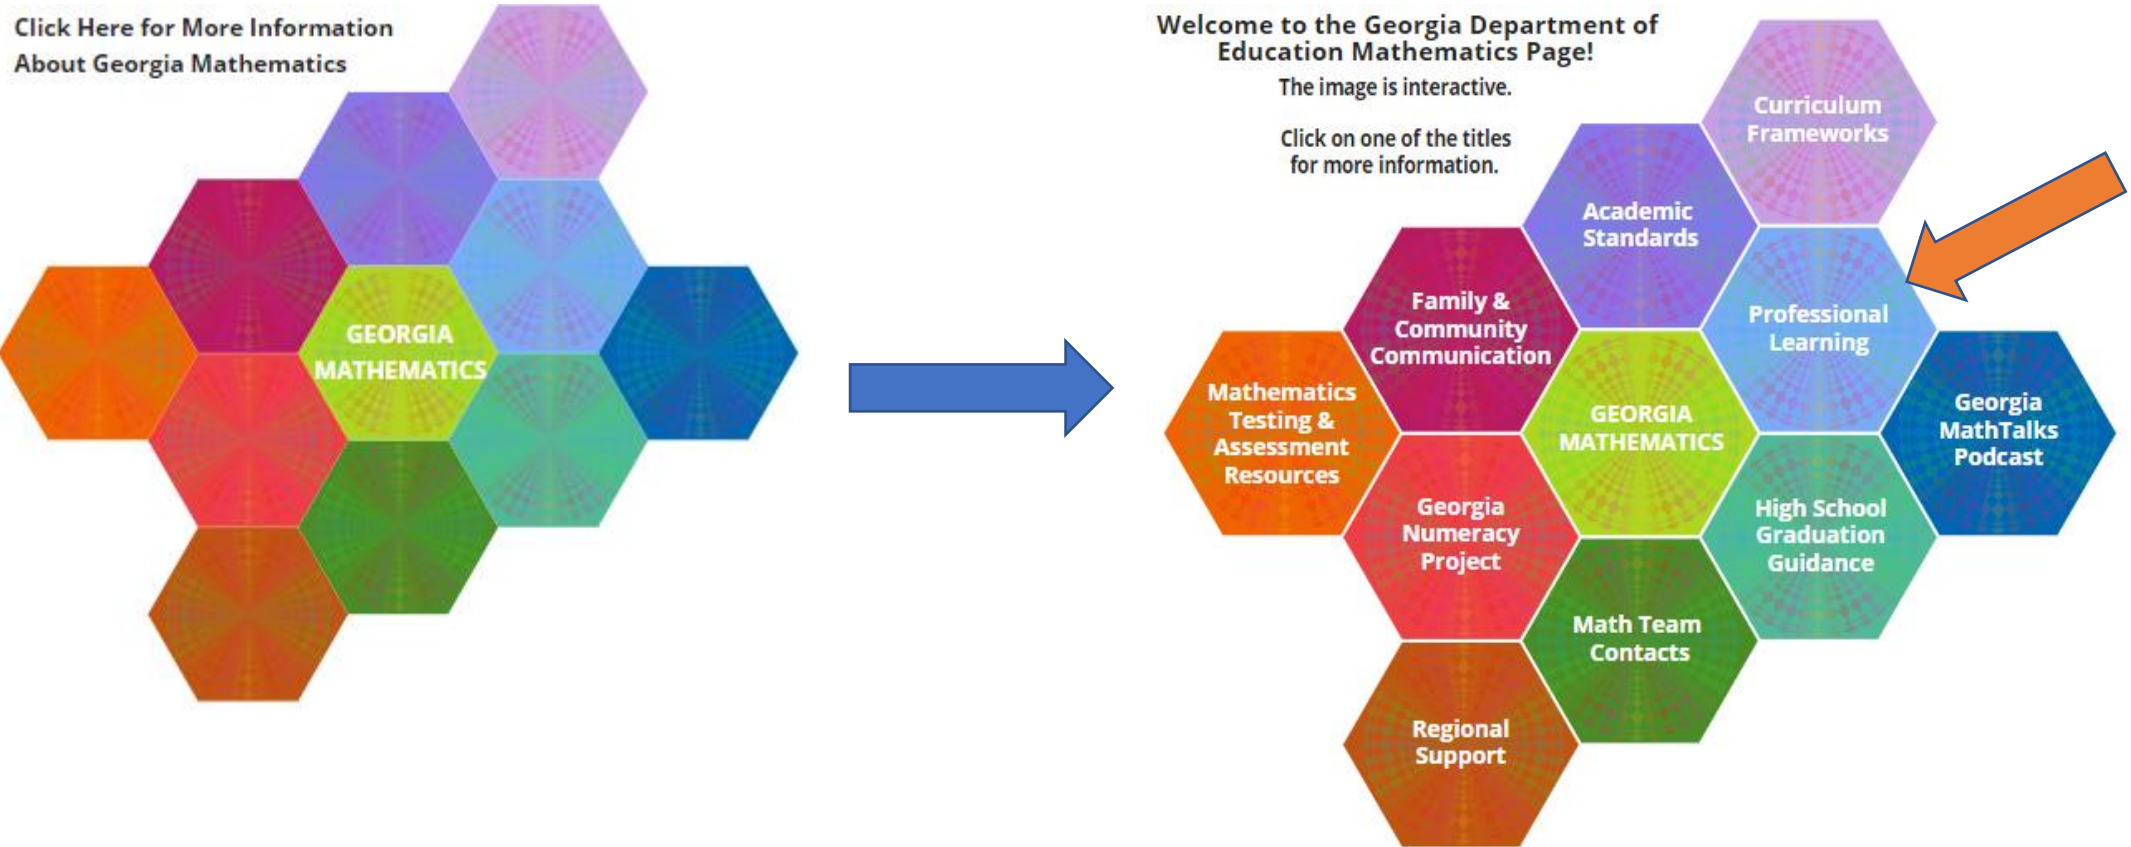

Equity Instructional Planning Look Fors

Big Ideas	Teacher Look Fors	Student Supports
Content Standards	<p>This lesson aligns to the Georgia Standards of Excellence.</p> <p>This lesson addresses all parts of the Georgia Standards of Excellence (not just the content).</p>	<p>All our students should be working toward learning the content that is outlined in the Georgia Standards of Excellence.</p> <p>Making content more accessible for all students can be accomplished using High Leverage Practices. These high leverage practices can be used in every classroom to assist students in learning the material. <i>Some examples of high leverage practices are providing scaffolded supports, use explicit instruction, use flexible grouping and use strategies to promote active student engagement.</i> More information is available on the CEEDAR-GA Project website. Use the following link to access that information: Georgia Department of Education</p>
Multiple Modalities	<p>This lesson utilizes the principles of Universal Design for Learning to assist ALL students in accessing, using and expressing the material.</p>	<p>Present materials in multiple ways. <i>This could include using articles, videos, verbally explaining to the student, making the lesson tactile, making the lesson visual and having inquiry.</i></p> <p>The students should be able to show their knowledge in multiple formats. <i>Some of these formats could include writing, verbally explaining, discussion, creating a play, drawing or creating a presentation.</i></p>
Coherent Instruction	<p>This lesson considers the needs of students in the classroom and provides for the needs of those students using differentiated instruction to reach ALL students.</p>	<p>Providing equity in the classroom can take many forms depending on the student population which leads to the importance of differentiated instruction. The teacher should consider student needs and then differentiate instruction. A few examples of things to consider when differentiating are included below:</p> <ul style="list-style-type: none"> • Add some time for students to process material. • Provide explicit instruction in using graphic organizers, other instructional materials and social-emotional behaviors. • Chunking the material. • Repetition may be required for some students. • Provide visual representations.
Individualized Education Program	<p>This lesson is providing Specially Designed Instruction for each student with disabilities in the classroom.</p>	<p>The accommodations that are laid out by the IEP are required by federal law and the IEP committee has determined that the student requires this accommodation to be successful in the general education classroom. Make sure to add in any accommodations that are required by each student's IEP before proceeding.</p> <p>Ensure that the lesson adapts content, methodology and delivery of instruction as part of Specially Designed Instruction to address each student's unique needs in the class based on their disability to ensure access of the child to the general curriculum so that students can meet the same education standards that apply to all children. More information is available at the following link Georgia Department of Education.</p>

