Agriculture, Food & Natural Resources Career Cluster Natural Resources Management Course Number: 03.41100

Course Description:

This course introduces conservation management and maintenance of natural resources and good stewardship of air, soil, water, land, fish, and wildlife resources for economic, recreation, and health purposes. Classroom and laboratory activities are supplemented through supervised agricultural experiences and leadership programs and activities.

Course Standard 1

AFNR-NRM-1

The following standard is included in all CTAE courses adopted for the Career Cluster/Pathways. Teachers should incorporate the elements of this standard into lesson plans during the course. The topics listed for each element of the standard may be addressed in differentiated instruction matching the content of each course. These elements may also be addressed with specific lessons from a variety of resources. This content is not to be treated as a unit or separate body of knowledge but rather integrated into class activities as applications of the concept.

Standard: Demonstrate employability skills required by business and industry.

The following elements should be integrated throughout the content of this course.

1.1 Communicate enectively through writing, speaking, insteming, reading, and interpersonal ability				
Person-to-Person	Telephone and	Cell Phone and	Communicating At	Listening
Etiquette	Email Etiquette	Internet Etiquette	Work	
Interacting with	Telephone	Using Blogs	Improving	Reasons, Benefits,
Your Boss	Conversations		Communication Skills	and Barriers
Interacting with	Barriers to Phone	Using Social Media	Effective Oral	Listening Strategies
Subordinates	conversations		Communication	
Interacting with	Making and		Effective Written	Ways We Filter

Cross-Cultural Etiquette			
Working in a Cubicle			

Support of CTAE Foundation Course Standards and Georgia Standards of Excellence L9-10RST 1-10 and L9-10WHST 1-10:

Georgia Standards of Excellence ELA/Literacy standards have been written specifically for technical subjects and have been adopted as part of the official standards for all CTAE courses.

Course Standard 2

AFNR-NRM-2

Explore, develop, and implement the comprehensive program of agricultural education, learn and demonstrate safe working habits in the agriculture lab and work sites, demonstrate selected competencies in leadership through the FFA and agricultural industry organizations, and develop plans for a Supervised Agricultural Experience Program (SAEP).

- 2.1 Illustrate the relationship of the FFA within the Agricultural Education model and describe the role and function of the organizational structure from the chapter to national level.
- 2.2 Design, implement, and document SAEP by recording steps, skills acquired, and financial information.
- 2.3 Demonstrate leadership and personal development skills through participation in the FFA.
- 2.4 Analyze skills, education requirements, income, and advantages and disadvantages of careers in natural resources management.
- 2.5 Explore the professional agricultural organizations associated with the course content.
- 2.6 Demonstrate safety practices when working in an outdoor environment.

Course Standard 3

AFNR-NRM-3

Recognize the importance of natural resources, determine demands, and identify the role of government in natural resources management.

- 3.1 Define natural resources (renewable and non-renewable) and explain the importance to humans.
- 3.2 Describe the effects of human activity on natural resources.
- 3.3 Compare and contrast conservation and preservation as related to natural resource management.
- 3.4 Identify government agencies involved in the management of natural resources.
- 3.5 List and describe specific government programs and regulations pertaining to natural resource management.

Course Standard 4

AFNR-NRM-4

Discuss and identify basic components of ecosystems, describe the relationship of those components to one another, and identify effects of human activities on ecosystems.

- 4.1 Discuss and define the elements and concepts of ecosystems.
- 4.2 Describe how ecosystems are impacted by human activity.
- 4.3 Describe and explain the elements and concepts of a forest ecosystem.
- 4.4 Describe how energy is transferred from one organism to another using the concepts of producer, consumer, decomposer, food web, food chain, and biotic pyramid.
- 4.5 Compare and contrast the concepts of sustainability and how multiple uses can help maintain Georgia's forest ecosystems.
- 4.6 Explain water cycles and describe aquatic ecosystems.
- 4.7 Identify types of wetlands and explain how they are impacted by human activity.

Course Standard 5

AFNR-NRM-5

Describe the properties of soil and nutrient analysis, determine the capability of the land and the effects of erosion, and describe soil stewardship in Georgia.

- 5.1 Explain the development of soil and how it functions.
- 5.2 Analyze the importance of slope, soil texture, erosion, and water movement in determining land capability and land use.
- 5.3 Differentiate between mechanical and vegetative soil erosion control.
- 5.4 Determine the types of soil degradation, as well as the underlying factors, such as erosion, agricultural pesticides and chemicals, and waste disposal.

