

**Transportation, Distribution, and Logistics Career Cluster
Foundations of Marine Engine Technology
Course Number 47.58000**

Course Description

The Foundations of Marine Engine Technology is the foundational course for the Marine Engine Pathway. Students will be introduced to basic principles and skills associated with the field of marine engine service and repair. Students learn and apply basic skills including shop and boat safety, safe and appropriate use of tools and measuring devices, technical writing, shop management skills, and marine engine computer applications. Mastery of these standards through project-based learning and leadership development activities of SkillsUSA will help prepare students with a competitive edge for the marketplace. The pre-requisite for this course is advisor approval.

Course Standard 1

TDL-FMET-1

The following standard is included in all CTAE courses adopted for the Career Cluster/Pathways. Teachers should incorporate the elements of this standard into lesson plans during the course. The topics listed for each element of the standard may be addressed in differentiated instruction matching the content of each course. These elements may also be addressed with specific lessons from a variety of resources. This content is not to be treated as a unit or separate body of knowledge but rather integrated into class activities as applications of the concept.