Building Fluency in All Learning

Sample Instructional Activities/Assessments

Getting Aggressive

Description –

1. See the **European Map in the PowerPoint** that displays areas occupied by Germany. Have students use the attached image analysis sheets to make some observations and inferences. **The analysis sheet follows this activity.**
2. Next display the chart that shows the countries that Germany occupied during WWII. Have the students answer the chart analysis questions to make some observations and inferences. **The chart is located below.**
3. Ask students to make predictions about why Germany may have wanted to take over and occupy European countries.
4. Chart the answers and discuss pair/share in small or whole group.
5. If no student has given an answer about anger from the Treaty of Versailles, review part of the terms of the Treaty of Versailles (Germany had to take the blame for WWI, had to repay countries for the war, had restrictions of their military) and how that made Germans feel and how that may make them feel towards other countries.
6. Tell them that a government party in Germany led by a man made the following promises. Display the **promises PowerPoint slide**.
7. Ask students why the German people might support a party and man who made these promises.
8. Ask students if any of them know the name of the German government party or the man who led them during WWII. Get answers and then display the next slide with the answer. **PowerPoint slide of Hitler.**
9. Tell students that they are going to look at another map and make some observations and inferences. Show the map of Japan and the countries it began to occupy on the **PowerPoint slide**.
10. Have students write their observations and inferences using the **analysis sheet**.
11. Ask the following question to wrap up the lesson: With Germany and Japan starting to occupy other countries, what should the U.S. do? Give reasons for your answer.
12. Have students share their answers with one another.

Ideas for Differentiation:

Our goal is for all students to be actively engaged using speaking, writing, illustrating, reading, and listening. Below are changes to the lesson to help achieve that goal for students who need additional support. *Note: Be careful using these lessons for all students. If students are able to answer the questions on their own, it would be best to let them do this independently.*

Look Fors for Social Studies:
What to See in a Good Social Studies Inquiry Lesson

	Essential Question <ul style="list-style-type: none"> • Open-ended • Recurs over time • Transferable ideas • Requires justification • Higher order thinking 	
SWIRL	Speaking Writing Illustrating Reading Listening	
	Source Analysis <ul style="list-style-type: none"> • primary and secondary • documents • images • visual & audio media • artifacts 	
	Civic & civil discourse <ul style="list-style-type: none"> • debate • discussion • engagement • taking informed action 	
	Historical Thinking* <ul style="list-style-type: none"> • multiple perspectives • sourcing (why, when, how) • context • claims/evidence & guided argumentation 	

* historical thinking encompasses economic decision making, geospatial reasoning, and civic mindedness as well as thinking like an historian.

Resources to Support Content Knowledge

- Teacher Notes
- Teacher Content Tutorial Videos

SSUSH1 – Compare and Contrast the development of English settlement and colonization during the 17th century.

b. Explain the development of the Southern Colonies, including but not limited to reasons established, impact of location and place, relations with American Indians, and economic development.

