

Student Roster - Achievement Column Legend

1. The test result boxes in the **Achievement** column of the **Student Roster** are color-coded according to the legend at the top of the student roster. The legend will be collapsed when the page loads. Click the **+** symbol next to the word Legend to expand the legend and view.

2. In addition to being color-coded, each test result box displays the subject of the assessment, the achievement level, and the scale score that the student achieved on the assessment. Only assessments that the student has taken in the currently filtered years will be displayed.

Note: EOCT test result boxes display the scale score AND the grade conversion.
