

1. You initiate the **hover hand** feature when you hold, or 'hover', the cursor over any data point on any chart in SLDS. The hover hand feature prompts a pop-up box that provides you with important information about the numbers in the chart.

Use this feature to accurately identify the number of students making up a percentage included in a specific color band. Extremely high and/or low percentages may be due to a very small number of students within that group.

2. Hovering over a hyperlink displays the type of report available when you click the link.

2012-2013 Active Schedule		Students Enrolled
27. Mathematics - 27.02 Mathematics/General Middle Grades (6-8)		93