The **Southern Colonies** included Virginia, Maryland, Carolina (which eventually split into North Carolina and South Carolina), and Georgia. The location of the Southern Colonies, with the region's rich soil and long growing season, fostered the development of strong agricultural producing colonies. Deep rivers and the distance of the fall line from the coast meant that inland farmers were able to ship tobacco, indigo, corn, and rice directly from their farms to European markets. The economic development of the Southern Colonies reflected this geological line. Subsistence family farms tended to develop north of the fall line. These farms grew primarily what the family needed along with a small cash crop used to purchase or barter for goods such as salt, gunpowder, lead, and iron tools. Commercial farms tended to develop south of the fall line and grew primarily high yield, labor intensive cash crops such as rice, tobacco, and indigo. As a result, slave labor was more common south of the fall line while less common north of the same line.

[Fall Line Map](#)

Relations with American Indians in the Southern Colonies began somewhat as a peaceful coexistence. As more English colonists began to arrive and encroach further into native lands, the relationship became more violent. The complexity of the interactions with American Indians in the Southern Colonies grew as the region's economic development grew. Once large scale cash crops of tobacco, rice, and indigo proved highly profitable in the mercantilist system, more colonists arrived seeking economic opportunity. The growing English population in the Southern Colonies required more of the American Indians' land for crop cultivation, which fueled increased tension between the groups.

Teachers may choose to use the following content concerning the development of specific Southern Colonies as examples to frame the components of this element for students. However, students are not responsible for the specific information that follows.

Distance Learning Resources

Resources to Support Inquiry Based Instruction

***Unplugged variation –** Have students illustrate a one page visual journal entry answering the essential question: There's Water, Water, Everywhere – What's the problem? The journal entry must:

- Tell a story of the causes of global water insecurity
- Describe the MOST important problem (and explanation of why it is more important than other issues)
- Organize the information in a way that is easy to follow
- Include supporting visuals
- Contain information for taking informed action: what can I/we do?

Opportunities for Extension: Mapping Informed Action: Using geographic information system software students can create maps of water issues in their communities, districts, state, and/or nation.

- USGS Water Quality in the Nation's Streams and Rivers – Current Conditions and Long-Term Trends https://www.usgs.gov/mission-areas/water-resources/science/water-quality-nation-s-streams-and-rivers-current-conditions?qt-science_center_objects=0#qt-science_center_objects

Student Learning Supports

Ideas for Differentiation:

Our goal is for all students to be actively engaged using speaking, writing, illustrating, reading, and listening. Below are changes to the lesson to help achieve that goal for students who need additional support. Note: Be careful using these lessons for all students. If students are able to complete the activities on their own, it would be best to let them do this independently.

- Consider allowing students to record their thoughts in a variety of ways: using the talk to text/dictate feature, making an audio recording of their responses, creating illustrations, annotating maps, etc.
- Consider reading research materials to students or copying materials into a Word document to allow that students may use the "read aloud" feature
- All of the videos on TED and YouTube have a CC feature for students that may need the text and two of the TED videos have printable transcripts in over 30 languages.

Professional Learning Video Series

Everyday Inquiry in Elementary Social Studies **NEW!**

In the [Everyday Inquiry in Elementary Social Studies](#) video series, educators gain inspiration and direction for how elementary teachers infuse their social studies instruction with the elements of inquiry. Think it can't be done? Check out examples from 1st, 3rd, 4th, and 5th grades that show engaged students doing the work of historians, geographers, economists, and political scientists. Watch how the teacher's role has evolved with the shift to inquiry and hear from leaders why they support this shift.

Social Studies Labs with Bruce Lesh

In the [Social Studies Labs with Bruce Lesh](#) video series, Bruce Lesh, author of the book [Why Won't You Just Tell Us the Answer?](#) shares research on historical inquiry, breaks down the process of thinking like a historian, and then models an inquiry lesson.

Marrying Social Studies and ELA: The Inquiry Method

In the [Marry Social Studies and ELA: The Inquiry Method](#) video series, educators explore the benefits of inquiry-based strategies in the inquiry process. In addition to the overview video, teachers will see a variety of inquiry-based strategies that dynamically blend content area knowledge with language arts skills.