Course Standard 6

AFNR-NRM-6

Determine the use of water resources, describe the hydrologic cycle and properties of water, and explain watersheds and their functions, as well as the reasons for monitoring water quality.

- 6.1 Describe the factors that affect water quality.
- 6.2 Identify possible factors that distort the natural balance of water quality.
- 6.3 Describe human activities that improve and maintain the quality of water.
- 6.4 Analyze industrial activities designed to improve and maintain water quality.
- 6.5 Analyze the impact that wetlands have on water quality.
- 6.6 Describe the association between water quality and watersheds.
- 6.7 Identify soil conservation practices which improve and maintain water quality.
- 6.8 Debate the impact of water conservation on water quality.

Course Standard 7

AFNR-NRM-7

Identify sources of waste and describe methods and procedures for managing that minimize environmental impact.

- 7.1 Discuss the different types of waste, as well as the criteria for classifying waste.
- 7.2 Explore the effect of agricultural pesticides.
- 7.3 Interpret the effect waste disposal has on soil properties and characteristics.
- 7.4 Explain how waste is managed, and different methods to minimize environmental impact.
- 7.5 Research ways that soil degradation could be limited.
- 7.6 Describe the steps in municipal wastewater treatment and handling.
- 7.7 Describe the different animal waste treatment and handling systems.

Course Standard 8

AFNR-NRM-8

Define wildlife, explain the importance of wildlife and wildlife management, and identify the role of government and private wildlife organizations in managing wildlife resources.

- 8.1 Define wildlife and differentiate between game and non-game species.
- 8.2 Describe wildlife management and compare and contrast wildlife management to other agricultural sciences.
- 8.3 Explain the importance of wildlife and the values society places on wildlife populations.
- 8.4 Report and debate the historical American attitudes concerning wildlife as a resource.
- 8.5 Describe major trends in wildlife management philosophies and practices.
- 8.6 Outline and explain the meaning, purpose, and importance of major pieces of U.S. legislation pertaining to the conservation of wildlife resources.

Georgia Department of Education

- 8.7 Identify groups and organizations with concern for wildlife and explain the official position regarding hunting and other wildlife management techniques.
- 8.8 Compare and contrast hunting to other conservation practices.
- 8.9 Demonstrate appropriate responses to hunting and firearm accidents.
- 8.10 Identify means by which hunting and firearms accidents may be prevented.
- 8.11 Demonstrate an understanding of written laws regulating hunting activity.
- 8.12 Demonstrate an understanding of hunter ethics and the importance to the well-being of wildlife.

Course Standard 9

AFNR-NRM-9

Describe an awareness of interrelationships in the forest environment between plants, soil, animals, water, and man.

- 9.1 Identify characteristics of forest soils.
- 9.2 Describe and give examples of Best Management Practices (BMP).
- 9.3 Explain the relationships between BMPs and the forest environment.
- 9.4 Discuss environmental concerns of forest production.
- 9.5 Analyze practices that benefit the environment.
- 9.6 Identify wetlands and explain the benefits of wetlands.
- 9.7 Explain policies concerning wetland use.
- 9.8 List endangered plant species of Georgia woodlands.
- 9.9 List endangered animal species of Georgia woodlands.
- 9.10 Explain policies concerning endangered species.

Course Standard 10

AFNR-NRM-10

Explain the importance of the government's natural resources and recreational programs.

- 10.1 Discuss the possibilities on public land.
- 10.2 Explain the federal government's main natural resource and recreation programs.
- 10.3 Discuss public access rights to shoreline, beaches, and water.
- 10.4 Explain how our public lands are misused and abused.

Course Standard 11

AFNR-NRM-11

Identify safety practices in land-based activities, such as hunting and 4-wheeler riding, and water-based activities, such as fishing and boating.

- 11.1 Discuss and practice the ten commandments of gun safety.
- 11.2 Explain the code of ethics for hunters.
- 11.3 List the correct safety procedures for using bows and arrows.
- 11.4 Explain safety procedures used in riding four wheelers.
- 11.5 Explain basic survival and first-aid techniques.
- 11.6 Explain safe boating procedures.
- 11.7 Describe the common traffic rules for boats.
- 11.8 List and demonstrate the water skiing signals.
