

Student Growth Percentile (SGP)

Overall SGP Data Viewed from the Teacher Dashboard

- From the Teacher Dashboard, click the **Student Growth Percentile** icon to display the SGP chart and its corresponding legend.
Note: SGP is only available if a student has 2 years worth of comparative (Gr 3-8 the data must also be consecutive) Milestone data. Therefore teachers of 4th grade students and below will not generally have any SGP data to see.

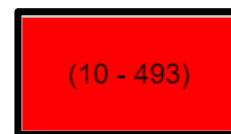

- Click the colored bands to see a roster report of students who fall within that growth category. The SGP chart provides scored results as well as target growth. Note: Results of low, typical or high growth are not an indicator of a student's level of achievement on the assessment.

- The numbers displayed on each colored band identify the actual growth percentile followed by the scale score. As seen in the example below, this student demonstrates growth of 10% compared to academic peers. The scale score on the assessment was 493.

**To find out more about how SGP is measured, go to GaDOE's publication [Understanding Student Growth Targets](#).

- As seen on the corresponding legend, the SGP chart displays the percentage of students broken down by growth percentiles. **Red** = Low Growth (1-34), **Green** = Typical Growth (35-65) and **Gold** = High Growth (66-99).