RE STORYING HISTORY: CHILDREN'S/YOUNG ADULT LITERATURE, SOCIAL STUDIES, & INQUIRY

Are picture books just for elementary? How can the history they write about speak to us in 2020? How do authors and illustrators use historical thinking in their work? How can children's books be the key to building good citizens who act thoughtfully? Explore these questions and more with excellent authors and illustrators of children's books in our mini-series of STORYtimes.

Providing ELs Access to GA Virtual School

Joyce Bearden

Director of Knowledge and Resource Management
GaDOE Technology Services

Christina Hernández

Special Needs Specialist
GA Virtual School

Georgia Virtual Offerings

Schools and Students Choose GaVS for...

- Course availability and scheduling options in a teacher-led model
- A flexible and supportive learning environment
- Technology and accessibility tools to offer innovative approaches to learning
- Accommodations for special needs

Fall 2020 Registration is open through Sept. 24

Shared Resources and eSource

- Teacherless model for students who have previously been unsuccessful in a course
- 22 weeks to complete a course

Course Specific Webinars & PD courses:

- Digital Learning Days
- Synchronous Learning
- Special Needs
- Effective Online Teaching
- Customized Learning in the Online Classroom

Getting Started...Helpful Tips

1

Identify ELs and provide documentation

- Establish a process in your district to support the GaVS facilitator to identify ELs during the registration process
- Provide Access Test scores, EL/TPC, and the English Development Plan to GaVS facilitators to upload to the GaVS system

2

Request an observer account

- GaVS can provide local school ESOL teachers with GaVS system access to closely monitor student progress and support the student as needed

3

Ensure ongoing communication/collaboration

- Communication between the local school and the GaVS special needs team member and content area teachers throughout the semester is key

What Supports Can GaVS Provide?

Examples of Accommodations:

- Extended time on tests/quizzes
- Extended time on assignments
- Reduce coursework
- Break larger assignments into smaller parts
- Key terms/unit vocabulary lists
- Self-check, study, and review materials are available throughout the course content
- Regular communication with the students, parents, and local school facilitator
- Parent and local school access to student progress
- Allow the use of audio books

Features naturally integrated into GaVS course content/LMS:

- Content presented in a variety of formats and available 24/7
- Preview course material/content
- Due dates provided for the entire semester
- Ability to record audio/video for various assignments
- Integrate/utilize operating system, Microsoft 0365 and other accessibility tools, such as:
 - Text-to-speech
 - Dictation (speech-to-text)
 - Translation features
 - Spelling/grammar checks
 - MS Immersive Reader

What to Consider Before Enrolling

1. Necessary supports

- Consider the level of ESOL support the student will require in the specific course(s)/subject area(s) they are being enrolled into online to ensure appropriate placement.

2. Access to technology and internet

- Does the student have access to a device and reliable internet service?

3. Online Readiness

- Does the student have the basic technology skills necessary to navigate the computer and online environment independently?

ESOL and Title III State Activities

eWorkshops Available September 1, 2020

Self-Paced eWorkshops 2020-2021

WIDA Writing Rubric

Supports educators with using the WIDA Writing Rubric to work effectively with multilingual learners in their writing development. **For 1-12 ESL and classroom teachers.**

Time to complete: 10 hours

Doing and Talking STEM

Supports educators as they interact with the resources introduced on the Doing and Talking Math and Science website, which was developed by WIDA researchers. **For K-12 science, math, and ESL teachers.**

Time to complete: 6 hours

Classroom Teachers: Engaging Multilingual Newcomers

Explores community building and instructional strategies for teachers of multilingual learners who have recently arrived in the U.S. or who are new to U.S. schools. **For K-12 classroom teachers.**

Time to complete: 2 hours

Leading for Equity: Classroom Walkthrough

Introduces leaders to a classroom walkthrough resource that highlights practices and principles of exemplary and equitable teaching for multilingual learners. **For K-12 school leaders.**

Time to complete: 2 hours

Social Studies: Engaging Multilingual Learners through Inquiry

Focuses on the use of student and class assets to plan inquiry-based instruction, and explores how to consider the content and language needs of multilingual learners in social studies.

