

Student Roster - Achievement Column Legend

1. All Assessment results displayed in the Achievement column of the Student Rosters are color-coded. Each assessment can have a different color-code depending on what type of assessment was taken. Use the Legend feature at the top of the student roster page to get an explanation of the various assessment colors. The legend is collapsed when the page loads. Click the **+ symbol next to the word Legend** to expand the legend and view.

2. In addition to being color-coded, each test result box displays the subject of the assessment, the achievement level, and the scale score that the student achieved on the assessment. Only assessments that the student has taken in the currently filtered years will be displayed.

Note: EOG test result boxes display the scale score AND the grade conversion.
