

Charter School Maintenance of Effort (MOE) Waiver Title I Program

The State Charter School/Local Educational Agency (LEA) noted below recognizes Federal program requirements for LEAs to verify documentation and maintenance of equivalent financial expenditures of state and local funds for their students from one year to the next. The expenditures from one year to the next should not exceed a 10% difference. Current FY21 Federal funding is contingent upon maintenance of effort (MOE) being documented between FY18 and FY19. Since this LEA was not in existence prior to FY18 as a State Charter School, it is impossible for this requirement to be met. In fact, this LEA will be unable to meet this requirement until it has been in existence three consecutive years. Signatures below recognize the above facts and the obligation of the LEA to meet MOE requirements when possible and to follow practices during the current budgeting years to result in MOE being maintained.