For K-12 social studies teachers and ESL teachers.

Time to complete: 3-4 hours

Developing Language for Learning in Mathematics

Illustrates the benefits of designing mathematics instruction to provide multilingual students opportunities to use language to express their ideas and co-construct ideas with others. **For K-12 math and ESL teachers.**

Time to complete: 4 hours

Coming soon!

eWorkshops Available Winter 2021

School Improvement Planning for Equitable Education of Multilingual Learners

Introduces leadership principles and practices to provide equitable educational opportunities for multilingual learners, based on a distributive leadership model. **For any K-12 school leader.**

Time to complete: 6-8 hours

Engaging with the WIDA Standards: A Collaborative Approach

Explores ways to use the WIDA ELD Standards, 2020 Edition to support multilingual learners' achievement and language development. **For K-12 educators.**

Time to complete: 4 hours

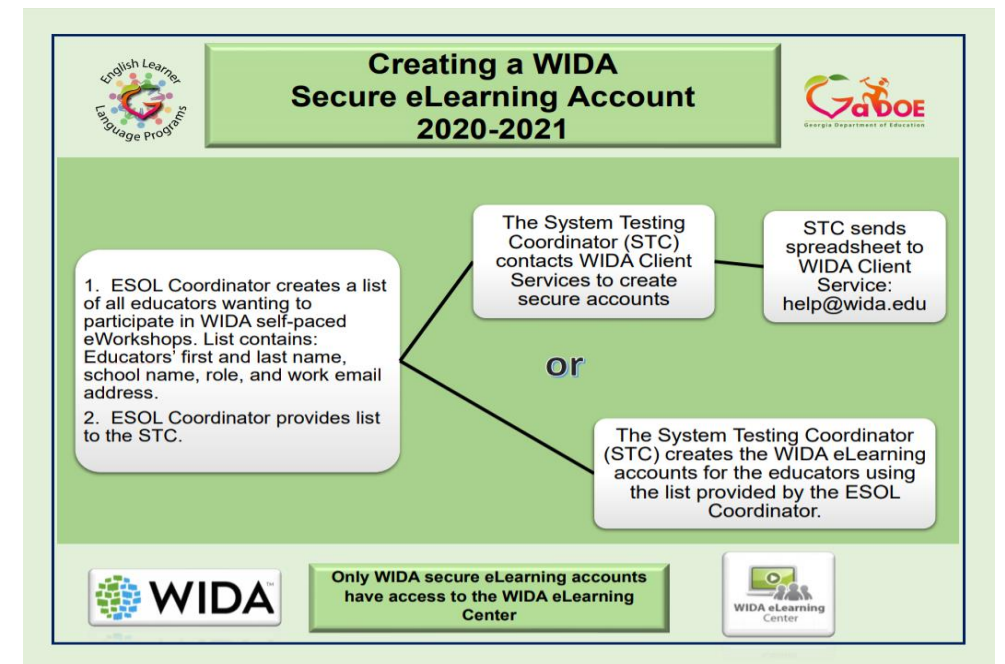

© 2020 The Board of Regents of the University of Wisconsin System, on behalf of WIDA

Crosswalk WIDA Resources TO TEACH GEORGIA STANDARDS

How will cross-walking WIDA Resources support Georgia K-12 learners at various stages of language development across content areas?

Federal Programs, in collaboration with *Curriculum & Instruction*, are set to launch a standards-to-standards crosswalk of the WIDA English Language Development Standards (ELDS) to the Georgia Standards of Excellence.

