

2023 Beyond the Core Readiness Indicator Course List

Elementary Beyond the Core: *Percent of students earning a passing score in fine arts, world language, career exploratory*, or computer science*

Middle School Beyond the Core: *Percent of students earning a passing score in fine arts, world language, physical education/health, career exploratory, or computer science*

The Beyond the Core indicator measures the percent of students (K – 8) earning a passing score in specified enrichment courses beyond the traditional academic core that expose students to a well-rounded curriculum. GaDOE applies a consistent definition of “passing” statewide to include students that earn a 70 or greater on a numeric scale, a “pass” on a pass/fail scale, a “meets standards”, an “exceeds standards”, and greater than an F on an A-F scale as outlined in documentation by Data Collections. Content areas for elementary school include fine arts, world language, career exploratory (CTAE)*, and computer science; middle school content areas include fine arts, world language, physical education/health, career exploratory (CTAE), and computer science. Elementary students may complete any eligible elementary or middle school level course. Middle school students may complete any eligible middle or high school level course. The eligible courses for the Beyond the Core indicator are included below.

All courses eligible for this indicator are included in the [State-Funded List of K-8 Subjects and 9-12 Courses](#) document and have State Board of Education-approved standards or nationally-recognized standards (such as AP or IB). Additional courses may be added as the course list is updated and will follow the same criteria as described above.

* *Career exploratory (CTAE) was added as an elementary content area beginning in 2022-2023.*
