Summary Dashboard

NEW- Now the Summary Dashboard in EL & Gifted displays all CURRENT students that have a “form”.

[Image of silhouettes climbing stairs with the text SLDS]
The Summary Dashboard inside of the EL Screener & the Gifted Eligibility applications have changed. Now when a user runs the Summary report, they will see ALL students that are currently enrolled in their school (or district).

Clicking on the Summary Dashboard (see above screenshot), the user will be taken to the Report feature. By default, the Updated Begin Date will be 1/1/2005 and the Updated End Date will be the current date (see below screenshot). So, this will include all students that have ever had a form created.

School users will see that the form is automatically set for that specific school, “All” Grade levels, “All” students, and “All” form status (see above). District users will see the Form Status has been preset to show “Screened” (or “Eligible” if the user is within the Gifted application). The only reason for this limit is because a district may have a lot of forms and the initial loading may take a minute or so for all records to load. District users can always change the dropdown to include “All” in the Form Status.
Users can use the various dropdowns in the header section to customize the report to fit their needs. For example, they can change the “Update Begin Date” to any date to create a report for a specific date range, such as the user may want a report for just this school year. Users can run a grade level report. Users can run a report for a specific “Form Status” (see the options for Form Status below).

Once the Report loads, users will see all the students that fit within the selected (or default) options. This will include any & all student(s) that have their GTID claimed within that school (or district). Now with so many districts using the EL Screener and/or the Gifted applications, the user will even see the forms that were created from some other school or district. In those cases, the other school/district will be displayed under the current school’s name (see the below screenshot).