- **WIDA** – a consortium that provides language development standards, assessments and resources, highlighted in the *Can-Do Descriptors, Key Uses Edition*.
- **OpenSalt** – a repository for Georgia Standards of Excellence, categorized by clusters, domains, and content standards.
- **CASE** – a machine-readable format to manage and publish competency frameworks allowing the exchange of new global technical standards.
- **SLDS** – a secure single sign-on for Georgia educators to view crosswalks and gain access to student data.

☐

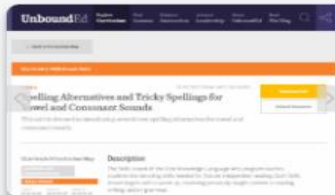

Using Tiered Companion Texts to Comprehend Complex Nonfiction Texts NEW

To read complex nonfiction texts independently, students must develop the necessary background knowledge and problem-solving skills to comprehend them. In this lesson, students learn to identify their own areas of weakness by initially reading a complex text independently. Then students read increasingly difficult nonfiction texts and learn how to problem solve through teacher modeling and group work. Using the ReadWriteThink Notetaker, they take notes on the texts and then have the opportunity to use the Notetaker independently with the most complex text. Teacher modeling helps them on the easy text, and collaborating with other students helps on the medium text.

New WIDA English Language Development (ELD) Standards, 2020 Edition

Coming
Winter
2021

What's staying the same?

