Infrastructure, an essential component of Georgia’s Tiered System of Supports for Students, is in alignment with Coherent Instruction, Supportive Learning Environment, Professional Capacity, Effective Leadership, Family and Community Engagement and crucial to the School Improvement Process. Coherent Instruction, Supportive Learning Environment, Professional Capacity, Effective Leadership, Family and Community Engagement, and the School Improvement Process are part of Georgia’s Systems of Continuous Improvement.

Essential Component: Infrastructure
Schools are complex organizations that are influenced by major systems that are interconnected. Together, these parts impact each child. In a tiered system of supports for students, district and school leadership strategically allocate resources necessary to create and support a reliable infrastructure that enable effective leadership, professional learning, teaming, and family and community engagement.

Infrastructure refers to the structure and support mechanisms needed to fully operationalize all components of Georgia’s Tiered System of Supports for Students into a unified system to meet the established goals. It sets the foundation to ensure effective implementation of Georgia’s Tiered System of Supports for Students.

Infrastructure is a critical combination of the following elements: Leadership, Effective Teaming, Professional Learning, and Family & Community Engagement.

The following links provide an explanation of each element.

- Leadership
- Effective Teaming
- Professional Learning
- Family & Community Engagement