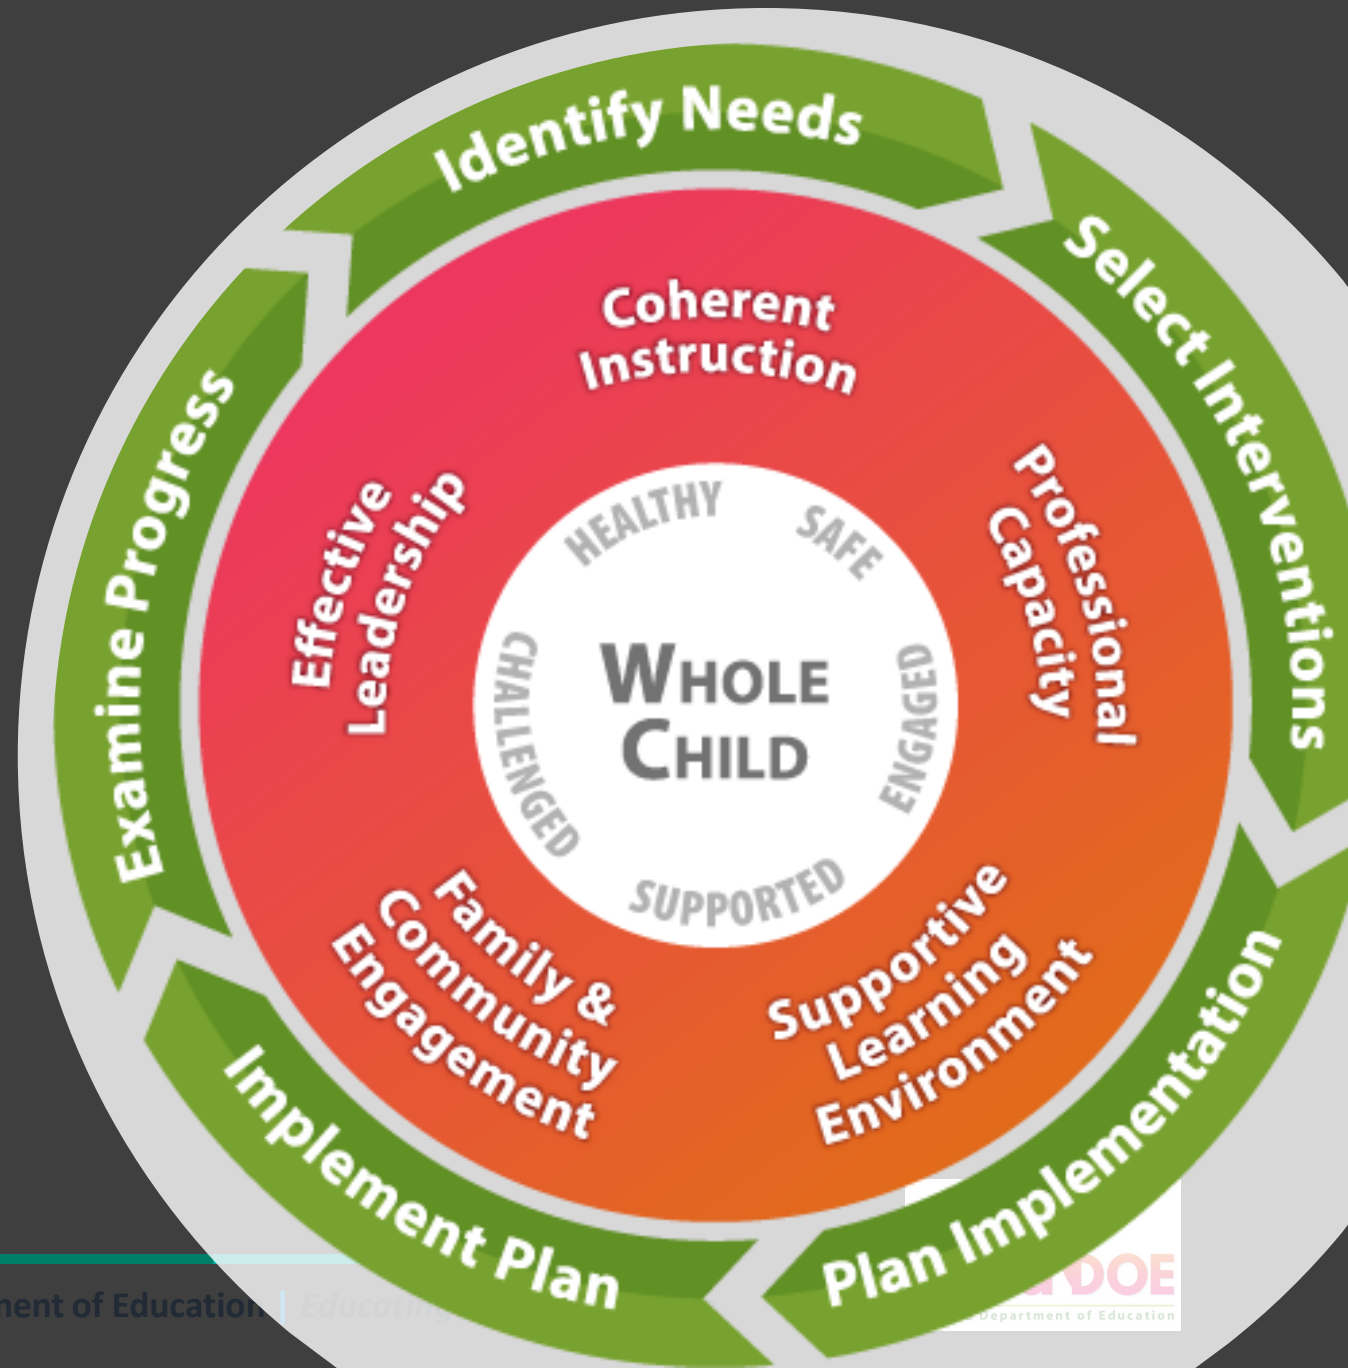

- 5 English Language Development Standard Statements
- 6 Levels of English Language Proficiency (ELP)
- Grade-Level Clusters: K, 1, 2-3, 4-5, 6-8, 9-12
- Key Language Uses
- Features of Academic Language

What's new?

- **Key Language Uses** - Narrate, Inform, Explain, Argue
- **Interpretive & Expressive** Communication Modes
- **Language Expectations** – goals for content-driven language learning (coded for easy reference)
- **Proficiency Level Descriptors** – what ELs can process & produce at each proficiency level
 - Language Functions & Features
 - Annotated Language Samples
 - Curricular Resources
